Economics Of Transnational Commons:

The Economics of Transnational Commons Partha Dasgupta, Karl-Göran Mäler, Alessandro Vercelli, 1997 Transnational commons cross border areas without well defined property rights have long been ignored in official development economics. This volume redresses the balance by adopting an environmental approach which stresses the importance of shared natural resources and the links between acute poverty and environmental degradation. The Economics of Transnational Commons draws together eminent contributors from fields as diverse as law, population studies, social anthropology, biological sciences and economics to present authoritative accounts that combine empirical case studies with rigorous theoretical foundations. Despite the multi-disciplinary approach, the main focus of the articles is the same: that the reciprocal externalities and problems of free riding created by any common resource are complicated in the case of transnational commons by difficulties in monitoring, enforcement and unequal access to information. Often using theories of negotiation taken from game theory, the studies then suggest possible solutions both at an institutional and educational level. In order to make these materials suitable for teaching purposes, the authors have been encouraged to survey their topics rather than present their most recent findings. A companion publication, The Environment and Emerging Development Issues Volumes 1-11 edited by Dasgupta and Mahler, deals with national environmental issues.

Explorations in Public Sector Economics Joshua Hall, 2016-12-03 This book is a collection of never before published papers from some of the most prominent voices in public economics. Curated by the current director of the Public Choice Society, the papers presented showcase the work of recognized leaders in the field, including a Nobel Laureate, Gary Becker. Past Presidents of the Public Choice Society, Larry Kenny, Edward Lopez, the Past President of the Southern Economic Association, Dwight Lee, and some of the most notable public choice economists, Bruce Benson, Russell Sobel, JR Clark, Art Denzau, Morris Coats, Richard Vedder. Among the broad list of topics covered are voting, education, quality, environmental issues, externality theory, and public goods theory. This volume makes an important contribution to the field by making new perspectives on a variety of topics accessible to researchers. This book will be of interest to economists, political scientists, and researchers interested in public policy.

Economics and the Global Environment Charles S. Pearson, 2000-10-09 Economics and the Global Environment is a path-breaking comprehensive analysis of how economic and environmental systems mesh in the international context. The book investigates if and how environmental resources such as global climate, genetic diversity, and transboundary pollution can be managed in an international system of sovereign states without a Global Environment Protection Agency. It also considers traditional international economics theory and policy and explores how they can be expanded to accommodate environmental values. Until recently, trade theory and trade policy neglected pollution and environmental degradation. This situation has changed dramatically, and the controversial and corrosive issues of trade and the environment are here given careful analysis. These topics are enriched by a concise presentation of the principles of environmental economics and a thoughtful treatment of

sustainable development The book will appeal to students and practitioners of trade and development as well as the environmental community

Annual World Bank Conference on Development Economics 1995 Michael Bruno, Boris Pleskovic, 1996 Annotation The 1995 conference continued the tradition of holding a roundtable discussion related to the subject of the forthcoming annual World Development Report in this case economies in transition The conference addressed four themes redistribution with growth demographic change and development aid and development and fiscal decentralization Among the articles included in the 1995 proceedings are Argentina's Miracle From Hyperinflation to Sustained Growth Domingo F Cavallo and Guillermo Mondino Inequality Poverty and Growth Where Do We Stand Albert Fishlow Government Provision and Regulation of Economic Support in Old Age Peter Diamond Is Growth in Developing Countries Beneficial to Industrial Countries Richard N Cooper Fiscal Federalism and Decentralization A Review of Some Efficiency and Macroeconomic Aspects Vito Tanzi

Handbook of New Institutional Economics Claude Ménard, Mary M. Shirley, 2008-06-27 New Institutional Economics NIE has skyrocketed in scope and influence over the last three decades This first Handbook of NIE provides a unique and timely overview of recent developments and broad orientations Contributions analyse the domain and perspectives of NIE sections on legal institutions political institutions transaction cost economics governance contracting institutional change and more capture NIE's interdisciplinary nature This Handbook will be of interest to economists political scientists legal scholars management specialists sociologists and others wishing to learn more about this important subject and gain insight into progress made by institutionalists from other disciplines This compendium of analyses by some of the foremost NIE specialists including Ronald Coase Douglass North Elinor Ostrom and Oliver Williamson gives students and new researchers an introduction to the topic and offers established scholars a reference book for their research

