Contemporary Monastic Economy Isabelle Jonveaux,2023-06-02 This book examines the economy of contemporary Catholic monasticism from a sociological perspective considering the ways in which monasteries engage with the capitalist world economy via a model which aims less at performance per se than at the fulfilment of human and religious values Based on fieldwork across several countries in Europe Africa and South America it explores not only the daily work and economy in monastic communities in their tensions with religious life but also the new interest from society in monastic products or monastic management With attention to present trends in monastic economy including the growth of ecology and the role of monasteries in the social and economic development of their localities the author demonstrates that monastic economy consists not solely in the subsistence of religious communities outside the world but in economic activity that has a real impact on its local or even more global environment in part through transnational networks of monasteries As such Contemporary Monastic Economy A Sociological Perspective will appeal to scholars of religious studies and sociology with interests in contemporary monasticism

Foundations of Economics Shawn Ritenour,2010-01-01 Foundations of Economics A Christian View is an introduction to economics from an explicitly Christian perspective It maintains that there is no conflict between Christian doctrine and economic science properly understood Therefore Foundations of Economics has three goals to demonstrate that the foundations of economic laws are derived from a Christian understanding of nature and humanity to explain basic economic principles of the market economy and apply them to various economic problems such as poverty and economic development and to show the relationship between Christian ethics and economic policy Foundations
