**Ecology and Coal Resource Development** Mohan K. Wali, 1979      Ecology and Coal Resource Development Mohan K. Wali, 2013-09-17 Ecology and Coal Resource Development Volume One covers the proceedings of the International Congress for Energy and the Ecosystem held at the University of North Dakota Grand Forks North Dakota on June 12-16, 1978. The book focuses on the factors and considerations involved in the interrelation of ecology and coal resource development. The selection first tackles the U.S. coal development policy, coal's response to the challenge in the national energy plan, coal utilization and supply, and the role of the Office of Surface Mining on combining energy and the environment. The book then examines the assessment of the effects of alternative public policies on western coal development, open-pit coal mining and the environment in the United Kingdom, mining ecology and environmental problems of coal mining in Australia, and mining dewatering and environmental effects. The manuscript takes a look at combating pollution created by coal burning, generating plants in Yugoslavia, policy aspects of energy resource development on Indian lands, interactive computerized planning of surface coal mining operations, and simulation models for surface coal mine planning. The selection is a dependable reference material for scientists and researchers interested in the marriage of ecology and coal resource development.      *Ecology and coal resource development* International Congress for Energy and the Ecosystem, 1979      **Ecology and Coal Resource Development. Panel on the Trace Element Geochemistry of Coal Resource Development Related to Health, 1980      **China's Environmental Governing and Ecological Civilization** Jiahua Pan, 2015-11-30 This book looks into the increasing conflict between the demand of economic growth and the already fragile ecological system condition in China. The prolonged urbanization process has escalated the erosion of natural environments and is increasing energy consumption. China's role as a world power is also demanding more and more resource supply as well as energy consumption. This book argues that to correctly respond to these emerging issues, apart from upgrading industry and improving environmental protection techniques, China needs to establish an ecological civilization that provides an ideological basis for the construction of a green, low-carbon model of economic growth.      *Ecology and coal resources development*,      **Advances in Energy, Environment and Chemical Engineering Volume 1** Ahmad Zuhairi Abdullah, Azlin Fazlina Osman, 2022-12-21 *Advances in Energy Environment and Chemical Engineering* collects papers resulting from the conference on Energy Environment and Chemical Engineering AEECE 2022 Dali China 24-26 June 2022.
