Fat City Donald Lambro, 1980 , The Federal Neutrality Act United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Separation of Powers, 1984 **Sociology, Science, and the End of Philosophy** Sal Restivo, 2017-07-06 This book offers a unique analysis of how ideas about science and technology in the public and scientific imaginations in particular about maths logic the gene the brain god and robots perpetuate the false reality that values and politics are separate from scientific knowledge and its applications These ideas are reinforced by cultural myths about free will and individualism Restivo makes a compelling case for a synchronistic approach in the study of these notoriously hard cases arguing that their significance reaches far beyond the realms of science and technology and that their sociological and political ramifications are of paramount importance in our global society This innovative work deals with perennial problems in the social sciences philosophy and the history of science and religion and will be of special interest to professionals in these fields as well as scholars of science and technology studies The Postgenomic Condition Jenny Reardon, 2017-12-29 Now that we have sequenced the human genome what does it mean In *The Postgenomic Condition* Jenny Reardon critically examines the decade after the Human Genome Project and the fundamental questions about meaning value and justice this landmark achievement left in its wake Drawing on more than a decade of research in molecular biology labs commercial startups governmental agencies and civic spaces Reardon demonstrates how the extensive efforts to transform genomics from high tech informatics practiced by a few to meaningful knowledge beneficial to all exposed the limits of long cherished liberal modes of knowing and governing life Those in the American South challenged the value of being included in genomics when no hospital served their community Ethicists and lawyers charged with overseeing Scottish DNA and data questioned how to develop a system of ownership for these resources when their capacity to create things of value new personalized treatments remained largely unrealized Molecular biologists who pioneered genomics asked whether their practices of thinking could survive the deluge of data produced by the growing power of sequencing machines While the media is filled with grand visions of precision medicine *The Postgenomic Condition* shares these actual challenges of the scientists entrepreneurs policy makers bioethicists lawyers and patient advocates who sought to leverage liberal democratic practices to render genomic data a new source of meaning and value for interpreting and caring for life It brings into rich empirical focus the resulting hard on the ground questions about how to know and live on a depleted but data rich interconnected yet fractured planet where technoscience garners significant resources but deeper questions of knowledge and justice urgently demand attention *Milestones and Millstones* Otto N. Larsen, 2019-01-22 From the 1960s onwards the clothing industry in the Netherlands and elsewhere in the European Union experienced a deep crisis Numerous went bankrupt and even more so workers lost their jobs Imports from low wage countries started providing the bulk of retailers collections

Congressional Record United States. Congress, 1993 **Policy Report** , 1981 *Selected Library Acquisitions* United States. Department of Transportation, *The Politics and Civics of National Service* Melissa Bass, 2013-01-03 In 1933 President Franklin D Roosevelt created America's first domestic national service program the Civilian Conservation Corps CCC As part of this program the largest and most highly esteemed of its kind nearly three million unemployed men worked to rehabilitate protect and build the nation's natural resources It demonstrated what citizens and government could accomplish together Yet despite its success the CCC was short lived While more controversial programs such as President Johnson's Volunteers in Service to America VISTA and President Clinton's AmeriCorps survived why did CCC die And why given the hard won continuation and expansion of AmeriCorps is national service an option for fewer Americans today than at its start nearly eighty years ago In *The Politics and Civics of National Service* Melissa Bass focuses on the history current relevance and impact of domestic civilian national service She explains why such service has yet to be deeply institutionalized in the United States while military and higher education have solidified their roles as American institutions civilian national service is still not recognized as a long term policy option Bass argues that only by examining these programs over time can we understand national service's successes and limitations both in terms of its political support and its civics lessons *The Politics and Civics of National Service* furthers our understanding of American political development by comparing programs founded during three distinct political eras the New Deal the Great Society and the early Clinton years and tracing them over time To a remarkable extent the CCC VISTA and AmeriCorps reflect the policymaking ethos and political controversies of their times illuminating principles that hold well beyond the field of national service By emphasizing these programs effects on citizenship and civic engagement *The Politics and Civics of National Service* Budget issues for fiscal year 1982 United States. Congress. House. Committee on the Budget, 1981 **Preview and Summary of the Wayward Welfare State** Roger A. Freeman, 1981 **Housing and Planning References** , 1980 **Social Science for What?** Mark Solovey, 2020-07-07 How the NSF became an important yet controversial patron for the social sciences influencing debates over their scientific status and social relevance In the early Cold War years the U S government established the National Science Foundation NSF a civilian agency that soon became widely known for its dedication to supporting first rate science The agency's 1950 enabling legislation made no mention of the social sciences although it included a vague reference to other sciences Nevertheless as Mark Solovey shows in this book the NSF also soon became a major albeit controversial source of public funding for them **The Washington Monthly** , 1980 **Our Threatened Freedom** R. J. Rushdoony, 2014-10-20 Far from carrying out its Biblical mandate to be a terror to evildoers civil government in America has increasingly become a terror to its law abiding citizens R J Rushdoony's essays seem even more timely today as we are witnessing a staggering display of state intrusion into every area of life This is the outcome of humanistic thinking It is the

end result of political salvation as both Left and Right continue to practice the belief that we can somehow get better or less government by way of politics However Rushdoony s comments are pastoral and theological not political He did not spin the issues for political gain but spoke as a man who feared God and desired to know how God s Word was applicable to our times Throughout these concise insightful essays you will see that true and lasting freedom is the end result of responsible faithful Christians exercising self government in terms of God s Word The Politics of Expertise in Congress Bruce

Bimber,1996-08-08 CHOICE 1997 Outstanding Academic Books Nowhere in the U S government is the marriage between expertise and politics more normatively troublesome and empirically obscure than in Congress The legislature is asked to be both expert and representative to act on the best available information and judgment about policy problems while being responsive to and reflective of constituents demands This book examines the relationship between technical experts and elected officials challenging the prevailing view about how experts become politicized by the policy process Bimber presents a theory about the connections between institutional structure and the strategies of experts who participate in politics He tests this theory by tracing the interaction between Congress and the Office of Technology Assessment OTA a recently abolished legislative branch agency created in 1972 to estimate the consequences of new technologies and free Congress from complete dependence on the executive branch for information and policy analysis In addition he provides comparative portraits of Congress s remaining support agencies the Congressional Budget Office the Congressional Research Office and the General Accounting Office and argues that the legislative context for the politics of expertise reveals patterns that have been overlooked in studies of expert knowledge and executive branch policymaking *Oversight of the Domestic Volunteer*

Service Act, 1981 United States. Congress. Senate. Committee on Labor and Human Resources.
