February Dragon:

February Dragon Colin Thiele, 2007 The lives of three Australian children are cruelly affected when a bushfire known as the February Dragon sweeps across the countryside *Blackwood's Edinburgh Magazine - Volume 53, No. 328, February, 1843* Various, 2021-01-18 **People Born In February** Andrey Davydov, Olga Skorbatyuk, Kate Bazilevsky, 2017-05-27 ANTI HOROSCOPE HUMAN SOFTWARE Series of 12 books Did you know that people born on February 17 of leap years or February 18 of common years not only consider themselves guardians of the very principles of existence the concentration of all processes without which nothing in the world can exist but are also obsessed with the golden calf Did you know that money for them is everything their life their passion the basis of their existence Did you know that those people who were born on February 6th of leap years or on February 7th of common years are not at all capable of going through life alone they necessarily need a partner or partners At the same time they will remain in contact with any person only until they learn and know how to do everything that that person knows and then they quickly lose interest Hence the question are you sure that you know people whom you think you know as your own self Yes of course you know them if we take word play into account You really do know them like you know yourself that is just as bad You know your own and other people's masks and roles but that is all You do not believe this Then open this book and see for yourself This book is for those people who are fed up with horoscopism who are tired of listening to nonsense about themselves and other people from psychologists or their all knowing relatives friends and acquaintances It will help you save not just some time in your life but your whole life because otherwise you will spend your entire life on something that is a priori impossible And it is impossible not because you are idiots but because Homo sapiens cannot fully know themselves and other people without an external and most importantly objective source Perhaps that is the reason why humanity was left factory instructions to each one of us the Catalog of Human Population Yes that is right There exists the Catalog of Human Population which you can open and find out everything about any person you are interested in including yourself Information about people presented in this book and in other eleven books in the series titled Anti Horoscope Human Software is from there and not from your favorite horoscope

Law, Climate Emergency and the Australian Megafires Nicole Rogers, 2021-09-09 This book addresses the ways in which the Black Summer megafires influenced the development of climate narratives throughout 2020 It analyses the global pandemic and its ensuing restrictions as a countervailing force in the production of such narratives Lives and properties were lost in the spring and summer of 2019 and 2020 when catastrophic bushfires burnt through millions of hectares of mainland Australia Nearly 3 billion native animals died And for millions of Australians and others worldwide it was through the Australian megafires that the global climate emergency became tangible and concrete no longer a comfortably deferred albeit problematic abstraction which could be consigned to future generations to deal with This book explores the legal and other implications of new understandings of climate emergency arising from the fires and the emergence of a hierarchy of

emergencies as the pandemic came to dominate global and domestic political discourses It examines narratives of culpability and legal avenues for seeking retribution from government and big fossil fuel emitters It also considers the impact of the fires on the burgeoning phenomenon of climate activism particularly in Australia and the ways in which pandemic restrictions curtailed such activism Finally the book reflects on the fires through the lenses offered by climate fiction and apocalyptic fiction more generally in order to consider how these shape and might shape our responses to them This important and timely book will appeal to environmental lawyers and socio legal theorists as well as other scholars and activists with interests in climate change and its impact It is recommended for anyone concerned about current and future climate disasters and the shortcomings in legal political and popular responses to the climate crisis **Being All Equal**