Local Commons and Global Interdependence Robert O Keohane, Elinor Ostrom, 1994-11-15 This volume offers a synthesis of what is known about very large and very small common pool resources Individuals using commons at the global or local level may find themselves in a similar situation At an international level states cannot appeal to authoritative hierarchies to enforce agreements they make to cooperate with one another In some small scale settings participants may be just as helpless in calling on distant public officials to monitor and enforce their agreements Scholars have independently discovered self organizing regimes which rely on implicit or explicit principles norms rules and procedures rather than the command and control of a central authority The contributors discuss the possibilities and dangers of scaling up and scaling down They explore the impact of the number of actors and the degree of heterogeneity among actors on the likelihood of cooperative behaviour

The New Institutionalism in Sociology Mary C. Brinton, Victor Nee, 2001 Institutions play a pivotal role in structuring economic and social transactions and understanding the foundations of social norms networks and beliefs within institutions is crucial to explaining much of what occurs in modern economies This volume integrates two increasingly visible streams of research economic sociology and new institutional economics to

better understand how ties among individuals and groups facilitate economic activity alongside and against the formal rules that regulate economic processes via government and law

Reviews This volume is a welcome addition to the expanding literature on institutional analysis Besides sociologists we are afforded the pleasure of contributions from anthropologists economists historians political scientists and scholars located in schools of law and education One of the pleasures of the volume is the wide range of topics times and locales addressed by the authors In all these diverse situations the application of institutional queries and approaches enhances our understanding and appreciation of the endlessly rich and diverse nature of social life

Contemporary Society This admirable book makes a strong contribution to institutional theory has many excellent chapters and is a model for interdisciplinary exchange and cross fertilization It is dense with interesting ideas and points for debate and I heartily recommend it

Environmental Agreements on Climate Change Carlo Carraro, 2013-06-29 Climate change is one of the major environmental concern of many countries in the world Negotiations to control potential climate changes have been taking place from Rio to Kyoto for the last five years There is a widespread consciousness that the risk of incurring in relevant economic and environmental losses due to climate change is high Scientific analyses have become more and more precise on the likely impacts of climate change According to the Second Assessment Report of the Intergovernmental Panel on Climate Change current trends in greenhouse gases GHGs emissions may indeed cause the average global temperature to increase by 1.3 to 5.8°C

over the next 100 years As a result sea levels are expected to rise by 15 to 95 cm and climate zones to shift towards the poles by 150 to 550 km in mid latitudes In order to mitigate the adverse effects of climate change the IPCC report concludes that a stabilization of atmospheric concentration of carbon dioxide one of the major GHGs at 550 parts per million by volume ppmv is recommended This would imply a reduction of global emissions of about 50 per cent with respect to current levels In this context countries are negotiating to achieve a world wide agreement on GHGs emissions control in order to stabilize climate changes Despite the agreement on targets achieved in Kyoto many issues still remain unresolved

The Economics of International Environmental Agreements Amitrajeet Batabyal, 2017-12-04 This title was first published in 2000 Conflicts between developed and developing countries over global environmental problems and the fact that the co operation required to solve environmental collective action problems is typically elusive in the world of international relations suggests a research agenda regarding how one might hope to bring about co operation in an inherently non co operative international setting In particular what can economic theory tell us about the design of international environmental agreements IEAs that will protect the world's fragile environmental resources This book collects work on IEAs which demonstrates the value of rigorous microeconomic and econometric modelling in comprehending the many and varied facets of the design and implementation in IEAs

Elinor Ostrom and the Bloomington School of Political Economy Daniel H. Cole, Michael D. McGinnis, 2014-12-24 Elinor Lin Ostrom was awarded the 2009 Nobel Memorial Prize in Economic Sciences for her pathbreaking research on economic governance especially the commons but she also made important contributions to several other fields of political economy and public policy The range of topics she covered and the multiple methods she used might convey the mistaken impression that her body of work is disjointed and incoherent This four volume compendium of papers written by Lin alone or with various coauthors most notably including her husband and partner Vincent supplemented by others expanding on their work brings together the common strands of research that serve to tie her impressive oeuvre together That oeuvre together with Vincent's own impressive body of work has come to define a distinctive school of political economic thought the Bloomington School Each of the four volumes is organized around a central theme of Lin's work Volume 1 explores the roles played by the concept polycentricity in the disciplines of public administration political science and other forms of political economy Polycentricity denotes a complex system of governance in which public authorities citizens and private organizations work together to establish and enforce the rules that guide their behavior It encapsulates an approach toward policy analysis that blurs standard disciplinary boundaries between the social sciences Throughout their long and remarkably productive careers Elinor and Vincent Ostrom never tired of reminding us of the capacity of ordinary humans to transcend their own limitations by engaging with others in the myriad forms of collective action required to build and sustain a self governing society Their careers stand as exemplars of the proper relationship between rigorous scholarship and responsible citizenship
