## **Economics Of Information And Law:**

Economics of Information and Law Ejan Mackaay, 1980      **The Law and Economics of Intellectual Property in the Digital Age** Niva Elkin-Koren, Eli Salzberger, 2012-11-27 This book explores the economic analysis of intellectual property law with a special emphasis on the Law and Economics of informational goods in light of the past decade's technological revolution. In recent years there has been massive growth in the Law and Economics literature focusing on intellectual property on both normative and positive levels of analysis. The economic approach to intellectual property is often described as a monolithic coherent approach that may differ only as it is applied to a particular case. Yet the growing literature of Law and Economics in intellectual property does not speak in one voice. The economic discourse used in legal scholarship and in policy making encompasses several strands, each reflecting a fundamentally different approach to the economics of informational works and each grounded in a different ideology or methodological paradigm. This book delineates the various economic approaches taken and analyzes their tenets. It maps the fundamental concepts and the theoretical foundation of current economic analysis of intellectual property law in order to fully understand the ramifications of using economic analysis of law in policy making. In so doing, one begins to appreciate the limitations of the current frameworks in confronting the challenges of the information revolution. The book addresses the fundamental adjustments in the methodology and underlying assumptions that must be employed in order for the economic approach to remain a useful analytical framework for addressing IPR in the information age.

**Economics of Information and Law** Ejan Mackaay, 2014-09-12      The Law and Economics of Privacy, Personal Data, Artificial Intelligence, and Incomplete Monitoring James Langenfeld, Frank Fagan, Samuel Clark, 2022-03-22 The Law and Economics of Privacy, Personal Data, Artificial Intelligence, and Incomplete Monitoring showcases the cutting edge theoretical and empirical findings for researchers and professionals considering these complex issues intersecting law, technology, and economics.

The Law and Economics of Personalization Adrianus Johannes Van Heusden, 2025-09-01 Imagine every ad, every price, and even every contract completely tailored to you: welcome to the age of AI-driven hyperpersonalization. Today, vast amounts of consumer data are collected and processed to build individualized profiles with ever-increasing precision. This enables one-to-one interactions that evolve in real time and allow firms to influence behavior with unprecedented subtlety. Personalized marketing holds the promise of meeting consumer needs more effectively and making digital experiences more relevant and efficient. Yet this seemingly customized environment raises urgent concerns about the power of such marketing to exploit cognitive biases, reshape preferences, and deepen asymmetries in digital markets. This book offers the first in-depth law and economics analysis of personalized marketing in the digital age. It examines how personalized advertising, pricing, and contracting challenge foundational principles of consumer protection and explores to what extent these practices are regulated under the current EU legal framework. The analysis shows that while existing rules provide some safeguards, they fall short of addressing the systemic

risks posed by hyper personalization To respond to these challenges the book develops a four part policy approach aimed at reinforcing consumer autonomy equity and welfare in data driven markets and bridging the regulatory gaps that personalization opens up Regulating these developments involves a clear trade off between efficiency and fairness How much freedom do you give up in exchange for a hyper personalized experience How confident are you that the price you pay will not exceed what others pay for the exact same service And what does it mean for your autonomy when an algorithm predicts your behavior better than you do yourself This book offers a critical starting point for future regulation and a call to rethink the role of personalization in the digital economy The Law and Economics of Enforcing European Consumer Law

Franziska Weber,2016-03-03 In the internet age the need for effective consumer law enforcement has arguably never been greater This timely book is a comparative law and economic analysis of the changing landscape of EU consumer law enforcement policy EU member states are moving away from purely public or private law enforcement and now appear to be moving towards a more mixed approach not least due to European legislation This book reflects on the need for and creation of efficient enforcement designs It examines the various economic factors according to which the efficiency of different enforcement mechanisms can be assessed Hypothetical case scenarios within package travel and misleading advertising dealing with substantial individual harm and trifling and widespread harm are used to illustrate various consumer law problems Design suggestions on how to optimally mix enforcement mechanisms for these case scenarios are developed The findings are then used as a benchmark to assess real life situations in countries with different enforcement traditions the Netherlands Sweden and England The book is of value to both researchers and policy makers working in the area of consumer protection **Law and Economics and the Economics of Legal Regulation** J.-M.
