Ecology Of Red Deer A Research Review Relevant To Their Management In Scotland:

Ecology of Red Deer Brian Mitchell, Brian W. Staines, David Welch, 1977 **Ecology and Management of Coppice Woodlands** G.P. Buckley, 2012-12-06 Contributed to by leading experts this book looks at the history of coppice woodlands their physical environment the different management techniques used and their effects on the flora and fauna The implications of this for conservation is controversial and this is debated in a lively way in many of the chapters

Conservation and the Use of Wildlife Resources Melvin Bolton, 2012-12-06 Not everybody cares about the fate of wild animals or the state of the natural environment I met a lady who said it wouldn't worry her if all the wild animals in the world disappeared overnight She was a city person she said There are also people who would prefer to let animals become extinct than to have them kept in captivity no matter how progressive the zoo There are those who on principle will not eat meat let alone do the killing and there are those who enjoy nothing so much as shooting birds People in the last two camps may oppose each other in claiming to be conservationists Extremists are unlikely to find their opinions being reversed by this book but because of the scope of the subject I believe there is a good chance that anybody with an interest in wildlife will find in it something new to think about It may not be too much to hope that a few disagreements might also be settled because I suspect there is more common ground than is generally realized among those with opposing views *Long-Term Studies in Ecology* Gene E. Likens, 2012-12-06 The Cary Conferences as we have envisaged them are different from most scientific meetings in that they provide a forum for major issues in ecology from a more philosophical point of view It appears to many of us that ecologists have limited opportunities to come together in small groups to address in a more philosophical way some of the major questions and issues that matter very much to the future of humankind and to us as ecologists Moreover we hope that the setting of the Mary Flagler Cary Arboretum promotes strong interaction and discussion between Conference participants with a minimum of distraction We are proud to make our facilities available for such meetings and we hope that over the years these Conferences might provide direction and leadership for the whole field of ecology We have the broad goal of attempting to advance the field of ecology by bringing together leading ecologists and other scientists to address major issues The first Cary Conference in 1985 considered the status and future of ecosystem science This first Conference was rather loosely structured but was successful in stimulating discussion ideas and enthusiasm Likens et al 1987 The goals for this second Cary Conference in 1987 were 1 to identify the roles of long term studies in ecology 2 to identify the options for study of long term ecological phenomena 3 European Ungulates and Their Management in the 21st Century Marco Apollonio, Reidar Andersen, Rory Putman, 2010-02-04 The first book to summarise management objectives for ungulates across Europe *Advances in Ecological Research*, 1987-04-14 *Advances in Ecological Research* first published in 1962 is one of Academic Press's most successful and prestigious series In 1999 the Institute for Scientific Information released figures showing that the serial has an Impact Factor of 9.6 with a half life of 10.0 years placing it 1st in

the highly competitive category of Ecology The Editors have always striven to provide a wide range of top quality papers on all aspects of ecology such as animal plant physiology population community landscape and ecosystem ecology Eclectic volumes in the serial are supplemented by thematic volumes on such topics as Estuaries and Ancient Lakes Now edited by Dr Hal Caswell of Woods Hole Oceanographic Institution Advances in Ecological Research continues to publish topical and important reviews interpreting ecology as widely as in the past to include all material that contributes to our understanding of the field

Grand Teton National Park (N.P.), Bison and Elk Management Plan, 2005

The Ecology, Land Use and Conservation of the Cairngorms C. H. Gimingham, 2002 A study by many experts on that mountain area of Scotland threatened by tourism and skiing developments

The Ecology of Poole Harbour V.J. May, John Humphreys, 2005-08-24

Poole Harbour's unique combination of physical characteristics provide for a rich and productive ecological community recognised for its internationally significant bird populations and as a haven for the naturalisation of exotic species But the Harbour is also exceptional in the extent to which it represents in microcosm the world wide tensions between environment and development The contrasts are sometimes startling the narrow Harbour entrance separates an unspoilt natural environment of considerable importance from an urban landscape where property competes with Manhattan and Hong Kong Island in the world wide table of real estate values The Harbour serves as a port fishing ground a receiver of effluent and increasingly as a playground for the affluent It also lies above Europe's largest on shore oil field The Ecology of Poole Harbour brings together for the first time expert contributions in such a way as to provide a picture of the ecology of the Harbour system as a whole It covers all the major habitats from reed beds and salt marshes to the extensive mudflats and unseen sub tidal regions while also examining in some detail a wide range of ecological phenomena and issues First expert overview of ecology of Poole Harbour as a whole

