## Fatally Flawed:

Fatal Flaws Earl J. Seeley, 2022-01-06 The warming of Earth's surface that has occurred since 1880 has been grossly overstated and attributed entirely to carbon dioxide based on a preposterous assumption. That assumption is All of the warming of Earth's surface temperature during the last 140 years is due to accumulation of carbon dioxide and other minor greenhouse gasses in the atmosphere. The level of carbon dioxide has increased from 290 ppm to 411 ppm. That is an increase of 121 ppm from 0.029% to 0.041% of the atmosphere. There are other environmental forces which are much stronger, more prevalent and active in regulating and modulating the Earth's surface temperature than carbon dioxide. These forces are in order of impact: First The sun, Second The Earth's waters, Third Heat from the Earth's core, Fourth Atmospheric aerosols, and Fifth Carbon dioxide and the other minor greenhouse gases. While carbon dioxide is an extremely important substance in the support of life on this planet, its contribution to the greenhouse effect is a bit part, not a leading role. There are three fatally flawed assumptions and six Fatal Flaws at the heart of the Global Warming theory. Each is discussed in this book, the flaws identified and evidence presented. These Flaws originated when, in forming the Theory of Global Warming, the contributions of the four most important environmental forces involved in the control of the Earth's surface temperature were assumed to have had no effect on the warming trend. Because of the single dimension models used in climate research, the contributions of these four climate controlling forces are mistakenly credited to climate forcing by carbon dioxide. The remaining two fatal flaws concern carbon dioxide's roles and fate in nature. The contents of this work will challenge what most people believe about the global warming theory. Read and contemplate this work and the supporting evidence; then you be the judge. **The Fatal Flaw** Jerry Garlough, 2012-12-13 Does it not seem strange that these patrons of truth have no actual base for the truth they espouse? Should not these champions of reason offer some plausible foundation for the rational thought they employ? Who can but doubt these adversaries of God who cannot even account for the moral sense by which they denounce Him? What shall we say of masters of science who would deprive science of the undergirding of truth and reason? These are not lords of their own domain as they might suppose. They are squatters on a land belonging to another mere pretenders, plagiarizers of values, not their own. Like the Prodigal Son, they have taken the resources bequeathed by a loving Father and squandered them in futile meanderings. No one should take these men as seriously as they take themselves. They are not reaching for the far horizon line. Rather, they are trapped in their tiny cramped valley called physicality and have chosen to ignore every other doorway to reality. They are not men reaching for the stars. They are rather like those who wade through muck and mire, stirring up more as they go. *Drift ...* Sereena Nightshade and Brian Guzzi, 2014-07-15 *Drift* is a medley style compilation of poetry, prose, quips, and descriptive ditties about various topics, primarily geared towards adult relationships which have drifted into this book's author's minds over the relevant time frame of this book's creation. of rescuers at both the university and the secondary level

**Geopolitics and the Western Pacific** Leszek

Buszynski, 2019-06-07 This book examines the development of China's national ambitions under its current leader Xi Jinping and the dilemma they present for the United States and also Japan. It emphasises the importance of geopolitics that is the way national strategies and policies are shaped and in some cases determined by geographic location. Focusing especially on China's national rejuvenation and its rapidly growing military capability and navy and on the likely impact on the region of China regaining the status and influence it enjoyed in dynastic times, the book highlights the hard choices faced by the United States as it seeks to protect its geopolitical position in the Western Pacific particularly in the South China Sea, the Korean Peninsula and the Taiwan straits. How far should the United States confront China or accommodate China possibly at the risk of undermining its geopolitical position and its alliance relationships with Japan, Australia and South Korea? The book also discusses the degree to which issues of institution building and economic interdependence can overcome or constrain geopolitical calculations.

**Theism and Explanation** Gregory W.

Dawes, 2012-09-10 In this timely study Dawes defends the methodological naturalism of the sciences. Though religions offer what appear to be explanations of various facts about the world, the scientist as scientist will not take such proposed explanations seriously. Even if no natural explanation were available, she will assume that one exists. Is this merely a sign of atheistic prejudice as some critics suggest? Or are there good reasons to exclude from science explanations that invoke a supernatural agent? On the one hand, Dawes concedes the bare possibility that talk of divine action could constitute a potential explanation of some state of affairs while noting that the conditions under which this would be true are unlikely ever to be fulfilled. On the other hand, he argues that a proposed explanation of this kind would rate poorly when measured against our usual standards of explanatory virtue.
