*The Hyper(in)visible Fat Woman* J. Gailey, 2014-11-19 In *The Hyper in visible Fat Woman* Gailey investigates the interface between fat women's perceptions of their bodies and of the social expectations and judgments placed on them. The book explores the phenomenon of hyper in visibility, the seemingly paradoxical social position of being paid exceptional attention while simultaneously being erased.

*The 'Fat' Female Body* S. Murray, 2008-09-30 Investigating the current interest in obesity and fatness, this book explores the problems and ambiguities that form the lived experience of fat women in contemporary Western society. Engaging with dominant ideas about fatness and analysing the assumptions that inform anti-fat attitudes in the West, *The Fat Female Body* explores the moral panic over the obesity epidemic and the intersection of medicine and morality in pathologising fat bodies. It contributes to the emerging field of fat studies by offering not only alternative understandings of subjectivity, the re-production of public knowledge of fatness and politics of embodiment, but also the possibility of re-reading fat bodies to foster more productive social relations.

*Weighty Issues* Jeffery Sobal, Donna Maurer, Many people consider their weight to be a personal problem, when then does body weight become a social problem? Until recently the major public concern was whether enough food was consistently available. As food systems began to provide ample and stable amounts of food, questions about food availability were replaced with concerns about ideal weights and appearance. These interests were aggregated into public concerns about defining people as too fat and too thin. Social constructionist perspectives can contribute to the understanding of weight problems because they focus attention on how these problems are created, maintained and promoted within various social environments. While there is much objectivist research concerning weight problems, few studies address the socially constructed aspects of fatness and thinness. This book, however, draws from and contributes to social constructionist perspectives. The chapters in this volume offer several perspectives that can be used to understand the way society deals with fatness and thinness. The contributors consider historical foundations, medical models, gendered dimensions, institutional components and collective perspectives. These different perspectives illustrate the multifaceted nature of obesity and eating disorders, providing examples of how a variety of social groups construct weight as a social problem. Jeffery Sobal is Professor, Division of Nutritional Sciences, Cornell University. He is on the board of directors of the Association for the Study of Food and Society and has Cornell University Graduate Field Membership in the areas of Nutrition, Development, Sociology and Epidemiology. Donna Maurer is John S. Knight Postdoctoral Fellow in the Writing Program, Cornell University. She also serves on the board of directors of the Association for the Study of Food and Society and is an adjunct professor of Sociology at the University of Maryland, University College. Drs. Sobal and Maurer are coeditors of a companion volume, *Interpreting Weight: The Social Management of Fatness and Thinness and Eating Agendas*. Food and Nutrition as Social Problems.
