Economic Change And Political Liberalization In Sub Saharan Africa:

Economic Change and Political Liberalization in Sub-Saharan Africa Jennifer A. Widner, 1994 Aims to establish the nature of the relationship between the economic challenges of the 1980s and the steps toward greater political openness taken by governments at the end of that decade

Democratic Experiments in Africa Michael Bratton, Nicolas Van de Walle, 1997-08-13 Appendix The Data Set

Political Opposition and Democracy in Sub-Saharan Africa Elliott Green, Johanna Söderström, Emil Uddhammar, 2016-04-08 This book takes a closer look at the role and meaning of political opposition for the development of democracy across sub Saharan Africa Why is room for political opposition in most cases so severely limited Under what circumstances has the political opposition been able to establish itself in a legitimate role in African politics To answer these questions this edited volume focuses on the institutional settings the nature and dynamics within and between political parties and the relationship between the citizens and political parties It is found that regional devolution and federalist structures enable political opposition to organize and gain local power as a supplement to influence at the central level Generally however opposition parties are lacking in organization and institutionalization as well as in their ability to find support in civil society and promote the issues that voters find most important Overall strong executive powers unchecked by democratic institutions in combination with deferential values and fear of conflict undermine legitimate opposition activity This book was originally published as a special issue of Democratization

The Fate of Africa's Democratic Experiments Leonardo A. Villalón, Peter VonDoepp, 2005-09 Does democracy have a future in Africa

Economic Liberalization and Authoritarianism Christian Neugebauer, 2021-11-29 Contrary to other world regions political regimes in the Middle East and North Africa MENA remain largely authoritarian While the search for explanations is still ongoing Christian Neugebauer draws attention to a hitherto underresearched factor economic liberalization Being part of a global shift from state led development towards structural adjustment in the economy these policies also deeply affected the countries of the MENA region This makes the resilience of authoritarianism in the region all the more puzzling as a large part of the scientific community expected economic liberalization to undermine authoritarian regimes Neugebauer strives to solve the puzzle with a comparative case study that covers four countries Egypt Tunisia Jordan and Morocco and their political regimes from independence in the 1950s to the Arab Spring in 2011 He shows that two specific policies of economic liberalization might in fact have been relevant for regime stability consumer price liberalization and privatization

African Economies and the Politics of Permanent Crisis, 1979-1999 Nicolas Van de Walle, 2001-09-24 This 2001 book explains why African countries have remained mired in a disastrous economic crisis since the late 1970s It shows that dynamics internal to African state structures largely explain this failure to overcome economic difficulties rather than external pressures on these same structures as is often argued Far from being prevented from undertaking reforms by societal interest and pressure groups clientelism within the state elite ideological factors and low state capacity have resulted in

some limited reform but much prevarication and manipulation of the reform process by governments which do not really believe that reform will be effective which often oppose reforms because they would undercut the patronage and rent seeking practices which undergird political authority and which lack the administrative and technical capacity to implement much reform Over time state decay has increased

Aid and Reform in Africa Shantayanan Devarajan, David Dollar, Torgny Holmgren, 2001-01-01 Finally when the country enters the second generation of reforms such as public sector institutional reform short term conditionality based aid can once again be harmful by reducing ownership participation and sustainability of the reform process

International Handbook of Rural Demography László J. Kulcsár, Katherine J. Curtis, 2011-12-15 This is the third in an essential series of Springer handbooks that explore key aspects of the nexus between demography and social science With an inclusive international perspective and founded on the principles of social demography this handbook shows how the rural population which recently dropped below 50 per cent of the world total remains a vital segment of society living in proximity to much needed developmental and amenity resources The rich diversity of rural areas shapes the capacity of resident communities to address far reaching social environmental and economic challenges Some will survive become sustainable and even thrive while others will suffer rapid depopulation This handbook demonstrates how these future development trajectories will vary according to local characteristics including but not limited to population composition The growing complexity of rural society is in part a product of significant international variations in population trends making this comparative and comprehensive study of rural demography all the more relevant Collating the latest research on international rural demography the handbook will be an invaluable aid to policy makers as they try to understand how demographic dynamics depend on the economic social and environmental characteristics of rural areas It will also aid researchers assessing the unique factors at play in the rural context and endeavoring to produce meaningful results that will advance policy and scholarship Finally the handbook is an ideal text for graduate students in a spread of disciplines from sociology to international development

