Zein-Elabdin, 2017-09-19 This

book examines the treatment of culture and development in the discipline of economics thereby filling a conspicuous gap in current literature Economics has come a long way to join the cultural turn that has swept the humanities and social sciences in the last half century This volume identifies some of the issues that major philosophies of economics must address to better grasp the cultural complexity of contemporary economies This book is an extensive survey of the place of culture and development in four theoretical economic perspectives Neoclassical Marxian Institutional and Feminist Organized in nine chapters with three appendices and a compendium of over 50 interpretations of culture by economists this book covers vast grounds from classical political economy to contemporary economic thought The literatures reviewed include original and new institutionalism cultural economics postmodern Marxism economic feminism and the current culture and development discourse on subjects such as economic growth in East Asia businesswomen entrepreneurs in West Africa and comparative development in different parts of Europe Zein Elabdin carries the project further by borrowing some of the insights from postcolonial theory to call for a more profound rethinking of the place of culture and of currently devalued cultures in economic theory This book is of great interest for those who study Economic development International relations feminist economics and Economic geography **Economics, Culture, and Society** Oscar Nudler, Mark A. Lutz, 1996 Critics of

economic orthodoxy contend that contrary to its claims economics is only one facet of human existence The failure to see how it distorts basic human values moreover is at the root of the social and environmental problems faced by developed and developing societies That position underlies the four extended essays in this volume In Search of the Good Life Rebecca Todd Peters, 2006-03-03 Provides a helpful overview of the complicated contemporary debates about globalization This book argues that our moral task is to ensure that globalization proceeds in ways that honour creation and life and that any theory of globalization ought to be grounded in values that emphasize a democratized understanding of power Putting Ideas to Work Mark Mattern, 2006-07-08 In this innovative new text Mark Mattern offers a unique alternative to the traditional approaches to the study and teaching of political philosophy Rather than approaching it solely as a world of abstractions

Putting Ideas to Work emphasizes its practical task. Political ideas drawn from historical and analytical political philosophy are used to help rethink current public problems and imagine potential solutions to them. Putting Ideas to Work is organized around five central tensions in political theory and practice: individual and community, freedom and equality, justice and political order, democracy and capitalism, and power and citizenship. Each section begins with a description and analysis of several contemporary public problems arising from these tensions. Key political thinkers are then drawn upon to help understand the genesis of the public problems and to offer alternative ways of thinking about them. The text is anchored throughout to an idea of strong democracy that functions as a standard against which theory and practice are measured.

Human Nature in Modern Economics Anna Horodecka, 2022-06-15 *Human Nature in Modern Economics* offers a precise definition of the concept of human nature in economics, something that is so far lacking in the theoretical and methodological literature. This book develops tools for the analysis of human nature through the construction of the author's meta-model based on anthropological and psychological foundations, allowing for comparisons of anthropological assumptions made in economic theories. The model demonstrates that the normative functions of human nature may affect the economic reality. The chapters argue that the concept of human nature determines our thinking about the economy and economics, including fundamental methodologies, methods, and theories. Thus, the differences between various economic schools may result from the different assumptions of these schools about human nature. Those evolving views of human nature proceed to explain the development of both orthodox mainstream and heterodox economics. The book marks a significant addition to the literature on the history of economic thought, heterodox economics, economic theory, and economic methodology. For students, it is a supplement to standard textbooks as it explains the current state of economics, especially in its heterodox branches. It will allow scholars to discover the importance of what they assume about human nature and how it may influence their research process.
