Commonwealth of Australia Kalman Dubov, 2021-11-24 The continent of Australia has an ancient and modern history Aborigines arrived at this continent an estimated 40 000 to 60 000 years ago living a hunter gatherer existence while developing unique ways to live and thrive on this land That idyllic life ended in 1770 when the great British explorer James Cook discovered the continent Just eighteen years later in 1788 the First Fleet of convict ships from England established a colony at Botany Bay near today s city of Sydney The settlement grew and developed while additional convict ships and settlers came to this continent to make a new home and life for themselves As the number of settlers increased there was a corresponding series of attacks on the Aborigines Massacres took many lives while European diseases for which the Aborigines had no immunity decimated these ancient communities I review this tragic interaction between these two diverse cultures which continues today I also explore the Stolen Generation the racist and genocidal policy of forcibly removing Aboriginal children from their parents and community then giving these children to white parents to be raised in an atmosphere intolerant to the Aboriginal culture and history An estimated 100 000 children were taken in this manner remembered nationally and annually as Sorry Day In addition an estimated 500 000 white children were taken from parents and given to others While forcibly negating and outlawing native cultures has taken place in many countries where dominant

values are identified as superior to the older and subjugated culture the forcible removal of hundreds of thousands of white children from parents reflects a policy that begs to be examined in depth I also review the establishment of a Royal Commission that examined sexual predatory attacks on children both in the Roman Catholic Church by diocesan and order priests brothers while these children were wards of these religious institutions by order of the federal government I also explore the percentages of prelates who acted in this criminal manner This issue has been faced in several other countries with resulting questions regarding the role Catholic priests and their bishops have in teaching religious values while protecting their charges from sexual abuse The Jewish community too has been charged in this scourge Two religious schools in Melbourne were charged with knowledge of such attacks taking place in these schools but the rabbinic leadership neither reported the abuse to civil authorities nor made efforts to stop it In this regard I explore the Jewish law inhibiting such reporting to secular authorities In fact the historic and traditional Jewish community standard prefers to protect the predator and not protect the victimized child This standard is gradually changing as progressive awareness is made into the corrosive atmosphere surrounding a victimized child and the enormous psychological and emotional costs endured by the child for the remainder of his or her life The theme of sexual abuse is also present with regard to Malka Leifer This woman was charged with over seventy counts of criminal behavior while having a senior administrative and teaching role in a leading ultra Orthodox religious school for girls She became a cause célèbre with international intrigue between Australia and Israel when she escaped Australian shores for refuge in Israel Years of legal wrangling ensued by many Israeli courts including the Supreme Court each examining the increasing furor if this woman should be extradited to face criminal charges in Australia Malka Leifer was only recently returned to Australia now finally awaiting her moment of facing her accusers in open court This volume also reviews and analyzes each war Australians fought in from the Second Boer War First World War Second World War Korean and Vietnam Wars the wars in Iraq and Afghanistan These conflicts culminated with the ANZUS Treaty with a military cooperation agreement between the United States Australia and New Zealand The United States identified New Zealand as standing against the West when it promulgated its anti nuclear zone New Zealand identified with smaller Pacific island nations that condemned nuclear testing on remote Pacific islands and the resulting fallout with consequent health issues they face because of such testing I was on the Holland American Grand Voyage while visiting Australian ports I review the different Australian ports the Amsterdam came to such as Darwin Brisbane and Sydney I review each of these cities both as the country developed and modernly with these cities taking on more developed economic power *Paradise for Sale* Carl N. McDaniel, John M. Gowdy, 2000-01-28 The grim history of Nauru Island a small speck in the Pacific Ocean halfway between Hawaii and Australia represents a larger story of environmental degradation and economic dysfunction For more than 2 000 years traditional Nauruans isolated from the rest of the world lived in social and ecological stability But in 1900 the discovery of phosphate an absolute requirement for agriculture catapulted Nauru into the world market Colonial

imperialists who occupied Nauru and mined it for its lucrative phosphate resources devastated the island which forever changed its native people In 1968 Nauruans regained rule of their island and immediately faced a conundrum to pursue a sustainable future that would protect their truly valuable natural resources the biological and physical integrity of their island or to mine and sell the remaining forty year supply of phosphate and in the process make most of their home useless They did the latter In a captivating and moving style the authors describe how the island became one of the richest nations in the world and how its citizens acquired all the ills of modern life obesity diabetes heart disease hypertension At the same time Nauru became 80 percent mined out ruins that contain severely impoverished biological communities of little value in supporting human habitation This sad tale highlights the dire consequences of a free market economy a system in direct conflict with sustaining the environment In presenting evidence for the current mass extinction the authors argue that we cannot expect to preserve biodiversity or support sustainable habitation because our economic operating principles are incompatible with these activities