Global Geopolitical Power and African Political and Economic Institutions John James Quinn, 2015-12-30 Global Geopolitical Power and African Political and Economic Institutions When Elephants Fight describes the emergence and nature of the prevailing African political and economic institutions in two periods In the first most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites usually through one or no party military political systems inward oriented development policies and or state led and often state owned industrialization In the second period most countries adopted institutions that diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral

systems more outward oriented trade policies and the privatization of many state owned or controlled sectors though significant political and economic power remains in their hands The choices made in each period were consistent with prevailing ideas on governance and development the self interests of political elites and the perceived availability of support or autonomy vis vis domestic regional and international sources of power at the time This book illustrates how these two region wide shifts in prevailing political and economic institutions and practices of Africa can be linked to two prior global geopolitical realignments the end of WWII with the ensuing American and Soviet led bipolar system and the end of the Cold War with American primacy Each period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic regional and international forces material and intellectual all which were themselves greatly transformed in the wake of these two global geopolitical realignments

Corruption and the Global Economy Kimberly Ann Elliott,1997 The recently adopted OECD convention outlawing bribery of foreign public officials is welcome evidence of how much progress has been made in the battle against corruption The financial crisis in East Asia is an indication of how much remains to be done Corruption is by no means a new issue but it has only recently emerged as a global issue With the end of the Cold War the pace and breadth of the trends toward democratization and international economic integration accelerated and expanded globally Yet corruption could slow or even reverse these trends potentially threatening economic development and political stability in some countries As the global implications of corruption have grown so has the impetus for international action to combat it In addition to efforts in the OECD the Organization of American States the World Trade Organization and the United Nations General Assembly the World Bank and the International Monetary Fund have both begun to emphasize corruption as an impediment to economic development This book includes a chapter by the Chairman of the OECD Working Group on Bribery discussing the evolution of the OECD convention and what is needed to make it effective Other chapters address the causes and consequences of corruption including the impact on investment and growth and the role of multinational corporations in discouraging bribery The final chapter summarizes and also discusses some of the other anticorruption initiatives that either have been or should be adopted by governments multilateral development banks and other international organizations

The Oxford Handbook of the Politics of Development Carol Lancaster,Nicolas Van de Walle,2018 In The Oxford Handbook of the Politics of Development two of America s leading political scientists on the issue Carol Lancaster and Nicolas van de Walle assemble an international cast of leading scholars who craft a comprehensive examination of development policy and its effects on the political and economic climates of a country

Structural Adjustment Ed Brown,Bob Milward,Giles Mohan,Alfred B. Zack-Williams,2013-04-15 Structural Adjustment Theory Practice and Impacts

examines the problems associated with Structural Adjustment Programmes SAPs and reveals the damaging impacts they can have. The book looks at how the debt crisis of the 1970s forced developing countries to seek external help and then reviews what constitutes a standard adjustment programme detailing the political, economic, social and environmental impacts of SAPs. The final section draws together theories and political responses and presents a case for alternatives to the programmes.

Turning Points in African Democracy Abdul Raufu Mustapha, Lindsay Whitfield, 2009. A team of scholars examine the radical political changes that have taken place since 1990 in eleven key countries in Africa. Radical changes have taken place in Africa since 1990. What are the realities of these changes? What significant differences have emerged between African countries? What is the future for democracy in the continent? The editors have chosen eleven key countries to provide enlightening comparisons and contrasts to stimulate discussion among students. They have brought together a team of scholars who are actively working in the changing Africa of today. Each chapter is structured around a framing event which defines the experience of democratisation. The editors have provided an overview of the turning points in African politics. They engage with debates on how to study and evaluate democracy in Africa such as the limits of elections. They identify four major themes with which to examine similarities and divergences as well as to explain change and continuity in what happened in the past. Abdul Raufu Mustapha is University Lecturer in African Politics at Queen Elizabeth House and Kirk Greene Fellow at St Antony's College, University of Oxford. Lindsay Whitfield is a Research Fellow at the Danish Institute of International Studies, Copenhagen.

