Statement of Disbursements of the House United States. Congress. House,1996 Covers receipts and expenditures of appropriations and other funds *American Book Publishing Record* ,2001 Legal Information Kent Olson,1998-11-19 Now at last there is a comprehensive and readable guide designed to help librarians scholars and the general public quickly find the legal information they need While most legal research books focus on the needs of beginning law students or litigants Legal Information takes a broader view of the law including its value in other disciplines It explains why legal information exists in certain formats and describes how to get the most out of the major legal reference tools It also suggests the best sources for different kinds of information and explains how these resources compare to other available materials *I'm Sorry for What I've Done* M. Catherine Gruber,2014-04-01 This book examines 52 apologetic allocutions

produced during federal sentencing hearings The practice of inviting defendants to make a statement in their own behalf is a long standing one and it is understood as offering defendants the opportunity to impress a judge or jury with their remorse which could be a factor in the sentence that is imposed Defendants raised the topics of the offense mitigation future behaviour and the sentence in different ways and this book explores the pros and cons associated with the different strategies that they used Because there is no way of ascertaining exactly how effective or ineffective an individual allocution is case law sociolinguistic and historical resources and judges final remarks are used to develop hypotheses about defendants communicative goals as well as what might constitute an ideal defendant stance from a judge s point of view The corpus is unique because unlike official transcripts the transcripts used for this study include paralinguistic features such as hesitations wavering voice and crying while talking Among its highlights the book proposes that although a ritualized apology formula e g I m sorry or I apologize would appear to be a good fit for the context of allocution and even appears to be expected the use of these formulas carries implications in this context that do not serve defendants communicative goals I argue that the application of Austin s 1962 performative constative continuum reveals that offense related utterances that fall closer to the constative end are more consistent with the discursive constraints on the speech event of allocution Further I propose that the ideologies associated with allocution in particular the belief that allocution functions as a protection for defendants obscures the ways in which the context constrains what defendants can say and how effectively they can say it
