In Defense of Single-Parent Families Nancy E Dowd, 1999-05-01 An expert in family law and policy presents a thought provoking examination of the stereotypes realities and possibilities of single parent families Single parent families succeed Within these families children thrive develop and grow just as they do in a variety of family structures Tragically they must do so in the face of powerful legal and social stigma that works to undermine them As Nancy E Dowd argues here this stigma is founded largely on myths which result in harshly punitive social policies Dowd details the primary justifications for stigmatizing single parent families marshalling an impressive array of resources that portray a very different picture of them She describes them in all their forms with particular attention to the differential treatment given to never married and divorced single parents and to the impact of gender race and class Illustrating the harmful impact of current laws concerning divorce welfare and employment Dowd makes a powerful case for centering policy around the welfare and equality of all children

Psychological Implications of Preterm Birth Livio Provenzi, Evalotte Mörelus, Mia McLean, Minesh Khashu, 2025-03-14 Preterm birth which comprises about 10% of births globally has significant short and long term implications for the child its parents and the wider family It poses a significant physical and mental health as well as economic burden on society While the physical health complications of preterm birth are reasonably well documented in

the literature the data in terms of psychological impacts is still quite thin especially for the long term Indeed preterm birth and the precocious hospitalization in the Neonatal Intensive Care Unit NICU might be highly distressful for both infants and parents Different sources of stress e g lights and sounds parental separation invasive and painful procedures have been described and their impact on preterm infants socio emotional and socio cognitive development as well as for parental well being and adaptation deserve further investigations The psychological implications of early interventions during and after NICU stay are also noteworthy and accumulation of data in this field is highly needed The quality of parent child interaction from the immediate NICU admission to the first years of life is also a topic that merits investigation as it is one of the most critical source of protection for the developmental trajectories of preterm infants *Adolescents with HIV* , *Connecting Children* Kalwant Bhopal,Julia Brannen,Ellen Heptinstall,2000-08-31 *Connecting Children* focuses on children s understandings of care and their views of different family lives It portrays the lives of children aged 11 12 and shows how families connect children in different ways both in the household but also in their wider kinship networks The children studied reflect upon family life and especially upon situations where their own family lives change dramatically such as when parents divorce or are unable to care for them This book will be of interest to those working in education social work child care counselling social policy and childhood studies *Caring for Abused and Neglected Children* Jim Wade,2011 The decision whether to reunify a child in care with their birth family is one of most serious considerations of child protection workers This book examines the long term consequences of family reunification and the risk of returning the child without adequate support to the family *Public Health Reports* ,2002