Collapse Jared Diamond, 2011-01-04 In Jared Diamond's follow up to the Pulitzer Prize winning *Guns Germs and Steel* the author explores how climate change the population explosion and political discord create the conditions for the collapse of civilization Diamond is also the author of *Upheaval Turning Points for Nations in Crisis* Environmental damage climate change globalization rapid population growth and unwise political choices were all factors in the demise of societies around the world but some found solutions and persisted As in *Guns Germs and Steel* Diamond traces the fundamental pattern of catastrophe and weaves an all encompassing global thesis through a series of fascinating historical cultural narratives *Collapse* moves from the Polynesian cultures on Easter Island to the flourishing American civilizations of the Anasazi and the Maya and finally to the doomed Viking colony on Greenland Similar problems face us today and have already brought disaster to Rwanda and Haiti even as China and Australia are trying to cope in innovative ways Despite our own society's apparently inexhaustible wealth and unrivaled political power ominous warning signs have begun to emerge even in ecologically robust areas like Montana Brilliant illuminating and immensely absorbing *Collapse* is destined to take its place as one of the essential books of our time raising the urgent question How can our world best avoid committing ecological suicide

Fearless Joe Glickman, 2012-01-24 Like the instant classic *The Last American Man* *Fearless* is the story of a remarkable individual who accepts no personal limits including fear Freya Hoffmeister a forty six year old former sky diver gymnast marksman and Miss Germany contestant left her twelve year old son behind to paddle alone and unsupported around Australia a year long adventure that virtually every expert guaranteed would get her killed She planned not only to survive the 9 420 mile trip through huge shark infested seas but to do it faster than the only other paddler who did it As journalist and expert kayaker Joe Glickman details the voyage of this Teutonic force of nature he captures interminable days on the water and nights camped out on deserted islands hair raising encounters with crocs and great white sharks and the daring 300 mile open ocean crossing that shaved three weeks off her trip For 332 days Glickman followed

Freya's journey on her blog along with a far flung audience of awestruck even lovesick groupies as she took on one terrifying ordeal after the next In the end he says her vanity and pigheadedness paled next to her nearly superhuman ability to master fear and persevere

Wikipedia , [Philanthropology, the Science of Philanthropy](#) Theo Schuyt,2024-09-03 This book sheds a positive light on the prevalence of love for humankind in the form of philanthropy All around our globe people rich and poor urban and rural religious and non religious in advanced and developing societies alike perform acts of philanthropy organizationally embedded and guided by philanthropic values and norms This book therefore attempts to reach a truly international audience because philanthropy is not an exclusively Western phenomenon Besides the growing public interest across the world more and more academic disciplines are taking an interest in philanthropy each scrutinizing philanthropy from their own disciplinary perspective and with a particular focus As a result however the overall picture has rather faded into the background In line with cultural anthropologists the book presents philanthropy as a universal societal system differently arranged in each society that deserves a distinctive academic discipline the science of philanthropology

The Globalization of Supermax Prisons Jeffrey Ian Ross,2013-02-10 Supermax prisons conceived by the United States in the early 1980s are typically reserved for convicted political criminals such as terrorists and spies and for other inmates who are considered to pose a serious ongoing threat to the wider community to the security of correctional institutions or to the safety of other inmates Prisoners are usually restricted to their cells for up to twenty three hours a day and typically have minimal contact with other inmates and correctional staff Not only does the Federal Bureau of Prisons operate one of these facilities but almost every state has either a supermax wing or stand alone supermax prison The Globalization of Supermax Prisons examines why nine advanced industrialized countries have adopted the supermax prototype paying particular attention to the economic social and political processes that have affected each state Featuring essays that look at the U S run prisons of Abu Ghraib and Guantanamo this collection seeks to determine if the American model is the basis for the establishment of these facilities and considers such issues as the support or opposition to the building of a supermax and why opposition efforts failed the allegation of human rights abuses within these prisons and the extent to which the decision to build a supermax was influenced by developments in the United States Additionally contributors address such domestic matters as the role of crime rates media sensationalism and terrorism in each country's decision to build a supermax prison

Immigration and Exile Foreign-Language Press in the UK and in the US Stéphanie Prévost,Bénédicte Deschamps,2023-12-14 Both Britain and the United States have had a long history of harbouring foreign political exiles who often set up periodicals which significantly contributed to community building and political debates
