Electricity and Energy Transition in Nigeria Norbert Edomah, 2020-01-24 Electricity and Energy Transition in Nigeria provides readers with a detailed account of the dynamics of energy infrastructure change in Nigeria's electricity sector The book starts by introducing the basic theories underpinning the politics of energy infrastructure supply and goes on to explore the historical dimensions of the Nigerian energy transition by highlighting the influences and drivers of energy systems change Edomah also examines the political dynamics at play highlighting the political actors and institutions that shape energy supply as well as the impact of consumer politics The book concludes by considering how all these factors may influence the future of energy in Nigeria This book will be of great interest to students and scholars of energy transitions energy technology and infrastructure and African Studies more generally

Energy Security in the Gulf The Emirates Center for Strategic Studies and Research, 2010-12-16 Energy is essential to the ongoing process of development in the Arabian Gulf region both in terms of its direct use and in the allocation of the proceeds from its export Hence there is an ever present need to achieve the maximum level of energy security possible for producers and consumers alike particularly in light of today's various geo strategic developments and escalating economic and security related challenges To discuss the issue of energy security in the Arabian Gulf the Emirates Center for Strategic Studies and Research ECSSR convened its 15th Annual Energy Conference under the title Energy Security in the Gulf Challenges and Prospects on November 16 18 2009 in Abu Dhabi UAE hosting a group of distinguished energy experts from various academic professional and technical backgrounds This book comprises a collection of the papers presented at the conference and as such provides a scholarly examination of energy security in a region vital to the global energy industry yet characterized by instability and conflict The papers presented in this volume identify energy security challenges in a globalized economy in view of worldwide consumption uncertainties oil price preferences and the diversification of energy sources The interplay between oil prices and fiscal sustainability in the Gulf states is examined as well as the politicization of markets and the relationship between energy resources and regional conflict Russian and Asian perspectives on energy security are also discussed as is the role of new technology in achieving energy sustainability for both producers and consumers

Handbook on the Economics of Renewable Energy Pablo del Río, Mario Ragwitz, 2023-07-01 Renewable energy technologies produce many measurable benefits such as a clear reduction in greenhouse gas emissions However it is also

apparent that these methods of energy production come with costs. Discussing renewable energy developments within an economic context, this pertinent Handbook provides a comprehensive view of the present and future dimensions of renewable energy use. The Power Supply Industry Panos Konstantin, Margarete Konstantin, 2018-01-11. Power and Energy industry is a highly capital intensive business field. Furthermore, there is a very close interlinkage between technologies and economics that requires engineering consultants, economists, and lawyers dealing with investments in this field to have a basic knowledge of the power sector technologies and a common understanding of project evaluation approaches and methodologies. The book's overall objective is to provide a comprehensive but concise coverage of power supply technologies and the related economics as required for techno-economic evaluation of investments in power and business projects. Throughout the book, the emphasis is on transferring practical know-how rather than pure theoretical knowledge. This is also demonstrated in numerous examples derived from experience of respective projects. The book comprises eleven chapters, 35 tables, 100 figures, 35 application examples, and 10 case studies. Target audience of the book are primarily international consultants, staff members of engineering companies, utility personnel, energy economists, and lawyers, as well as employees of government agencies entrusted with regulating the energy and utility sector, and finally students in related fields of engineering and economics. *Financing of Energy Sector in Developing Countries* Pradeep Chaturvedi, 1999.

International Seminar On Nuclear War And Planetary Emergencies - 34th Session Richard C Ragaini, 2006-03-20. Since its inception in 1981, the Erice Seminars from which this book series originates have attracted the attention of world leaders in science, technology, and culture. This latest volume in the series covers a wide range of topics from energy studies and research to disarmament and cultural emergencies. In addition to the main topics, the book also includes an associated workshop program, the 33rd Session focusing on cultural emergencies, specifically designing and building in resilience against chemical, biological, and radiological attacks. **Power and Gas Asset Management** Miguel Moreira da Silva, 2020-01-01. This book offers meaningful insights into an impending challenge for the energy industry, namely the increasing role of asset management amongst the utilities' core operations. In the aftermath of energy digitalization, power and gas companies will be able to seize asset productivity through risk-based operation and maintenance and better balance capital and operational expenditures. By addressing the asset management of both power and gas infrastructures and by adopting a comprehensive approach including regulation and business models, as well as a solid technology background, this book offers a unique perspective on the energy utilities transformation journey and the road to optimal decision making for both asset portfolio expansion and replacement. The asset management end-to-end mission requires appropriate internal governance depending on the business framework and the development of decision aid models for asset replacement and maintenance supported on probabilistic risk and reliability indexes. This book advocates systematically digitalizing the power and gas assets, addressing both data governance and infrastructure alongside real-time equipment condition monitoring. It

also provides a meaningful methodology for designing data centric asset management and predictive operation and maintenance using artificial intelligence and engineering based approaches As such it provides valuable strategy methods and models illustrated by case studies and proofs of concept for a wide range of stakeholders including utilities and industry professionals regulators policy makers researchers and students Handbook of Networks in Power Systems I Alexey Sorokin,Steffen Rebennack,Panos M. Pardalos,Niko A. Iliadis,Mario V. F.
