Faunal Diversity In The Thar Desert Gaps In Research:

Faunal Diversity in the Thar Desert, 2019 **Faunal Diversity in the Thar Desert** Asish Kumar Ghosh, Q. H. Baquri, Ishwar Prakash, 1996 Papers presented at a meeting held in Jodhpur on 16th 17th Mar 1994 **Changing Faunal Ecology in the Thar Desert** B.K. Tyagi, Q.H. Baqri, 2005-05-01 Changing Faunal Ecology in the Thar Desert dedicated to the fond memory of Professor Dr Ishwar Prakash the legendary rodentologist is a unique mlang of scientific investigations on diversified ecological subjects pertaining to different organism groups from as tiny as protozoa to as giant as mammals Altogether sixteen contributions including an original up to date and authentic bio bibliography of Dr I Prakash make this volume an exceptional treatise penned by 24 expert scientist authors many of whom have spent a life in arid ecosystems including the Thar Desert The book provides a crystal clear proof of the constantly changing behavioural ecology of animals in the Thar Desert which has been under an ever increasing impact of among several imminent factors the Indira Gandhi Nahar Pariyojana IGNP one of the worlds largest irrigation systems of its type in a xeric environment The change is discernible not only in structure and distribution of animals but in their resting feeding breeding and as evident in case of parasites the extent of parasitism as well as pathogenecity Finally this book offers the first well documented evidence of immense behavioral transformation in various different animal groups in the Tharp Desert a phenomenon of enormous significance for both conservation management and diversity inventorization activities of its faunal wealth **Biodiversity of Ranthambhore Tiger Reserve Rajasthan** V. Singh, A.K. Shrivastava, 2007-05-01 The present book on the Biodiversity of Ranthambhore Tiger Reserve deals with 539 species of higher plants and 361 species of animals vertebrates Besides geographical position and topography the abiotic components viz geology soils water climatic conditions etc which determine the composition of biota in an ecosystem have been discussed in details Correct and valid names have been adopted for the floral and faunal elements along with local and English names The keys have been provided for plant species from infra specific to family level for easy identification The short diagnostic description phenology ecology and distributional aspects have been provided under each plant species Besides statistical analysis of floral composition the phytogeographical and biological spectra have also been worked out to determine the routes of migration and phytoclimate respectively Bioperspective value of the Reserve has been assessed to determine the economic potentiality and sustainable utilization of bioresources The faunal diversity includes vertebrate fauna only arranged in a classified manner The shelter and feeding habits along with dependency of fauna on vegetation have been provided to determine plant animal relationship and flow of energy Details about endemic and threatened species of plants and animals along with causes of threats have been given for proper management of the Reserve About 107 colour photographs of habitat and plants and animals with 36 illustrations of plant species have been provided Several maps pie charts graphs figures etc along with data tables are appended to illustrate the findings It is hoped that the book will prove a milestone in the management of the Reserve **Faunal Ecology and**

Conservation of the Great Indian Desert C. Sivaperuman, Qaiser H. Baqri, G. Ramaswamy, M. Naseema, 2008-11-01 The Great Indian Desert is characterized by harsh climatic conditions and different habitats from grassland to abandoned human habitations This book examines the regional climate and microclimatic regime of this desert and its diverse faunal inhabitants

Entomology in the Doon Valley (Garhwal Himalaya) A Stronghold for Insect Research B.K. Tyagi, Vijay Veer, 2016-08-01 Entomology in the Doon Valley Garhwal Region is a unique journey into annals of the country's most fascinating and highly entomofauna rich habitat the Dehra Dun or the Doon Valley tucked in the cosy climate of the foothills of the lower Himalayan region Notwithstanding an unprecedented quantum of fragmented information available on the insects of the Doon Valley courtesy various different long term research programmes carried out at the three major research institutions viz the Forest Research Institute Colleges the Zoological Survey of India and The Dayanand Anglo Vedic PG College all located in Dehra Dun yet no single entomological treatise detailing all the insect orders supported by relevant local references was ever offered to have a firsthand knowledge on the Doon Valley's buoyant research tradition For the first time therefore the present treatment comes forward to satiate a nature lover's desire to know completely about their own insect fauna Besides offering an uncanny history of research along with a string of researchers and institutions engaged in entomological research in the Doon Valley the book describes entomologic characteristics of all the 32 Orders of Class Insecta with emphasis on research contributions on the local and endemic fauna To facilitate our understanding the book offers as an example inventories of the extant taxa of a couple of orders and still more importantly bio bibliographies of a few Doon Valley entomologists as inspirational life stories for the beginners The Book written in a lucid language will surely serve a good purpose for both the undergraduates postgraduates and research scholars engaged in insect research on one hand and the professional entomologists not only from the Grahwal region but also across the country and beyond on the other

