**The Oxford Handbook of Food History** Jeffrey M. Pilcher, 2012-10-16 Food matters not only as a subject of study in its own right but also as a medium for conveying critical messages about capitalism the environment and social inequality to diverse audiences Recent scholarship on the subject draws from both a pathbreaking body of secondary literature and an inexhaustible wealth of primary sources from ancient Chinese philosophical tracts to McDonald s menus contributing new perspectives to the historical study of food culture and society and challenging the limits of history itself The Oxford Handbook of Food History places existing works in historiographical context crossing disciplinary chronological and geographic boundaries while also suggesting new routes for future research The twenty seven essays in this book are organized into five sections historiography disciplinary approaches production circulation and consumption of food The first two sections examine the foundations of food history not only in relation to key developments in the discipline of history itself such as the French Annales school and the cultural turn but also in anthropology sociology geography pedagogy and the emerging Critical Nutrition Studies The following three sections sketch various trajectories of food as it travels from farm to table factory to eatery nature to society Each section balances material cultural and intellectual concerns whether juxtaposing questions of agriculture and the environment with the notion of cookbooks as historical documents early human migrations with modern culinary tourism or religious customs with social activism In its vast interdisciplinary scope this handbook brings students and scholars an authoritative guide to a field with

**The Biology of Religious Behavior** Jay R. Feierman, 2009-06-08 Offers a fresh and detailed take on the evolution of religious behavior from a biobehavioral perspective promoting a new understanding that may help build bridges across the religious divide There has been much recent interest in the study of religion from the perspective of Darwinian evolution The Biology of Religious Behavior The Evolutionary

Origins of Faith and Religion offers a broad overview of the topic written by internationally recognized experts In addition to its primary focus on religious behavior the book addresses other important aspects of religion such as values beliefs and emotions as they affect behavior The contributors approach the evolution of religion by examining the behavior of individuals in their everyday lives After describing various religious behaviors the contributors consider the behaviors with reference to their evolutionary history development during the lifetime of the individual proximate causes and adaptive value Happily this foray into understanding religion from a biobehavioral perspective demonstrates that at the biological and behavioral levels what unites the different religions of the world is far greater than what divides them *Rival Praises* Celia Campbell,2024

The *Metamorphoses* written by the Roman poet Ovid has fascinated readers ever since it was written in the first century CE and here Celia M Campbell offers a bold new interpretive approach Reasserting the significance of the ancient hymnic tradition she argues that the first pentad of Ovid's *Metamorphoses* draws a programmatic strain of influence from hymns to the gods in particular conversation and competition with the work of the Alexandrian poet Callimachus a favored source of inspiration to Augustan writers She suggests that Ovid read Callimachus six hymns as a self conscious set and reading the first five books of the *Metamorphoses* through Callimachus hymnic collection allows us to pierce the occasionally opaque and seemingly idiosyncratic mythology Ovid constructs Through careful innovative close readings Campbell illustrates that Callimachus and the hymnic tradition provide a kind of interpretative key to unlocking the dynamic landscape of divine power in Ovid's poetic cosmos

**The Neolithic of the Irish Sea** Chris Fowler,2015-03-31 This collection of 24 papers aims to reconsider the nature and significance of the Irish Sea as an area of cultural interaction during the Neolithic period The traditional character of work across this region has emphasised the existence of prehistoric contact with sea routes criss crossing between Ireland the Isle of Man Anglesey and the British mainland A parallel course of investigation however has demonstrated that the British and Irish Neolithics were in many ways different with distinct indigenous patterns of activity and social practices The recent emphasis on regional studies has further produced evidence for parallel yet different processes of cultural change taking place throughout the British Isles as a whole This volume brings together some of these regional perspectives and compares them across the Irish Sea area The authors consider new ways to explain regional

patterning in the use of material objects and relate them to past practices and social strategies Were there practices that were shared across the Irish Sea area linking different styles of monuments and material culture or were the media intrinsic to the message The volume is based on papers presented at a conference held at the University of Manchester in 2002

**Odysseys of Plates and Palates: Food, Society and Sociality** Simeon S. Magliveras,2019-01-04 This volume was first published by Inter Disciplinary Press in 2014 Is food merely fuel to keep us alive Consuming food is not simply about biological and nutritional needs Rather food like anything people engage with is inherently multi faceted The context of food and its discourses involve an interplay of our cognition and is a medium for our memory and identity Food from its mundane modes of production to the consumption of a single meal or even to the global networks which bring foods from distant lands to one s plate reflects and creates hegemonic relations between groups and individuals defining good and bad behaviour Food has been discussed since ancient times appearing in numerous ancient texts It has both been described as art and is the subject of art Food then is an expression of how we understand our world and humanity s place in it **The Homeric Hymns** Andrew Faulkner,2011-06-30 This is the first collection of scholarly essays on the Homeric Hymns a corpus of 33 hexameter poems celebrating gods that were probably recited at religious festivals among other possible performance venues and were frequently attributed in antiquity to Homer After a general introduction to modern scholarship on the Homeric Hymns the essays of the first part of the book examine in detail aspects of the longer narrative poems in the collection while those of the second part give critical attention to the shorter poems and to the collection as a whole The contributors to the volume present a wide range of stimulating views on the study of the Homeric Hymns which have attracted much interest in recent years *Feasts, Fasts and Famine* Patricia Caplan,1992 Encyclopedia of Medical Anthropology Carol R. Ember,Melvin Ember,2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world s cultures and to provide an overview of important topics in medical anthropology No other single reference work comes close to marching the depth and breadth of information on the varying cultural background of health and illness around the world More than 100 experts anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world **Australian Folklore** ,1999
