## **Fateful Transformations:**

**Fateful Transformations** Janusz Duzinkiewicz, 1993 A study of attempts during the late 18th century to reform the Polish Lithuanian Commonwealth culminating in the May Third Constitution which transformed old concepts of cardinal law and confederation into a modern system of government and rule by law *Metamorphosis - Structures of Cultural Transformations* Jürgen Schläeger, 2005 **Darfur Allegory** Rogaia Mustafa Abusaraf, 2021-03-16 The Darfur conflict exploded in early 2003 when two rebel groups the Sudan Liberation Movement and the Justice and Equality Movement struck national military installations in Darfur to send a hard hitting message of resentment over the region's political and economic marginalization The conflict devastated the region's economy shredded its fragile social fabric and drove millions of people from their homes Darfur Allegory is a dispatch from the humanitarian crisis that explains the historical and ethnographic background to competing narratives that have informed international responses At the heart of the book is Sudanese anthropologist Rogaia Abusharaf's critique of the pseudoscientific notions of race and ethnicity that posit divisions between Arab northerners and African Darfuris Elaborated in colonial times and enshrined in policy afterwards such binary categories have been adopted by the media to explain the civil war in Darfur The narratives that circulate internationally are thus highly fraught and cover over to counterproductive effect forms of Darfurian activism that have emerged in the conflict's wake Darfur Allegory marries the analytical precision of a committed anthropologist with an insider's view of Sudanese politics at home and in the diaspora laying bare the power of words to heal or perpetuate civil conflict *Nationalism in Modern Europe* Derek Hastings, 2023-01-12 Derek Hastings's Nationalism in Modern Europe is the essential guide to a potent political and cultural phenomenon that featured prominently across the modern era With firm grounding in transnational and global contexts the book traces the story of nationalism in Europe from the French Revolution to the present Hastings reflects on various nationalist ideas and movements across Europe and always with a keen appreciation of other prevalent signifiers of belonging such as religion race class and gender which helps to inform and strengthen the analysis The text shines a light on key historiographical trends and debates and includes 20 images 14 maps and a range of primary source excerpts which can serve to sharpen vital analytical skills which are crucial to the subject New content and features for the second edition include A chapter examining region religion class and gender as alternative markers of identity throughout the 19th century An enhanced global dimension that covers transnational fascism and non European comparatives Additional primary source excerpts and figures Historiographical updates throughout which account for recent research in the field **Reading Backwards** Muireann Maguire, Timothy Langen, 2021-06-18 This book outlines with theoretical and literary historical rigor a highly innovative approach to the writing of Russian literary history and to the reading of canonical Russian texts Anticipatory plagiarism is a concept developed by the French Oulipo group but it has never to my knowledge been explored with reference to Russian studies The editors and contributors to the proposed volume

a blend of senior and beginning scholars Russians and non Russians offer a set of essays on Gogol Dostoevsky and Tolstoy which provocatively test the utility of AP as a critical tool relating these canonical authors to more recent instances some of them decidedly non canonical The senior scholars who are the editors and most of the contributors are truly distinguished The volume is likely to receive serious attention and to be widely read I recommend it with unqualified enthusiasm William Mills Todd III Harry Tuchman Levin Professor of Literature Harvard University As the founder of the notion of plagiarism by anticipation which was stolen from me in the sixties by fellow colleagues I am delighted to learn that my modest contribution to literary theory will be used to better understand the interplay of interferences in Russian literature Indeed one would have to be naive to think that the great Russian authors would have invented everything In fact they were able to draw their ideas from their predecessors but also from their successors testifying to the open mindedness that characterizes the Slavic soul This book restores the truth Pierre Bayard Professor of Literature University of Paris 8 This edited volume employs the paradoxical notion of anticipatory plagiarism developed in the 1960s by the Oulipo group of French writers and thinkers as a mode for reading Russian literature Reversing established critical approaches to the canon and literary influence its contributors ask us to consider how reading against linear chronologies can elicit fascinating new patterns and perspectives Reading Backwards An Advance Retrospective on Russian Literature re assesses three major nineteenth century authors Gogol Dostoevsky and Tolstoy either in terms of previous writers and artists who plagiarized them such as Raphael Homer or Hall Caine or of their own depredations against later writers from J M Coetzee to Liudmila Petrushevskaya Far from suggesting that past authors literally stole from their descendants these engaging essays contributed by both early career and senior scholars of Russian and comparative literature encourage us to identify the contingent and familiar within classic texts By moving beyond rigid notions of cultural heritage and literary canons they demonstrate that inspiration is cyclical influence can flow in multiple directions and no idea is ever truly original This book will be of great value to literary scholars and students working in Russian Studies The introductory discussion of the origins and context of plagiarism by anticipation alongside varied applications of the concept will also be of interest to those working in the wider fields of comparative literature reception studies and translation studies

**The Carrera Revolt and 'Hybrid Warfare' in Nineteenth-Century**

**Central America** Gilmar Visoni-Alonzo, 2017-07-18 This book provides a novel analysis of the military campaign of Rafael Carrera during the popular insurrection of 1837-1840 in Guatemala Over the course of three years Carrera a semi literate farmer and his army of peasants established Conservative control over Guatemala and accelerated the disintegration of the Central American Federation Although Carrera's rise has been analyzed from a political and socio economic perspective the present work shows that Carrera's vertiginous success is the product of a peculiar and misunderstood approach to warfare that combines guerrilla recruiting practices and rural insurgency logistics with conventional combat tactics and operations Gilmar Visoni Alonzo argues that Carrera's hybrid warfare was made possible because of the conditions created by the

militarization of Latin American society following the administrative reforms of the Bourbon monarchy in the late eighteenth century The concept of hybrid warfare is offered as an alternative model to understand the success of other insurgencies

**Revolutionary Jews from Spinoza to Marx** Jonathan I. Israel, 2021-06-06 Defines how Jewish intellectuals of the Enlightenment influenced later European revolutionary movements In the eighteenth and early nineteenth centuries a small but conspicuous fringe of the Jewish population became the world's most resolute intellectually driven and philosophical revolutionaries among them the pre-Marxist Karl Marx Yet the roots of their alienation from existing society and determination to change it extend back to the very heart of the Enlightenment when Spinoza and other philosophers living in a rigid hierarchical society colored by a deeply hostile theology first developed a modern revolutionary consciousness Leading intellectual historian Jonathan Israel shows how the radical ideas in the early Marx's writings were influenced by this legacy which he argues must be understood as part of the Radical Enlightenment He traces the rise of a Jewish revolutionary tendency demanding social equality and universal human rights throughout the Western world Israel considers how these writers understood Jewish marginalization and ghettoization and the edifice of superstition prejudice and ignorance that sustained them He investigates how the quest for Jewish emancipation led these thinkers to formulate sweeping theories of social and legal reform that paved the way for revolutionary actions that helped change the world from 1789 onward but hardly as they intended
