**Sources and Style in Moore's Irish Melodies** Una Hunt, 2017-03-16 Once regarded as Ireland's national bard Thomas Moore's reputation rests on the ten immensely popular collections of drawing room songs known as the Irish Melodies At home and abroad these 124 songs created a realm of influence that continued to define Irish culture throughout the nineteenth century and into the twentieth In this book Una Hunt provides the first detailed assessment from a combined musical and literary standpoint contextualizing the songs through an examination of their sources and style Further attention is given to the collaborative work of composers Sir John Stevenson and Henry Rowley Bishop and the study is completed by a reappraisal of the musical sources      *"The" Illustrated London News*, 1860      *An Introduction to the Study of National Music; comprising researches into popular songs, traditions and customs* Carl ENGEL (Musician.), 1866      **Grove's Dictionary of Music and Musicians** J. Catalogue of an Extensive Selection of Books in Various Classes of Literature, from the Stock of William Paterson, ..., 1881      **Sources of Irish Traditional Music c. 1600-1855** Aloys Fleischman, 2016-12-05 First Published in 1998 Irish traditional music is one of the richest treasures of folk music in the world Being an oral tradition much of it has already been lost and what has been recorded is only partially available in isolated collections Until now no composite picture has yet been presented showing its remarkable range and diversity over four centuries This volume covers Irish materials in general collections up to 1800 and in Irish collections up to and including Petrie's Ancient Music of Ireland 1855 The purposes of the

project are to identify Irish dance tunes and songs to present the scholar with a mass of material showing the evolution of the Irish vocal and instrumental folk style period by period from the earliest recorded tune up to the middle of the last century to put into circulation many of the splendid airs which were lost but have now been located Some 6 000 songs and dance tunes are presented also including Scottish and English tunes Included are Scottish tunes that were used by 18th century Irish poets for their verses and both English and Scottish tunes that are still current among Irish traditional musicians Tunes of present day currency which do not seem to be included may still be located by comparing their first 12 notes in the thematic index at the end of the volume To make the vast array of material readily available an index allows readers to locate a tune by its melodic incipit by any of its titles or by the first line of its text Unfortunately the vast majority of Irish songs noted up to the end of the last century lack texts since the collectors were ignorant of the Irish language But almost every other facet is covered provenance tonality structure and variants      The rising of the moon, and other ballads John Keegan Casey, 1895
