Economics and the Law Nicholas Mercuro, Steven G. Medema, 1997 By providing readers with a noncritical description of the broad contours of each school of thought Mercuro and Medema convey a strong sense of the important elements of each of these interrelated yet varied traditions *Economics and the Law* Nicholas Mercuro, Steven G. Medema, 2006-08-20

Publisher Description **Book Review, Nicholas Mercuro & Steven G. Medema, *Economics and the Law*** James Ming Chen, 2014 It is no longer credible to speak of a single law and economics movement Rather there are multiple schools of thought each applying economic analysis of law in a distinct way and none commanding widespread acceptance Chaos would seem the natural result of any attempt to marry economics a value laden discipline beset by critics who decry the immorality of the dismal science with law a profession as methodologically incoherent as it is intellectually promiscuous A literature of staggering size and dazzling diversity thus confronts anyone who tries to survey law and economics from Posner to post modernism In *Economics and the Law* Nicholas Mercuro and Steven G Medema acknowledge the Herculean nature of their task by confining themselves to a concise overview of this field Mercuro and Medema nevertheless promise more than they can deliver With each blow at the many headed Hydra that economic analysis of law has become the authors leave marginally useful abstraction and significantly offsetting confusion in their wake **Law and Economics** Margaret

Oppenheimer, Nicholas Mercuro, 2015-06-01 The economic analysis of legal and regulatory issues need not be limited to the neoclassical economic approach The expert contributors to this work employ a variety of heterodox legal economic theories to address a broad range of legal issues They demonstrate how these various approaches can lead to very different conclusions concerning the role of the law and legal intervention in a wide array of contexts The schools of thought and methodologies represented here include institutional economics new institutional economics socio economics social economics behavioral economics game theory feminist economics Rawlsian economics radical economics Austrian economics and personalist economics The legal and regulatory issues examined include anti trust and competition corporate governance the environment and natural resources land use and property rights unions and collective bargaining welfare benefits work time regulation and standards sexual harassment in the workplace obligations of employers and employees to each other crime torts and even the structure of government Each contributor brings a different emphasis and provides thoughtful sometimes provocative analysis and conclusions Together these heterodox insights will provide valuable supplementary reading for courses in law and economics as well as public policy and business courses at both the graduate and undergraduate levels *The Elgar Companion to Social Economics, Second Edition* John B. Markovits, 2020-05-30 This book examines the

implications of The General Theory of Second Best for analyzing the economic efficiency of non government conduct or government policies in an economically efficient way It develops and legitimates an economically efficient economic efficiency analysis protocol with three unique characteristics First the protocol focuses separately on each of a wide variety of categories of economic inefficiency many of which conventional analyses ignore Second it analyzes the impact of conduct or policies on each of these categories of economic inefficiency primarily by predicting the respective conduct's policy's impact on the distortion that the economy's various Pareto imperfections generate in the profits yielded by the resource allocations associated with the individual categories of economic inefficiency i.e. on the difference between their profitability and economic efficiency And third it is third best i.e. it instructs the analyst to execute a theoretical or empirical research project if and only if the economic efficiency gains the project is expected to generate by increasing the accuracy of economic efficiency conclusions exceed the predicted allocative cost of its execution and public financing The book also uses the protocol to analyze the economic efficiency of specific policies so as to illustrate both how it differs from the protocols that most applied welfare economists continue to use and how its conclusions differ from those produced by standard analysis

principal publications that founded the school were Veblen's *The Theory of the Leisure Class* and Commons's *A Sociological View of Sovereignty* both published in 1899. As a tribute to these two seminal works, Warren Samuels has assembled an exceptionally prestigious international group of scholars to produce this landmark volume celebrating the centenary. The chapters assess the work of Veblen and Commons and their influence on the school of institutional economics from a variety of theoretical perspectives. The contributions on Veblen appraise his anthropological analysis of consumption habits of American households from sociological, linguistic and feminist points of view. Conversely, the essays on Commons's work focus on the concepts of property, power and the relationship between legality and economics.

The Neoliberal Regime in the Agri-Food Sector Steven A. Wolf, Alessandro Bonanno, 2013-12-04. For the last three decades the Neoliberal regime emphasising economic growth through deregulation, market integration, expansion of the private sector and contraction of the welfare state has shaped production and consumption processes in agriculture and food. These institutional arrangements emerged from and advanced academic and popular beliefs about the virtues of private market-based coordination relative to public state-based problem solving. This book presents an informed, constructive dialogue around the thesis that the Neoliberal mode of governance has reached some institutional and material limits. Is Neoliberalism exhausted? How should we understand crisis applied to Neoliberalism? What are the opportunities and risks linked to the construction of alternatives? The book advances a critical evaluation of the evidence supporting claims of rupture of or incursions into the Neoliberal model. It also analyzes pragmatic responses to these critiques including policy initiatives, social mobilization and experimentation at various scales and points of entry. The book surveys and synthesizes a range of sociological frames designed to grapple with the concepts of regimes, systemic crisis and transitions. Contributions include historical analysis, comparative analysis and case studies of food and agriculture from around the globe. These highlight particular aspects of crisis and responses including the potential for continued resilience, a neo-productivist return as well as the emergence and scaling up of alternative models.
