Fatal Denial Annie Menzel,2024-05-28 Fatal Denial argues that over the past 150 years US health authorities explanations of and interventions into Black infant mortality have been characterized by the biopolitics of racial innocence a term describing the institutionalized mechanisms in health care and policy that have at once obscured enabled and perpetuated systemic infanticide by blaming Black mothers and communities themselves Following Black feminist scholarship demonstrating that the commodification and theft of Black women s reproductive bodies labors and care is foundational to US racial capitalism Annie Menzel posits that the polity has made Black infants vulnerable to preventable death Drawing on key Black political thought and praxis around infant mortality from W E B Du Bois and Mary Church Terrell to Black midwives and birth workers this work also tracks continued refusals to acknowledge this routinized reproductive violence illuminating both a rich history of care and the possibility of more transformative futures

Monsters and their Meanings in Early Modern Culture Wes Williams, 2011-05-26 To call something monstrous in the mid sixteenth century is more often than not to wonder at its enormous size it is to call to mind something like a whale By the late seventeenth monstrous is more likely to denote hidden intentions unspoken desires Several shifts are at work in this word

history and in what Othello calls the mighty magic of monsters these shifts can be described in a number of ways The clearest and most compelling is the translation or migration of the monstrous from natural history to moral philosophy from descriptions of creatures found in the external world to the drama of human motivation of sexual and political identity This interdisciplinary study of monsters and their meanings advances by way of a series of close readings supported by the exploration of a wide range of texts and images from many diverse fields which all concern themselves with illicit coupling unarranged marriages generic hybridity and the politics of monstrosity Engaging with recent influential accounts of monstrosity from literary critical work Huet Greenblatt Thomson Burnett Hampton to histories of science and bio politics Wilson C ard Foucault Daston and Park Agamben it focusses on the ways in which monsters give particular force colour and shape to the imagination the image at its centre is the triangulated picture of Andromeda Perseus and the monster approaching The centre of the book s gravity is French culture but it also explores Shakespeare and Italian German and Latin culture as well as the ways in which the monstrous tales and images of Antiquity were revived across the period and survive into our own times
