## **Fausts Gold Inside The East German Doping Machine:**

*Faust's Gold* Steven Ungerleider, 2015-03-10 Steven Ungerleider's *Faust's Gold* is the stunning expose of the East German sports juggernaut of the 1970s and 1980s that forced young athletes to unknowingly take steroids. For nearly twenty five years East Germany's corrupt sports organization dominated international athletics. While the German Democratic Republic's secret State Plan was in effect more than ten thousand unsuspecting young athletes some as young as twelve years old were given massive doses of performance enhancing anabolic steroids. These athletes achieved miraculous success in international competitions including the Olympics but for many of them their physical and emotional health was permanently damaged. *Faust's Gold* draws on the revelations of the ongoing trials of former GDR coaches, doctors and sports officials who have now confessed to conducting ruthless medical experiments on young and talented athletes selected for Olympic training camps. It also draws on the extensive research of Brigitte Berendonk who escaped from East Germany to begin a decade long crusade to bring justice to her fellow athletes and that of her husband Professor Werner Franke. Berendonk's story and those of her colleagues in the GDR offers a unique insight into a bizarre regime. *Faust's Gold* is a true life detective story that plunges into the dark secretive world of the GDR doping scam where elite competitors and their families are up against a formidable opponent the East German secret police known as the STASI. What emerges is a complex tapestry of the politicized modern Olympics that culminates in a powerful testimony to the massive wrong done by one Eastern Bloc nation to its world class athletes.

Spitting in the Soup Mark Johnson, 2016-07-01 Doping is as old as organized sports. From baseball to horse racing, cycling to track and field, drugs have been used to enhance performance for 150 years. For much of that time doping to do better was expected. It was doping to throw a game that stirred outrage. Today though athletes are vilified for using performance enhancing drugs. Damned as moral deviants who shred the fair play fabric, dopers are an affront to the athletes who don't take shortcuts. But this tidy view swindles sports fans. While we may want the world sorted into villains and victims, putting the blame on athletes alone ignores decades of history in which teams, coaches, governments, the media, scientists, sponsors, sports federations and even spectators have played a role. The truth about doping in sports is messy and shocking because it holds a mirror to our own reluctance to spit in the soup, that is to tell the truth about the spectacle we crave. In *Spitting in the Soup*, sports journalist Mark Johnson explores how the deals made behind closed doors keep drugs in sports. Johnson unwinds the doping culture from the early days when pills meant progress and uncovers the complex relationships that underlie elite sports culture, the essence of which is not to play fair but to push the boundaries of human performance. It's easy to assume that drugs in sports have always been frowned upon but that's not true. Drugs in sports are old. It's banning drugs in sports that is new. *Spitting in the Soup* offers a bitingly honest, clear-eyed look at why that's so and what it will take to kick pills out of the locker room once and for all.

with a new afterword about early specialization in youth sports from the author of *Range Why Generalists Triumph in a Specialized World* The debate is as old as physical competition Are stars like Usain Bolt Michael Phelps and Serena Williams genetic freaks put on Earth to dominate their respective sports Or are they simply normal people who overcame their biological limits through sheer force of will and obsessive training In this controversial and engaging exploration of athletic success and the so called 10 000 hour rule David Epstein tackles the great nature vs nurture debate and traces how far science has come in solving it Through on the ground reporting from below the equator and above the Arctic Circle revealing conversations with leading scientists and Olympic champions and interviews with athletes who have rare genetic mutations or physical traits Epstein forces us to rethink the very nature of athleticism

[Drug Games](#) Thomas M. Hunt, 2011-01-15 On August 26 1960 twenty three year old Danish cyclist Knud Jensen competing in that year's Rome Olympic Games suddenly fell from his bike and fractured his skull His death hours later led to rumors that performance enhancing drugs were in his system Though certainly not the first instance of doping in the Olympic Games Jensen's death serves as the starting point for Thomas M Hunt's thoroughly researched chronological history of the modern relationship of doping to the Olympics Utilizing concepts derived from international relations theory diplomatic history and administrative law this work connects the issue to global political relations During the Cold War national governments had little reason to support effective anti doping controls in the Olympics Both the United States and the Soviet Union conceptualized power in sport as a means of impressing both friends and rivals abroad The resulting medals race motivated nations on both sides of the Iron Curtain to allow drug regulatory powers to remain with private sport authorities Given the costs involved in testing and the repercussions of drug scandals these authorities tried to avoid the issue whenever possible But toward the end of the Cold War governments became more involved in the issue of testing Having historically been a combined scientific ethical and political dilemma obstacles to the elimination of doping in the Olympics are becoming less restrained by political inertia

**A History of Drug Use in**

**Sport: 1876 - 1976** Paul Dimeo,2008-03-10 This book offers a new history of drug use in sport It argues that the idea of taking drugs to enhance performance has not always been the crisis or evil we now think it is Instead the late nineteenth century was a time of some experimentation and innovation largely unhindered by talk of cheating or health risks By the interwar period experiments had been modernised in the new laboratories of exercise physiologists Still there was very little sense that this was contrary to the ethics or spirit of sport Sports drugs and science were closely linked for over half a century The Second World War provided the impetus for both increased use of drugs and the emergence of an anti doping response By the end of the 1950s a new framework of ethics was being imposed on the drugs question that constructed doping in highly emotive terms as an evil Alongside this emerged the science and procedural bureaucracy of testing The years up to 1976 laid the foundations for four decades of anti doping This book offers a detailed and critical understanding of who was involved what they were trying to achieve why they set about this task and the context in which they worked By doing so it reconsiders the classic dichotomy of good anti doping up against evil doping Winner of the 2007 Lord Aberdare Literary Prize for the best book in British sports history

*Dope* Daniel M. Rosen, 2008-06-30 Since the dawn of athletic competition during the original Olympic Games in Ancient Greece athletes as well as their coaches and trainers have been finding innovative ways to gain an edge on their competition Some of those performance enhancement methods have been within the accepted rules while other methods skirt the gray area between being within the rules and not while still other methods break the established rules In modern times doping the use of performance enhancing drugs has been one method athletes and their trainers have used to beat their competition The history of sports doping during the modern era can be traced through the events and scandals of the times in which the athletes lived From the use of amphetamines and other stimulants in the early 20th century to the use of testosterone and steroids by both the USSR and the United States during Cold War era Olympics games to blood doping and EPO to designer drugs the history of doping in sports closely follows the medical and technological advances of our times In the early 21st century the possibility of genetically engineered athletes looms The story of doping in sports over the last century offers clues to where the battle over performance enhancement will be fought in the years to come
