Fed The Markets And The Metamorphosis Of The Business Cycle A Christian Perspective:

The Fed, the Markets, and the Metamorphosis of the Business Cycle John E. Charalambakis, 2002-09 Economists legislators and people on the street agree that something is wrong with the economy They ask Why are stock markets floundering Why is unemployment rising Why have the economies of vigorous countries such as Japan and Argentina fallen on hard times and will America be next Dr John Charalambakis examines how we created this situation and he concludes that it is time to reassess our national priorities In light of Scripture he believes we need to concentrate on providing for our weakest citizens rather than enriching the strong Eden's Bridge David B. Doty, 2012-01-01 Eden's Bridge The Marketplace in Creation and Mission explores a biblically based theology of the marketplace implicit in the creation narrative of Genesis 1-2 The thesis validates the calling and ministry of all marketplace Christians David Doty invites readers to rethink and redirect the purposes of vocation trade and profit toward the purposes of God's Kingdom as they were revealed in the beginning and are to be restored in Christ's reign This book is eye opening and inviting as it explores how God is moving to reclaim the marketplace for His Kingdom and His redeeming purposes for the world of commerce The marketplace holds untold potential if business is conducted according to God's plan poverty can be eradicated abundant living can be shared among all people and shalom can prevail Eden's Bridge offers hope for recovering from the recent collapse of the global economic system by envisioning a new view of how wealth is made and how the marketplace is yet to serve God's purposes in His mission to the world **Christian Scholar's Review**, 2003 The Publishers Weekly, 2002 Forthcoming Books Rose Army, 2002 Economics for Prophets Walter L. Owensby, 1988 Owensby has written this book to help Christians take part more confidently and effectively in the dialogue on ethics and economics Economics for Prophets is an introduction to the subject it assumes no previous exposure to economics studies or jargon that takes a helpful three step approach It explains some of the basic concepts of our economic system explores how these concepts function in the real world and critiques both the concepts and their practical working out from a biblical theological ethical perspective Book jacket

The Church and the Market Thomas E. Woods Jr., 2015-01-15 The Church and the Market is a vigorous and lively defense of the market economy and a withering attack on all forms of state intervention It covers labor unions monopoly money and banking business cycles interest usury and much more Although it makes a particular point of noting the moral arguments of the market economy and that Catholics are of course perfectly at liberty to support it its audience is much broader than Catholics alone Readers of all religious traditions and none at all have praised The Church and the Market first place winner in the 2006 Templeton Enterprise Awards as one of the most compelling and persuasive defenses of capitalism against its critics ever written **Christian Theology and Market Economics** Ian Rainy Lance Harper, Samuel Gregg, 2008 This unique work has a historical time span reaching from Aristotle to the modern day thus appealing to those interested in the history of ideas and economic thought as well as the links between theological and economic thought

Christianity and the Culture of Economics Donald A. Hay, Alan Kreider, 2001 Does the market promote its own intrinsic and selfish values or does it merely reflect the values of society This question is becoming more important as current opposition to globalization and the unfettered operation of market forces demonstrates Instead of debating the issues in abstract terms this collection offers reports from all areas of the business and policy sectors Sharply contrasting accounts emerge from contributors who have been actively involved in business and finance in the United Kingdom while other authors discuss business models which have a very different set of values from those of most participants in commercial markets Alternative perspectives are provided by contributors responsible for the design and implementation of public policies with non market values and the collection concludes with reflections on the values implicit in modern economic analysis Although no simple answers to the question posed emerge Christianity and the Culture of Economics provides an informed debate on the key issues involved in the discussion of the supposedly conflicting relationship between the market and spiritual values

Business through the Eyes of Faith Richard C. Chewning, John W. Eby, Shirley J. Roels, 2024-06-11 Is capitalism Christian Is there a Christian perspective on business How should a Christian use power in the workplace In addressing such difficult questions as these Business Through the Eyes of Faith demonstrates how God can dwell at the center of one's life even in the secular marketplace Here is pragmatic affirmation of the role that committed Christians can play in the business world The authors stress the connections between Christian principles and good management and provide biblical passages that support their principles and relate them to the practical issues faced by Christian managers Issues such as employee motivation workplace communication business leadership the role of profit and social responsibility are all addressed in concrete terms and reinforced by short vignettes suggested biblical passages to explore and commentaries from contemporary theorists and practitioners Business Through the Eyes of Faith shows that business can and should be a reflection of God's kingdom It is an invaluable resource for Christian business students managers and those who wish to understand the concerns and motives of Christians in the business world

Economic Theory and Christian Belief Andrew J. Britton, Peter Humphrey Sedgwick, 2003 Any attempt to use the Bible as a basis for addressing contemporary economic issues needs to recognise the fundamental differences in underlying philosophy between economic theory and Christian belief Neo classical economic theory embodies a view of the world and of human nature derived from the Enlightenment of the eighteenth century which has become immensely influential in recent times Economic man is a rational independent being set in an environment of scarcity but able to improve his welfare by transactions in a market economy This anthropology is explained and examined systematically in this book following broadly the pattern of an economics textbook and drawing on some recent work in methodology In each chapter a second part presents a contrasting view of the same subject matter drawn from the Bible as interpreted by contemporary scholars This gives a radically different account of human life and well being centred on the community and its relationship with God in which prosperity abundance

and hope for the future are divine blessings and gifts Despite the wide gaps between economic theory and Christian belief some points of contact can be made and there are suggestions as to how a dialogue between them might be conducted

The Market as God Harvey Cox, 2017 The Market has deified itself according to Harvey Cox's brilliant exegesis And all of the world's problems widening inequality a rapidly warming planet the injustices of global poverty are consequently harder to solve Only by tracing how the Market reached its divine status can we hope to restore it to its proper place as servant of humanity The Market as God captures how our world has fallen in thrall to the business theology of supply and demand According to its acolytes the Market is omniscient omnipotent and omnipresent It knows the value of everything and determines the outcome of every transaction it can raise nations and ruin households and nothing escapes its reductionist commodification The Market comes complete with its own doctrines prophets and evangelical zeal to convert the world to its way of life Cox brings that theology out of the shadows demonstrating that the way the world economy operates is neither natural nor inevitable but shaped by a global system of values and symbols that can be best understood as a religion Drawing on biblical sources economists and financial experts prehistoric religions Greek mythology historical patterns and the work of natural and social scientists Cox points to many parallels between the development of Christianity and the Market economy At various times in history both have garnered enormous wealth and displayed pompous behavior Both have experienced the corruption of power However what the religious have learned over the millennia sometimes at great cost still eludes the Market faithful humility
