Fds Outils Pratiques Dinterpretation Fiche De Donnee De Securite:

FDS François Burgher, Laurence Mathieu, Joël Blomet, 2004-11-18 Le risque chimique est omniprésent dans le monde moderne. S'il est parfois très largement médiatisé, il est encore souvent trop surnois et insuffisamment compris même par les chimistes et a fortiori par les utilisateurs de produits leur poste de travail. L'actualité des réglementations internationales et européennes est très riche. Document unique, ce texte sur les cancérogènes, les mutagènes et les toxiques pour la reproduction (CMR) remise jour très profonde du code du travail en sont des exemples. Ces textes visent l'évaluation du risque chimique et imposent des démarches de plus en plus draconiennes pour en assurer une maîtrise toujours plus efficace. La fiche de données de sécurité (FDS) est, avec l'étiquetage des produits, l'une des premières et le plus souvent la principale source de connaissance du danger chimique en milieu de travail. Si sa manipulation est très courante, l'expérience prouve que son interprétation reste souvent trop superficielle. Malgré d'éventuelles imperfections, apprendre à lire entre les lignes l'ensemble des 16 rubriques normatives peut pourtant clarifier la prévention au poste de travail d'une manière précise et minemment pratique. Mais pour cela, une approche analytique est nécessaire afin d'interpréter le sens technique profond des données détaillées par le rédacteur de la fiche. La responsabilité de ce rédacteur est également importante et intéressante à étudier pour comprendre le cadre réglementaire des obligations et les limites des FDS. Enfin, les auteurs, acteurs et conseillers de terrain ont pensé qu'il serait enrichissant de partager leurs très nombreux retours d'expérience au sein de diverses entreprises utilisatrices de FDS. Globalement, dans le cadre d'une fructueuse pluridisciplinarité, tous les acteurs de prévention pourront grâce à cette approche didactique puiser de précieux éléments pour poursuivre et intensifier leur politique d'intégration de la sécurité et de la santé au travail. Sans oublier la dimension environnementale dont la prise en compte est un devoir pour tous et pour chacun.
