**Turkic Council Countries: Infrastructure, Trade, Logistics and Transportation** Mahir Humbatov, Kazim Sari, 2017-11-17 The Cooperation Council of Turkic Speaking States the Turkic Council TC was established in 2009 as an intergovernmental organization to promote multilateral cooperation among Turkic Speaking States The four founding member states of the TC are Azerbaijan Kazakhstan Kyrgyzstan and Turkey In addition Uzbekistan and Turkmenistan are two possible future members of the council This study aims to investigate the infrastructural investment trade logistics and transportation potential of the mentioned countries as well as elaborate these activities among the TC s current and possible future members For this purpose firstly present situation of the trade among the Council s current and possible future members has been examined At this point it is made clear that the trade volume among these six states is not as much as expected but it is open to healing Later the

opportunities and the last developments that may increase the trade volume among the TC's current and possible future members in line with advancement of their infrastructural potential are explored. In reality, the geographic location of these states is very good. Namely, they are on the old trade route known as the Silk Road channels; however, this road was not active for a long time. Recently, this ancient trade route between East and West was aimed to be revived by China. Besides, India is keen to develop another approach of the Silk Road under the International North-South Transportation Corridor (INSTC) initiative. In fact, these are great opportunities for the TC's current and possible future members. That is, there is a very large volume of trade between China and Europe, and currently almost all of this trade is done through sea transport. Hence, if even a small part of this trade is transported by the Chinese Initiative of the Silk Road, its contribution to the current and potential future members of the TC and their integration into each other will be great. However, at this point, there are some tasks that current and potential members of the TC must complete to mobilize the Silk Roads. In fact, opening of Baku-Tbilisi-Kars-BTK rail link recently was an important step to make it active, but this is not fully enough. In this work, it is also aimed to set out these tasks from the perspective of each current and potential member. Finally, with the help of this review, the limitations and problems of each state's infrastructural investment, trade, transport, and logistics system have been put forward for improvement studies.

#### **Diversifying Kazakhstan's Exports Institutions, Policies, Infrastructures**

OECD, 2024-06-25 Kazakhstan's trade performance has displayed remarkable resilience to recent economic shocks, including Russia's full-scale invasion of Ukraine and the ensuing international sanctions. However, connectivity remains one of the greatest challenges facing the country; its trade integration is limited by low density of settlement and economic activity, infrastructure bottlenecks, weaknesses in trade facilitation, and long distances to major markets. Its economy still depends on a limited number of export commodities and a narrow range of trading partners. This report summarises the analytical guidance and capacity building on export diversification in Kazakhstan provided by the OECD in 2022 and 2023. The report complements recent OECD work on trade connectivity in Central Asia by focusing on practical aspects of export diversification identified in collaboration with the government of Kazakhstan: i) how to develop export promotion policies for SMEs; ii) how to design a one-stop shop for exporting SMEs; and iii) how to improve cross-border co-operation in Kazakhstan's Caspian Sea ports.
