The New Age in Glastonbury Ruth Prince, David Riches, 2001-01-01 The New Age movement is a twentieth century socio cultural phenomenon in the Western world with Glastonbury as one of its major centers Through experimenting with a number of ways of analyzing this movement the authors were able to develop a novel theory of social religious movements of broad applicability Based around contradictions relating to such central anthropological concepts as communitas egalitarianism individualism holism and autonomy it reveals the processes by which having abandoned a mainstream lifestyle people come to build up a counter culture way of life Drawing on their own work on tribal shamanistic religions the authors are able to point out interesting similarities between the latter and the Glastonbury New Age movement Not only that their model allows them to explain such wide ranging social and religious movements as the Hutterites the Kibbutz and Green communes In fact the authors argue these movements may be regarded as variations of the Glastonbury type

Scarcity Fredrik Albritton Jonsson, Carl Wennerlind, 2023-04-18 A sweeping intellectual history of the concept of economic scarcity its development across five hundred years of European thought and its decisive role in fostering the climate crisis Modern economics presumes a particular view of scarcity in which human beings are innately possessed of infinite desires and society must therefore facilitate endless growth and consumption irrespective of nature's limits Yet as Fredrik Albritton Jonsson and Carl Wennerlind show this vision of scarcity is historically novel and was not inevitable even in the age of capitalism Rather it reflects the costly triumph of infinite growth ideologies across centuries of European economic thought at the expense of traditions that sought to live within nature's constraints The dominant conception of scarcity today holds that rather than master our desires humans must master nature to meet those desires Albritton Jonsson and Wennerlind argue that this idea was developed by thinkers such as Francis Bacon Samuel Hartlib Alfred Marshall and Paul Samuelson who laid the groundwork for today's hegemonic politics of growth Yet proponents of infinite growth have long faced resistance from agrarian radicals romantic poets revolutionary socialists ecofeminists and others These critics including the likes of Gerrard Winstanley Dorothy Wordsworth Karl Marx and Hannah Arendt embraced conceptions of scarcity in which our desires rather than nature must be mastered to achieve the social good In so doing they dramatically reenvisioned how humans might interact with both nature and the economy Following these conflicts into the twenty first century Albritton Jonsson and Wennerlind insist that we need new sustainable models of economic thinking to address the climate crisis Scarcity is not only a critique of infinite growth but also a timely invitation to imagine alternative ways of flourishing on Earth

Integral Economics Dr Alexander Schieffer, Professor Ronnie Lessem, 2012-08-28 Why on earth is economics perceived to come in only one or at best two different a cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In Integral Economics Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation to this lack of choice are not so much the financial community and governments though they do have much to answer but the schools of economics and the business schools that have created the very social ethos the philosophical principles and the mathematical models that influence events Integral Economics is partly addressed to academics and students in those very schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses and communities could be run in a different way It will be welcomed by informed senior practitioners eager to understand the current rethink of economic theory and practice and to discover how to position themselves their organizations and their society within a new framework **Principles of Economics** Alfred Marshall, 1895
