Green Politics, Green Economics Palaeologu Athena Palaeologu, 2020-07-16 Given the world wide ecological crisis to what extent do the current economic systems of production and consumption need to change To make substantial changes to the dominant economic system as the author proposes area new politics required What are the relations between economic and political changes M Athena Palaeologu's lucid and engaging analysis offers concrete proposals for moving beyond our current social and environmental impasse In market driven economies around the world ecological crises are creating major problems of supply and distribution The inability of governments to manage these environmental problems both domestically and internationally has led to widespread contradictions between public rhetoric and political practice A growing number of

contemporary publications respond to these crises by advocating a successful marriage of the corporate marketplace with the goals of environmentalism in a marketing landscape where large and small corporations are tripping over each other to present their e green credentials M Athena Palaeologu s timely work *Green Politics Green Economics* examines these apologetic responses to broach an uncomfortable but fundamental question is long term and sustainable development really possible under market capitalism Palaeologu develops two alternative approaches to these environmental challenges i ae green politicse that places major importance on achieving ecological goals through grassroots participatory citizen involvement drawing heavily on values shared with feminist and social movements and ii ae green economicse that address the dynamic and spatial interdependence between human economies and the natural ecosystems which sustain them The focus of both of these approaches is thee scalee conundrum how are we to implement a green economics capable of realising development within the ecological constraints of our planet s biosphere

Toxic Sexual Politics Melina Packer, 2025-01-28 A bold expos of how the very foundation of toxicology has been contaminated by sexist and racist ideologies The first critical understanding of the field of toxicology from a feminist and antiracist perspective *Toxic Sexual Politics* asserts that the science of toxicants must be held accountable for the uneven distribution of toxic pollution along racial and sexual lines Drawing upon in depth interviews and extensive ethnographic and archival research including participant observations in toxicology classrooms conferences and laboratories Melina Packer urges environmental health advocates to place toxicant science within its masculinist militarist and eugenicist history *Toxic Sexual Politics* shows how the founding fathers of U S toxicology were ideologically aligned with the chemical industry inventing a science that could make chemicals safe as opposed to one that could adequately protect planetary health from toxicants hazards While many toxicologists today are critical of the chemical industry they continue to rely on the highly limited tools of toxicology as accurate measures of toxicity as do government regulators the courts and environmental advocates Unlike most critiques of the chemical industry and narratives of environmental health movements *Toxic Sexual Politics* refuses to take the science at face value By focusing on the sexist racist and ableist biases reinforced by toxicology Packer powerfully argues that this scientific discipline reproduces the very same white supremacist and heterosexist logics that generated environmental injustices in the first place The field of toxicology can explicitly confront chemical corporate power by building from queer feminist anti ableist and antiracist movements for environmental and reproductive justice

The Politics of Unsustainability Ingolfur Bluhdorn, Ian Welsh, 2013-10-18 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of Environmental Politics

Animals, Justice, and the Politics of Violence Sezai Ozan Zeybek, 2025-09-26 This book explores the intricate relationship between humans and animals in the context of modern Turkish history From drafted animals in war to urban stray dogs and the role of cattle in the Kurdish conflict the cases developed in this book show how animal lives are deeply entangled with human affairs including complex social organisations such as families states and nations In doing so the book exposes power dynamics exploitative practices and the discursive regimes that underpin development nationalism and urban growth This important book offers a timely exploration of human animal relations critically revising a number of concepts such as human rights productivity health and efficiency from a multispecies perspective

Mitsubishi CORPORATE WATCH editor Joshua Karliner brilliantly exposes how transnationals aided by free trade agreements World Bank policies and massive consumer campaigns play central roles in environmental destruction This important and timely book is a significant contribution to the battle against irresponsible corporate behavior **The Routledge Companion to Photography Theory** Mark Durden, Jane Tormey, 2019-11-07 With newly commissioned essays by some of the leading writers on photography today this companion tackles some of the most pressing questions about photography theory's direction relevance and purpose This book shows how digital technologies and global dissemination have radically advanced the pluralism of photographic meaning and fundamentally transformed photography theory Having assimilated the histories of semiotic analysis and post structural theory critiques of representation continue to move away from the notion of original and copy and towards materiality process and the interdisciplinary The implications of what it means to see an image is now understood to encompass not only the optical but the conceptual ethical and haptic experience of encountering an image The fractal is now used to theorize the new condition of photography as an algorithmic medium and leads us to reposition our relationship to photographs and lend nuances to what essentially underlies any photography theory that is the relationship of the image to the real world and how we conceive what that means Diverse in its scope and themes The Routledge Companion to Photography Theory is an indispensable collection of essays and interviews for students researchers and teachers The volume also features extensive images including beautiful colour plates of key photographs
