# FEAR, WAR, AND THE BOMB

"P. M. S. Blackett's sober analysis of the most terrifying problem of our time has made any evaluation of the military and political consequences of atomic energy that has thus far appeared . . . a notable achievement. It sets itself courageously against blindness and prejudice. It demolishes myths and with inexorable logic demonstrates the futility of our wild fears. It contains a mastery of facts with an exceptional ability to organize and present them. Anyone who has tried to bring the innumerable elements of the problem into proper order will appreciate Blackett's accomplishment."

—James R. Newman, former counsel,  
U. S. Senate Committee on Atomic  
Energy, and co-author of *THE CON-  
TROL OF ATOMIC ENERGY*, New  
Republic.

"Brave, heavy and unflinching orthodoxy—keen insight, originality and willingness to question the accepted axioms of our time . . . a brilliant analysis of the problem posed by the great discovery of our time . . . the work may well become a milestone in post-Hiroshima thinking—if only because it strips off so much of the mumbo-jumbo and reveals the problem of atomic energy in its true relation to the current death struggle of anarchic nationalism."

—James P. Warburg, former Deputy  
Director, U. S. Office of War Infor-  
mation.

"Atomic energy, bogged by disarmament discussions, has produced many prophets of war. All honour is due, therefore, to Professor P. M. S. Blackett, eminent Manchester University physicist, for the challenge he issues to the disarmers."

—Manchester Evening News.

"This book is essentially an appeal to reason and is probably the most important recent contribution to the most pressing problem of our time."

—W. F. Vann, Member of Parliament.

## **Fear War The Bomb:**

Fear, War and the Bomb Patrick Maynard Stuart Blackett (Baron Blackett), 1949      *Hiroshima in History* Robert James Maddox, 2007 When President Harry Truman authorized the use of atomic weapons against Japan he did so to end a bloody war that would have been bloodier still had the planned invasion of Japan proved necessary Revisionists claim that Truman's real interest was a power play with the Soviet Union and that the Japanese would have surrendered even earlier had the retention of their imperial system been assured Truman wanted the war to continue they insist in order to show off America's powerful new weapon This anthology exposes revisionist fallacies about Truman's motives the cost of an invasion and the question of Japan's surrender Essays by prominent military and diplomatic historians reveal the hollowness of revisionist claims exposing the degree to which these agenda driven scholars have manipulated the historical record to support their contentions They show that although some Japanese businessmen and minor officials indicated a willingness to negotiate peace no one in a governmental decision making capacity even suggested surrender And although casualty estimates for an invasion vary considerably the more authoritative approximations point to the very bloodbath that Truman sought to avoid Volume editor Robert Maddox first examines the writings of revisionist Gar Alperovitz to expose the unscholarly methods Alperovitz employed to support his claims then distinguished Japanese historian Sadao Asada reveals how difficult it was for his country's peace faction to prevail even after the bombs had been dropped Other contributors point to continuing Japanese military buildups analyze the revisionists low casualty estimates for an invasion reveal manipulations of the Strategic Bombing Survey of 1946 and show how even the exhibit commemorating the fiftieth anniversary of the bombing at the Smithsonian National Air and Space Museum hewed to the revisionist line And a close reading of Tsuyoshi Hasegawa's acclaimed *Racing the Enemy* exposes many grave discrepancies between that recent revisionist text and its sources The use of atomic bombs against Japan remains one of the most controversial issues in American history Gathered in a single volume for the first time these insightful readings take a major step toward settling that controversy by showing how insubstantial Hiroshima revisionism really is and that sometimes history cannot proceed without decisive action however regrettable

**America in the 20th Century**, 2003      **The Most Controversial Decision** Wilson D. Miscamble, 2011-04-11 This book explores the American use of atomic bombs and the role these weapons played in the defeat of the Japanese Empire in World War II It focuses on President Harry S Truman's decision making regarding this most controversial of all his decisions The book relies on notable archival research and the best and most recent scholarship on the subject to fashion an incisive overview that is fair and forceful in its judgments This study addresses a subject that has been much debated among historians and it confronts head on the highly disputed claim that the Truman administration practised atomic diplomacy The book goes beyond its central historical analysis to ask whether it was morally right for the United States to use these terrible weapons against Hiroshima and Nagasaki It also provides a balanced evaluation of the relationship between atomic weapons

and the origins of the Cold War      *Suffering Made Real* M. Susan Lindee, 2008-10-10 The atomic bombs dropped on Hiroshima and Nagasaki in August of 1945 unleashed a force as mysterious as it was deadly radioactivity In 1946 the United States government created the Atomic Bomb Casualty Commission ABCC to serve as a permanent agency in Japan with the official mission of studying the medical effects of radiation on the survivors The next ten years saw the ABCC s most intensive research on the genetic effects of radiation and up until 1974 the ABCC scientists published papers on the effects of radiation on aging life span fertility and disease *Suffering Made Real* is the first comprehensive history of the ABCC s research on how radiation affected the survivors of the atomic bomb Arguing that Cold War politics and cultural values fundamentally shaped the work of the ABCC M Susan Lindee tells the compelling story of a project that raised disturbing questions about the ethical implications of using human subjects in scientific research How did the politics of the emerging Cold War affect the scientists biomedical research and findings How did the ABCC document and publicly present the effects of radiation Why did the ABCC refuse to provide medical treatment to the survivors Through a detailed examination of ABCC policies archival materials the minutes of committee meetings newspaper accounts and interviews with ABCC scientists Lindee explores how political and cultural interests were reflected in the day to day operations of this controversial research program Set against a period of conflicting views of nuclear weapons and nuclear power *Suffering Made Real* follows the course of a politically charged research program and reveals in detail how politics and cultural values can shape the conduct results and uses of science      **Bulletin of the Atomic Scientists** ,1985-08      Origins of the Cold War David S.