Development and Diffusionism J. Dibia, 2015-12-04. This book deconstructs the neopatrimonial paradigm that has dominated analysis of Nigerian and African development. It shows that by denying agency to Nigerian societies and devaluing indigenous culture and local realities, Eurocentric diffusionism played a significant role in the failure of development planning.

Silent Violence Vinay R. Kamat, 2013-12-05. *Silent Violence* engages the harsh reality of malaria and its effects on marginalized communities in Tanzania. Vinay R. Kamat presents an ethnographic analysis of the shifting global discourses and practices surrounding malaria control and their impact on the people of Tanzania, especially mothers of children sickened by malaria. Malaria control, according to Kamat, has become increasingly medicalized, a trend that overemphasizes biomedical and pharmaceutical interventions while neglecting the social, political and economic conditions he maintains are central to Africa's malaria problem. Kamat offers recent findings on global health governance, neoliberal economic and health policies and their impact on local communities. Seeking to link wider social, economic and political forces to local experiences of sickness and suffering, Kamat analyzes the lived experiences and practices of people most seriously affected by malaria: infants and children. The persistence of childhood malaria is a form of structural violence, he contends, and the resultant social suffering in poor communities is closely tied to social inequalities. *Silent Violence* illustrates the evolving nature of local responses to the global discourse on malaria control. It advocates for the close study of disease treatment in poor communities as an integral component of global health funding. This ethnography combines a

decade of fieldwork with critical review and a rare anthropological perspective on the limitations of the bureaucratic technological institutional medical and political practices that currently determine malaria interventions in Africa *Ibss: Economics: 1995* Compiled by the British Library of Political and Economic Science at the London School of Economics, 1996 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences **Routledge Handbook of Democratization** Jeffrey Haynes, 2012-03-15 This exciting new handbook provides a global overview of the process of democratization offering chapter by chapter discussion at both the country and regional levels and examining the interaction between the domestic and external factors that affect the progression of countries from authoritarian to democratic rule Bringing together 29 key experts in the field the work is designed to contrast the processes and outcomes of democratic reform in a wide range of different societies evaluating the influence of factors such as religion economic development and financial resources It is structured thematically into four broad sections Section I provides a regional tour d horizon of the current state of democratisation and democracy in eight regions around the world Section II examines key structures processes and outcomes of democratisation and democracy Section III focuses on the relationship between democratisation and international relations through examination of a range of issues and actors including the third and fourth waves of democracy political conditionality the United Nations the European Union the African Union and the Organisation of African States Section IV Examines the interaction between democratisation and development with a focus on poverty and inequality security human rights gender war and conflict resolution A comprehensive survey of democratization across the world this work will be essential reading for scholars and policy makers alike *The Politics of Economic Reform in Ghana* Richard Aidoo, 2019-05-13 This book explores the significant economic transformation of Ghana over the three decades since the end of the Cold War focusing on the role of political economic change and reform The Politics of Economic Reform in Ghana presents a range of perspectives from scholars drawn from both academia and policy making on the way Ghanaian economic reforms have been shaped by various political and economic actors First it establishes and debates the uniqueness of Ghana as a case study in Africa and the developing world Second the book offers a broad account of how global and domestic political or institutional actors have contributed to shaping economic development in Ghana Drawing on theoretical perspectives the volume assesses how major political economic changes have affected Ghana's economic development This book will be of interest to students scholars policymakers and organizations interested in the economic and political advancement of Africa as well as African Politics and Economics