Thar Desert in Retrospect and Prospect R.P. Dhir, D.C. Joshi, S. Kathju, 2018-01-01 Thar Desert in India is one of the most well investigated and densely populated regions amongst the world arid zones A blend of crop and animal husbandries conservative land use practices coping mechanisms to minimize adverse effect of drought and a frugal lifestyle have been the characteristic features of its dwellers Recent increase in biotic pressure has interacted with the fragile environment to create fearsome environmental problems Governmental responses were prompt in form creating a strong research infrastructure for multi disciplinary and multi location research and demonstration on the one hand and in huge investment in irrigation from internally and externally sourced water desertification control program and an accelerated socio economic and infrastructure development softening content of drought and strengthening of livelihoods on the other Unlike several publications on the Thar the current effort attempts a comprehensive pragmatic and off beat analysis of various developments and goes further to show how the situation today is a blend of both resource degradation and economic development Recent studies have helped rebuild the past climate history that shows that the climate has been fluctuating

during the geological history but reports suggest also that current anthropogenic global warming makes the desert more vulnerable in near future An attempt has been made also to peep into the future of the Thar *Environment : Issues And Concerns* Ghosh,2007 In Indian context Encyclopedia of Deserts Michael A. Mares,2017-01-19 Encyclopedia of Deserts represents a milestone it is the first comprehensive reference to the first comprehensive reference to deserts and semideserts of the world Approximately seven hundred entries treat subjects ranging from desert survival to the way deserts are formed Topics include biology birds mammals reptiles amphibians fishes invertebrates plants bacteria physiology evolution geography climatology geology hydrology anthropology and history The thirty seven contributors including volume editor Michael A Mares have had extensive careers in deserts research encompassing all of the world s arid and semiarid regions The Encyclopedia opens with a subject list by topic an organizational guide that helps the reader grasp interrelationships and complexities in desert systems Each entry concludes with cross references to other entries in the volume inviting the reader to embark on a personal expedition into fascinating previously unknown terrain In addition a list of important readings facilitates in depth study of each topic An exhaustive index permits quick access to places topics and taxonomic listings of all plants and animals discussed More than one hundred photographs drawings and maps enhance our appreciation of the remarkable life landforms history and challenges of the world s arid land **Faunal Heritage of Rajasthan, India** B.K. Sharma,Seema Kulshreshtha,Asad R Rahmani,2013-10-14 This is the first ever monumental and scientific documentation of the faunal wealth of the Indian Desert state of Rajasthan This volume the second of two provides a comprehensive picture of the conservation efforts undertaken to prevent further degradation of the condition of Rajasthan s faunal wealth A scholarly contribution to the field of knowledge it provides novel and vital information on wildlife preservation initiatives in India s largest state Broadly falling under the Indo Malaya Ecozone the three major biomes of Rajasthan include deserts and xeric shrublands tropical and subtropical dry broadleaf forests and tropical and subtropical moist broadleaf forests The corresponding ecoregions to the above biomes are respectively the Thar Desert and northwestern thorn scrub forests the Khathiar Gir dry deciduous forests and the Upper Gangetic Plains moist deciduous forests Contrary to popular belief the well known Thar or Great Indian Desert occupies only a part of the state Rajasthan is diagonally divided by the Aravalli mountain ranges into arid and semi arid regions The latter have a spectacular variety of highly diversified and unique yet fragile ecosystems comprising lush green fields marshes grasslands rocky patches and hilly terrains dense forests the southern plateau fresh water wetlands and salt lakes Apart from the floral richness there is faunal abundance from fishes to mammals In this volume the various flagship and threatened species are described in the 20 chapters penned by top notch wildlife experts and academics The world famous heronry tiger reserves wildlife sanctuaries and some threat ridden biodiversity rich areas shall certainly draw the attention of readers from around the world *Ecology of Small Mammals of Desert & Montane Ecosystems* I. Prakash,Pratap Singh,2005-06-01 Small mammals Rodents and Insectivores constitute 31