Grazing and Conservation Management Michiel F. WallisDe Vries, Jan P. Bakker, Sipke E. Van Wieren, 2012-12-06 Grazing animals enjoy an ambiguous reputation in the field of nature conservation Livestock are often treated as a scourge yet native large herbivores form the prime attraction of many a reserve This book gives the first comprehensive overview of the use of grazing as a tool in conservation management Considering in turn the ecological and historical background the impact of grazing on community structure management applications and future prospects this book examines issues such as the role of herbivores as keystone species the assessment of habitat quality and the function of scientific models in advancing grazing management Large herbivores are shown to be potentially powerful allies in the management of nature reserves particularly in the maintenance enhancement or restoration of biodiversity Grazing and Conservation Management will appeal to conservation biologists and rangeland managers providing them with a clearer understanding of grazing and conservation management

Mammals as Pests Rory Putman, 1989-06-30 The aim of this book is to re evaluate the true pest status of many common species traditionally regarded as pests It is based on a revised selection of papers presented at a symposium organized by the Mammal Society in London November 1987

The

Management of Red Deer in Upland Forests P. R. Ratcliffe, 1987 **Soil Degradation in Simple Oak Coppice Forests of the Ahr-Eifel** Dirk Mohr, 2004 **Mammal Ecology** M.J. Delany, 2013-06-29 **Wildlife Review**, 1986 **The Ecology of Woodland Creation** Richard Ferris-Kaan, 1995-06-08 Opportunities exist for tree planting on better quality land often arable land taken out of agricultural production and areas on the urban fringe in many industrialised countries where the proportion of wooded land is small and of a fragmented nature With concerns about worldwide loss of biodiversity planners and practitioners are increasingly required to design establish and manage more diverse woodlands for multiple objectives Although much has been written about techniques for successful tree establishment little attention has been paid to the many ecological factors which influence the development of new woodland The Ecology of Woodland Creation is a comprehensive book which tackles important ecological issues including the ethics of woodland creation the types of woodland species considerations the influence of new woodlands on the diversity and distribution of plant and animal species and how ecological principles can be integrated with the planning process Following on from a highly successful Symposium of the British Ecological Society's Forest Ecology Group this book is an invaluable source of practical information for professionals and students of ecology conservation land use planning and forestry **An Archaeology of Materials** Chantal Conneller, 2012-03-28 An Archaeology of Materials sets out a new approach to the study of raw materials Traditional understandings of materials in archaeology and in western thought more widely have failed to acknowledge both the complexity and moreover the benefits of an analysis of materials Here Conneller argues that materials cannot be understood independently of the practices through which they are constituted Drawing on a number of different thinkers and using case studies from the European early Prehistoric period she investigates how we can rethink the properties of matter and the relationship of material and form What emerges from this book is the variability and the specificity of human material interactions and the rather more active role that matter plays in these than traditionally conceived Rather than being insignificant a formless substrate or simply a constraint to human action it is argued that materials are more fundamental Tracing the processes by which the properties of past materials emerge reveals the working of past worlds particularly articulations of the cultural the natural and the supernatural This book will establish a new perspective on the meaning and significance of materials particularly those involved in mundane daily usage and will be a timely addition to the literature on technologies and materials **Social Zooarchaeology** Nerissa Russell, 2011-11-14 This is the first book to provide a systematic overview of social zooarchaeology which takes a holistic view of human animal relations in the past Until recently archaeological analysis of faunal evidence has primarily focused on the role of animals in the human diet and subsistence economy This book however argues that animals have always played many more roles in human societies as wealth companions spirit helpers sacrificial victims totems centerpieces of feasts objects of taboos and more These social factors are as significant as taphonomic processes in shaping animal bone assemblages Nerissa Russell uses evidence derived from not

only zooarchaeology but also ethnography history and classical studies to suggest the range of human animal relationships and to examine their importance in human society Through exploring the significance of animals to ancient humans this book provides a richer picture of past societies **A Viking Way of Life** Steven P. Ashby, 2014-01-15 An engaging look at life in the Viking Age **Upland Habitats** Alan F. Fielding, Paul F. Haworth, 2002-01-31 Upland Habitats presents a comprehensive illustrated guide to the habits wildlife and conservation of Britains last wilderness areas These include heather moors sheep walk deer forest blanket bogs montane and sub montane forests The book examines the unique characteristics of uplands and the ecological processes and historical events that have shaped them since the end of the last glaciaton Among the key conservation and management issues explored in are modern agricultural practices and economics habitat degradation through overgrazing commercial forest plantations the persecution of wildlife recreation in the uplands the funding of upland farming
