## **Fatherland Novalis Freud And The Discipline Of Romance:**

Fatherland Kenneth Scott Calhoun, 1992 *Fatherland* analyzes the origins of German Romanticism and the works of Novalis Friedrich von Hardenberg 1772 1801 In his introduction Kenneth Calhoun writes This study examines Romanticism and psychoanalysis in terms of a shared economy of longing and disappointment of which mourning is a profound index Whereas most recent studies of Novalis have concentrated on his poetic and philosophical theories Calhoun explores the psychological implications of his writings He places Freud and Novalis in the debate currently raging in Germany about the legacy of the Enlightenment Instead of grounding his research on Freudian theory itself Calhoun focuses on a radicalization of the Enlightenment's quest by diverting attention to those regions of the mind where it still seemed possible to choose one's own parents Family Romance Freud's image for describing how children who have grown to doubt the identity of a father and idealize their origins through fantasies of heroic illegitimacy suggests the emplotment of such identity crises as Romantic Journey As such it provides a map for reading Novalis's novel *Heinrich von Ofterdingen* in which the father as fatherland is rediscovered only after an elaborate circumnavigation of the maternal body This book addresses in addition to the writings of Novalis and Freud works by Coleridge *Kubla Khan* Goethe *Erlkönig* Wilhelm Meisters *Lehrjahre* Joyce *A Portrait of the Artist as a Young Man* Lessing *Nathan der Weise* *Die Erziehung des Menschengeschlechts* and P O Runge *Fall des Vaterlands*

BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved      The Poetization of Metaphors in the Work of Novalis Veronica Freeman, 2006 The poet Friedrich von Hardenberg Novalis 1772 1801 exemplifies romantic ideals in his nostalgic yearning for spiritual fulfillment and in doing so invokes the language of authentic mystics While romantics and mystics believe in the common goal of original union the path toward wholeness has led them down separate roads which it may be argued have converged only linguistically This book therefore emphasizes the importance of examining metaphors in their respective traditions      Women and Writing in the Works of Novalis James R. Hodkinson, 2007 Although more recent critics have discerned an empowered female subject in Novalis this is the first balanced book length study of gender in Novalis in English It concludes that Hardenberg's Romantic writing began to be successful in reinventing the fiction of female identity and goes further to reveal his extensive interaction with women as intellectual equals

BOOK JACKET      *The Anxiety of Autonomy and the Aesthetics of German Orientalism* Nicholas A. Germana, 2017 A history of Kantian and post Kantian thought and of a foundational stage of German orientalism German orientalism has been understood variously as a form of latent colonialism as a quest for academic hegemony in Europe and as an effort to diagnose and treat the ills of modern Western culture Nicholas Germana identifies a different impetus for orientalism in German thought seeing it as an effort to come to grips with the Other within German society at the turn of the nineteenth century and within the dynamics of subjectivity itself Drawing largely on work by feminist scholars the book uncovers an anxiety at the core of Kantian and post Kantian thought thus shedding light on its derogation or elevation of Oriental cultures Kant's

philosophy of freedom is a construction of modern Western masculinity Reason which alone can make freedom possible subverts and orders chaotic nature and protects the rational subject from the enervating influences of the senses and the imagination The feminized sexually charged Orient is a threat to the historical achievement of Western male rationality Germana's book emphasizes aesthetics in the German orientalist discourse a subject that has received little attention to date In this tradition of German thought aesthetics became a form of spiritual anthropology ordering and classifying societies races and genders in terms of their ability to master the senses and the imagination forces that undermine rational autonomy the very source of human i.e. masculine dignity Nicholas A. Germana is Professor of History at Keene State College New Hampshire [The Cambridge Companion to German Romanticism](#) Nicholas Saul, 2009-07-09 Explains the development of Romantic arts and culture in Germany with both individual artists and key themes covered in detail [The Spell of Italy](#) Richard A. Block, 2006 Annotation A study of the lure of Italy in German culture from the eighteenth to the twentieth century

Clason, 2020-04-17 A deep dread of puppets and the machinery that propels them surfaced in Romantic literature in the late eighteenth and early nineteenth century *Romantic Automata* is a collection of essays examining the rise of cultural suspicion of all imitations of homo sapiens and similar machinery as witnessed in the literature and arts of the time For most of the eighteenth century automata were deemed a celebration of human ingenuity feats of science and reason Among the Romantics however they prompted a

contradictory apprehension about mechanization and contrivance such science and engineering threatened the spiritual nature of life the source of compassion in human society Recent scholarship in post humanism post colonialism disability studies post modern feminism eco criticism and radical Orientalism has significantly affected the critical discourse on this topic The essays in this collection open new methodological approaches to understanding human interaction with technology that strives to simulate or to supplement organic life Published by Bucknell University Press Distributed worldwide by Rutgers University Press

Memory in German Romanticism Christopher R. Clason, Joseph D. Rockelmann, Christina M. Weiler, 2023-03-31 Memory in German Romanticism treats memory as a core element in the production and reception of German art and literature of the Romantic era The contributors explore the artistic expression of memory under the categories of imagination image and reception Romantic literary aesthetics raises the subjective imagination to a level of primary importance for the creation of art It goes beyond challenging reason and objectivity two leading intellectual faculties of eighteenth century Enlightenment and instead elevates subjective invention to form and sustain memory and imagination Indeed memory and imagination both cognitive functions seek to assemble the elements of one's own experience either directed toward the past memory or toward the future imagination coherently into a narrative And like memories images hold the potential to elicit charged emotional responses those responses live on through time becoming part of the spatial and temporal reception of the artist and their work While imagination generates and images trigger and capture memories reception creates a temporal spatial context for art organizing it and rendering it memorable both for good and for bad Thus through the categories of imagination image and reception this volume explores the phenomenon of German Romantic memory from different perspectives and in new contexts

