**Moral, Liturgical, Apologetical, Philosophical, and Social Exposition of Religion from the Beginning of the World Down to Our Own Days** Jean Gaume, 1883      *Tobacco War* Stanton A. Glantz, Edith D. Balbach, 2000-05-10

*Tobacco War* charts the dramatic and complex history of tobacco politics in California over the past quarter century Beginning with the activities of a small band of activists who in the 1970s put forward the radical notion that people should not have to breathe second hand tobacco smoke Stanton Glantz and Edith Balbach follow the movement through the 1980s when activists created hundreds of city and county ordinances by working through their local officials to the present when tobacco is a highly visible issue in American politics and smoke free restaurants and bars are a reality throughout the state The authors show how these accomplishments rest on the groundwork laid over the past two decades by tobacco control activists who have worked across the U S to change how people view the tobacco industry and its behavior *Tobacco War* is accessibly written balanced and meticulously researched The California experience provides a graphic demonstration of the successes and failures of both the tobacco industry and public health forces It shows how public health advocates slowly learned to control the terms of the debate and how they discovered that simply establishing tobacco control programs was not enough that constant vigilance was necessary to protect programs from a hostile legislature and governor In the end the California experience proves that it is possible to dramatically change how people think about tobacco and the tobacco industry and to rapidly reduce tobacco consumption But California s experience also demonstrates that it is possible to run such programs successfully only as long as the public health community exerts power effectively With legal settlements bringing big dollars to tobacco control programs in every state this book is must reading for anyone interested in battling and beating the tobacco industry

Globalizing Tobacco Control Roddey Reid, 2005-12-20 Reid develops an approach to globalization and health that goes beyond simplistic dichotomies such as the puritanism of the United States in contrast with the more libertine cultures of other countries and he also eschews the equally simplistic view that the world is becoming homogenized David J Hess Rensselaer Polytechnic Institute A tangible aspect of living working and traveling in the 21st century is the experience of moving between smoke filled and smoke free environments In *Globalizing Tobacco Control* Roddey Reid examines what lies behind this experience the revolution in public attitudes and health codes that regulate daily routines and the life of the body While the gradual replacement of smoking with non smoking as the social norm is a global phenomenon it has not followed the same trajectory everywhere Reid compares anti smoking campaigns in the United States France and Japan for what they reveal about the nature of globalization and liberal arts of government He explores distinctive national histories of tobacco evolving global marketing strategies of transnational tobacco corporations social marketing techniques used to tailor public health messages to particular ethnic communities and the programs of international public health organizations