18% of total mammal species found in India In spite of their abundance this largest group among mammals has received little attention of ecologists From the geomorphological standpoint Rajasthan offers multiple possibilities The Aravallis diagonally bisect the state into western arid and eastern semi arid and mesic zones The southern and southeastern parts of state have various rock systems Present book is an endeavour to cover small mammals of the whole state The book is first of its kind in India which takes into account habitat preference food and feeding behaviour home range activity pattern reproductive behaviour biochemical communication and physiology of small mammals of desert and hilly terrain It also includes zoogeography of small mammals found in Rajasthan and changes in faunistic composition being brought by canal and tube well irrigation It is expected that book will be quite useful for students researchers and teachers of Ecology and Zoology

Biodiversity of the Himalaya: Jammu and Kashmir State Ghulam Hassan Dar, Anzar A. Khuroo, 2020-02-26 The Himalaya a global biodiversity hotspot sustains about one fifth of the humankind Nestled within the north western mountain ranges of the Himalaya the Jammu and Kashmir J K State harbours more than half of the biodiversity found in the Indian Himalaya The wide expanse of State spread across the subtropical Jammu through the temperate Kashmir valley to the cold arid Ladakh is typical representative of the extensive elevational and topographical diversity encountered in the entire Himalaya This book the most comprehensive and updated synthesis ever made available on biodiversity of the J K State is a valuable addition to the biodiversity literature with global and regional relevance The book arranged into 7 parts comprises of 42 chapters contributed by 87 researchers each of whom is an expert in his her own field of research The precious baseline data contained in the book would form the foundation for assessing current status of knowledge about the bioresources identify the knowledge gaps and help prioritization of conservation strategies to steer the sustainable use of biodiversity in this Himalayan region Given the breadth of topics covered under the banner of biodiversity in this book it can surely serve as a model for documentation of biodiversity in other regions of the world The book will be of immense value to all those who directly or indirectly have to deal with biodiversity including students teachers researchers naturalists environmentalists resource managers planners government agencies NGOs and the general public at large Aquatic Ecosystem: Biodiversity, Ecology and Conservation Mamta Rawat, Sumit Dookia, Chandrakasan Sivaperuman, 2015-01-28 This book brings together the latest information on the rapid advances and developments in the field of aquatic ecology India is very rich in terms of biological diversity due to its wide range of habitats and climatic conditions It is home to as much as 7 per cent of the world s animal species although it only accounts for about 2 per cent of the total landmass The present work on biodiversity ecology and conservation of aquatic resources represents original research in the field of aquatic biodiversity wetland ecology and its applications with reference to the country s aquatic resources There are 19 chapters each contributed by an expert in his her particular field and offering novel approaches to various topics in the area of aquatic ecosystems *Desert Malaria* B.K. Tyagi, 2023-02-17 This book comprehensively reviews the disease dynamics distribution surveillance epidemiology diagnosis

control strategies and management of the desert malaria It highlights the potential risks of unstable but often exacerbated malaria conflagration as epidemics in the middle of duned desert a desert oasis and desert fringe regions Further it reveals the factors inveigled into desert environments due to extensive anthropogenic activities such as canalized irrigation projects high yielding new agriculture practices human concentration and increased trade It addresses the impact of irrigation on the malarial dynamics and its coupling to the climate forcing The book also offers a model for desert transformation into malaria heaven under the changed climatic conditions including high rainfall humidity and depletion in temperature Lastly it offers insight into malaria epidemiology and disease control in the desert s arid environments This book is an essential resource for medical entomologists parasitologists epidemiologists and public health researchers Basic Research and Applications of Mycorrhizae: Volume I Gopi K. Podila, 2007 Mycorrhizal research has grown by leaps and bounds in the past few decades These fungi promise to promote plant growth maintain plant and soil health assist in bio protection against root diseases encourage production with reduced fertilizer and pesticides allow for nutrient acquisition affect soil skeletal structure holding primary soil particles together are conducive to the formation of microaggregate structures and higher rhizosphere populations enable symbiosis that alters host water relations as well as alter root length and architecture These fungi also help with the re vegetation of landscapes golf courses or contaminated soils They assist with the biological hardening of tissue culture raised plants postpone leaf dehydration draught responses osmo protecting enzymes and enhance P acquisition AM symbiosis could conceivably affect any of these steps AMF should be considered as an alternative to costly soil disinfection The mechanisms by which fungi induce resistance in their hosts and enhance disease resistance need critical evaluation and examination Editors see this volume as a tremendously valuable collection of specialized up date chapters describing the most sophisticated and modern protocols in mycorrhizal research thoroughly explained and synthesized
