Lee,2012-05-21 In his pathbreaking article History and the Social Sciences The Longue Dur e Fernand Braudel raised a call for the social sciences to overcome their disciplinary isolation from one another Commemorating the fiftieth anniversary of the article s publication the contributors to this volume do not just acknowledge their debt to the past they also bear witness to how the crisis Braudel recognized a half century ago is no less of a crisis today The contributions included here from scholars in history sociology and geography reflect the spirit and practice of the intellectual agenda espoused by Braudel coming together around the concept of the longue dur e Indeed they are evidence of how the groundbreaking research originally championed by Braudel has been carried forward in world systems analysis for a more socially relevant understanding of the planet and its future possibilities The book concludes with a new translation of Braudel s original article by famed sociologist Immanuel Wallerstein

Global Inequalities in World-Systems Perspective Manuela Boatca,Andrea Komlosy,Hans-Heinrich Nolte,2017-09-22 During its 500 year history the modern world system has seen several shifts in hegemony Yet since the decline of the U S in the 1970s

no single core power has attained a hegemonic position in an increasingly polarized world As income inequalities have become more pronounced in core countries especially in the U S and the U K global inequalities emerged as a new topic of social scientific scholarship ignoring the constant move toward polarization that has been characteristic of the entire modern world system At the same time the rise of new states most notably the BRICS and the relative economic growth of particular regions especially East Asia have prompted speculations about the next hegemon that largely disregard both the longue dur e of hegemonic shifts and the constraints that regional differentiations place on the concentration of capital and geopolitical power in one location Authors in this book place the issue of rising inequalities at the center of their analyses They explore the concept and reality of semiperipheries in the 21st century world system the role of the state and of transnational migration in current patterns of global stratification types of catching up development and new spatial configurations of inequality in Europe s Eastern periphery as well as the prospects for the Global Left in the new systemic order The book links novel theoretical debates on the rise of global inequalities to methodologically innovative approaches to the urgent task of addressing them