**The Orient of Europe** Nicholas Germana, 2009-05-27 August Wilhelm Schlegel proclaimed that if the regeneration of the human species started in the East Germany must be considered the Orient of Europe How can this remarkable identification of Germany with the subjugated oriental other be explained In *The Orient of Europe* Nicholas A. Germana explores how German thinkers especially those associated with the Early Romantic movement set India up as an ideal mirror in which they could perceive the image of the Germany they longed for a nation whose greatness lay not in political and military power but in the realm of culture and the spirit Such an image was especially important during the years of French occupation and the Wars of Liberation against Napoleon The mythical image of India however underwent profound changes in the decades after 1815 The end of the Wars of Liberation and the onset of the Restoration era led to the decline of the romantic image of India As statist visions of German unity rose in prominence especially in Prussia this image of the connection between Germany and ancient India took on a new complexion Politically volatile romantic Indomania gave way to a new more acceptable ideology the ideology of Wissenschaft In this book which engages with the most recent scholarship in the rapidly emerging field of German Orientalism Germana challenges traditional Saidian Orientalist readings of German intellectual engagement with Indian thought and literature German

romantic and humanist fascination with India he argues is best understood within the context of debates about the nature of Germany and Germanness in the late eighteenth and early nineteenth centuries rather than in connection with nascent German colonial fantasies

*Walter Benjamin and the Corpus of Autobiography* Gerhard Richter, 2000 Walter Benjamin and the Corpus of Autobiography is not merely the most extensive and insightful treatment of Benjamin's autobiographical writings

*The School of Days* Nancy Nobile, 1999 The School of Days establishes Heinrich von Kleist as a strong voice within the pedagogical debates of his times Through detailed analyses of works by Rousseau Jean Paul Richter Kant and others it traces Kleist's response to influential pedagogical theories of the mid eighteenth and early nineteenth centuries Nancy Nobile examines the relationship of theory and practice in education to illuminate the novelistic impulse and thus the role of fiction in pedagogical endeavors Nobile demonstrates how Kleist's texts reveal the irrationality and antagonism often inherent in the ostensibly rational act of shaping human beings She explores the dynamics of trauma in Kleist's depictions of education arguing that his works frequently stage pedagogical encounters as violent negotiations of gender Beginning with her argument that trauma is a constitutive element of education in Rousseau's *Emile* Nobile explores the role of trauma in both subject formation and the perception of national identity and considers its ramifications for Kleist's biography for his fictional characters and also for the prospect of German nationhood during the Napoleonic wars The School of Days provides close readings of works in all genres by Kleist drama essay correspondence narrative and lyric It offers new interpretations of several of Kleist's most familiar works *Über das Marionettentheater* *Über die allmähliche Verfertigung der Gedanken beim Reden* *Prinz Friedrich von Homburg* and also contains detailed commentary on texts usually ignored by Kleistian scholarship *Alte Meute* *Erziehungsplan* *Charité Vorfall* and other essays written for the *Germania* *Phobus* and the *Berliner Abendblätter* While Nobile devotes careful attention to textual detail she firmly anchors her readings within the political historical biographical and philosophical contexts of Kleist's works This book will be of interest to scholars of Heinrich von Kleist and German Romanticism as well as those interested in the history of pedagogy

*Peripheral Visions* Kenneth Scott Calhoun, 2001 The eight essays in this volume consider questions concerning spatial transformations in and around Weimar cinema They analyse the periphery the other spaces that are implicated if not present in the films themselves

About Face Richard T. Gray,2004 A critical history of physiognomic thought in German speaking Europe that traces the roots of twentieth century racial profiling to the Enlightenment Once associated with astrology and occultist prophecy the art of interpreting personal character based on facial and other physical features dates back to antiquity About Face tells the intriguing story of how physiognomics became particularly popular during the Enlightenment no longer as a mere parlor game but as an empirically grounded discipline The story expands to illuminate an entire tradition within German culture stretching from Goethe to the rise of Nazism In About Face Richard T Gray explores the dialectical reversal from the occult to the scientific realm that entered physiognomic thought in the late eighteenth century beginning with the positivistic writings of the Swiss pastor Johann Caspar Lavater Originally claimed to promote understanding and love physiognomics devolved into a system aimed at valorizing a specific set of physical moral and emotional traits and stamping everything else as deviant This development not only reinforced racial national and characterological prejudices but lent such beliefs a presumably scientific grounding In the period following World War I physiognomics experienced yet another unprecedented boom in popularity Gray explains how physiognomics had by then become a highly respected super discipline that embraced many prominent strands of German thought the Romantic philosophy of nature the life philosophy propagated by Dilthey and Nietzsche the cultural pessimism of Schopenhauer Husserl s method of intuitive observation Freudian psychoanalysis and early twentieth century eugenics and racial biology A rich exploration of German culture About Face offers fresh insight into the intellectual climate that allowed the dangerous thinking of National Socialism to take hold
