The Political Impact of African Military Leaders Sabella Ogbobode Abidde, Felix Kumah-Abiwu, 2023-06-28 This edited volume examines the cases of four African military leaders who had enormous impact on the continent and beyond These military officers and later heads of state Jerry Rawlings of Ghana Moammar Gaddafi of Libya Thomas Sankara of Burkina Faso and Gamal Abdel Nasser of Egypt were provocative and polarizing figures beloved domestically but mostly viewed with suspicion and hostility by foreign governments This volume studies these leaders as a group engaging in a critical but systematic examination of their personalities leadership styles official performance legacies and their continuing impact on the future and political destiny of the continent Providing a survey of controversial but important African political figures this volume will be of use to scholars and students in the social sciences especially those interested in African history African studies military science Black studies political science leadership studies and the politics of developing nations **Political**

Impact of the Sino-U.S. Oil Competition in Africa Didier T. Djoumessi, 2009-01-15 The Political Impact of the Sino U S Oil Competition in Africa is an important contribution to the current discussions about the development and security implications of the US Sino competition for oil in Africa s petro states The book focuses on the impact of the growing role of China on these countries acceptance of Western policies in general and those of the U S in particular It uses recent U S attempts to promote democratic governance in countries like Chad Angola and Sudan to show how China s competing presence in these African petro states gradually reduced America s leverage over them It demonstrates that the level of these African countries vulnerability to Washington s policies depends on the intensity of the Sino U S competition within their oil sector The book also contributes to the corpus of theories on resource curse and interdependence through a rigorous review of existing literature which exposes the inadequacies of existing analyses and proffers new theoretical insights and methods of measuring inter state relations *Controversies In Political Economy* Harold D Clarke, 2019-09-26 This book addresses a number of controversies in political economy of political support in three Anglo American polities Canada Great Britain and the United States It addresses a range of theoretical issues concerning which variables properly belong in political economy models

Fiscal Implications of an Aging Population Dieter Bös, Sijbren Cnossen, 2012-12-06 Serious research into the causes and implications of an aging population is a relatively recent phenomenon Though several relevant issues of aging have received considerable attention in public and political discussions especially in European countries and in Japan the economics profession is somewhat lacking behind This is particularly true for the theoretical underpinnings of the economics of population aging Until now the aging debate is primarily led by institutionalists The present book with its analytical and econometric studies on fiscal implications of population aging is an important step in the process of theoretical analysis of aging It is of interest both for population economists and demographers and for public economists providing a bridge

Member of Parliament seats The PAP's total votes dropped from 69.9 percent in 2015 to 61.2 percent in 2020. The rise of a credible opposition has also further strengthened Singaporeans' resolve to ensure that a fair playing field exists in the political realm. With the highest voter turnout since independence, many have made it known that their voices mattered. The PAP also saw some cracks in its ranks with some former cadre members and supporters being critical of the new fourth generation team. Against this backdrop, this book hopes to address the following questions: What were the key issues in the general elections? Who were the main contenders in the polls? What accounted for the PAP's continued hold on power in Singapore? Why did the opposition perform much better than in the previous general elections? What are the main implications of the 2020 general elections results for the PAP, opposition, and the broader society at large? How far have electoral issues shifted from bread and butter concerns to much broader topics of social injustices and diversity of voices in parliament? What were some of the crucial talking points during this election? Last but not least, how far did social media and internet campaigning determine the outcome of this election?

Presidentialism in Turkey Serap Gur, 2016-12-08

Parliamentarism has been a presiding characteristic of the Turkish political tradition since the 1876 Ottoman constitution. In 1923, with the founding of the Turkish Republic, modern parliamentarism was implemented in Turkey. Since that time, Turkish politics has been turbulent with four military coups, a number of short-lived multiparty coalitions, and several ineffective governments. Many scholars have argued that the main reason for this instability is the parliamentary system of government, so Turkey must therefore adopt a presidential system. *Presidentialism in Turkey* uses both quantitative analysis and country-based comparisons to explore whether such a change might solve Turkey's main political problems or if it might in fact create more problems for the nation. The relationship between government systems and political, economic, and social development is explored in a time series analysis covering the period 1975-2014 for Turkey. It is argued that during this time period, the parliamentary system was better than the presidential system at boosting economic and political development, whereas the presidential system provides better social development. Furthermore, a country-based analysis in which Turkey is compared with other states that have used a presidential system at some point since 1975 highlights that each country has its own specific characteristics that affect its economic and political success. Thus, a regime transformation to a presidential system will not necessarily improve Turkey's economic, political, and social development. By including a comparison of all presidential, parliamentary, and semi-presidential systems, this book helps to shed new light on what is a very controversial topic in Turkey. It will therefore be a key resource for students and scholars of Turkish studies and comparative politics. **Tariff**

Determination in the General Equilibrium of a Political Economy Homi K. Moorti Pant, 2019-05-23

First published in 1997, this volume builds an economic model in which a model of the policy formation process was grafted onto an economic model of the traditional kind. Politics are not made in a vacuum; they have their basis in the politico-economic system, which economists have been modelling and analysing for a very long time. For economists, government policies are particularly

important as they determine the environment within which all agents make their choices and the way in which the market allocates resources Through an examination of tariffs and an equilibrium model of the economic sphere of a small open political economy Hom Moorti Pant aims to explore some of the reasons and effects of government policy decisions on the economy

The Political Economy of the Urban Ghetto Daniel Roland Fusfeld, Timothy Mason Bates, 1984 The income of blacks in most northern industrial states today is lower relative to the income of whites than in 1949 Fusfeld and Bates examine the forces that have led to this state of affairs and find that these economic relationships are the product of a complex pattern of historical development and change in which black white economic relationships play a major part along with patterns of industrial agricultural and technological change and urban development They argue that today's urban racial ghettos are the result of the same forces that created modern America and that one of the by products of American affluence is a ghettoized racial underclass These two themes they state are essential for an understanding of the problem and for the formulation of policy Poverty is not simply the result of poor education skills and work habits but one outcome of the structure and functioning of the economy Solutions require more than policies that seek to change people they await a recognition that basic economic relationships must be changed
