## **Economic Analyses At Epa Assessing Regulatory Impact:**

**Economic Analyses at EPA** Richard D. Morgenstern, 2014-04-04 For years the Environmental Protection Agency has been conducting programmatic economic analyses also known as Regulatory Impact Analyses RIAs to assess the economic effects of its regulatory efforts This important volume explains the purpose of these analyses along with their design execution conclusions and their ultimate impact on environmental rules Richard Morgenstern formerly director of EPA's Office of Policy Analysis has assembled twelve original case studies of RIAs performed over the past decade on matters such as lead in gasoline ozone depletion asbestos clean drinking water and sewage management The contributors most of whom actually worked on these RIAs provide detailed examination of why and how they were performed The case studies critique the nature amount and quality of data used by the EPA in their benefit cost and cost effectiveness analyses as well as the use or abuse of the results in final decisionmaking The authors illustrate how the analyses take into account difficult issues such as discounting risk nonmonetized benefits and costs and equity Morgenstern provides the necessary historical context and the legal framework for requiring and conducting EAs He describes new procedures outlined by the Clinton administration and synthesizes the case studies into thoughtful cross cutting conclusions drawing important lessons that will improve future analyses

**Cost-Benefit Analysis and Public Policy** David Weimer, 2009-04-22 This volume seeks to facilitate such exposure by drawing together into a convenient collection the fine articles on CBA and its application that have appeared in the *Journal of Policy Analysis and Management* JPAM *Information Resources in Toxicology* Philip Wexler, 2000 History K D Watson P Wexler and J Everitt Highlights in the History of Toxicology Selected References in the History of Toxicology A Historical Perspective of Toxicology Information Systems Books and Special Documents G L Kennedy Jr P Wexler N S Selzer and L A Malley General Texts Analytical Toxicology Animals in Research Biomonitoring Biomarkers Biotechnology Biotoxins Cancer Chemical Compendia Chemical Cosmetics and Other Consumer Products Chemical Drugs Chemical Dust and Fibers Chemical Metals Chemicals Pesticides Chemicals Solvents Chemical Selected Chemicals Clinical Toxicology Developmental and Reproductive Toxicology Environmental Toxicology General Environmental Toxicology Aquatic Environmental Toxicology Atmospheric Environmental Toxicology Hazardous Waste Environmental Toxicology Terrestrial Environmental Toxicology Wildlife Ep

**Handbook of Law and Economics** A. Mitchell Polinsky, Steven Shavell, 2007-11-21 Law can be viewed as a body of rules and legal sanctions that channel behavior in socially desirable directions for example by encouraging individuals to take proper precautions to prevent accidents or by discouraging competitors from colluding to raise prices The incentives created by the legal system are thus a natural subject of study by economists Moreover given the importance of law to the welfare of societies the economic analysis of law merits prominent treatment as a subdiscipline of economics Our hope is that this two volume Handbook will foster the study of the legal system by economists The two volumes form a comprehensive and accessible survey of the current state of the field Chapters prepared by leading specialists of the area

Summarizes received results as well as new developments

**The International Yearbook of Environmental and Resource Economics 2006/2007** Henk Folmer, Thomas H. Tietenberg, 2006 This major annual publication presents a comprehensive overview of cutting edge issues in environmental and resource economics The expert contributors address some of today s most pressing environmental concerns including pollution control policies Graphical Information Systems GIS and spatial analysis disclosure strategies for pollution control environmental policy under imperfect competition transport and the environment optimal forest harvesting The Yearbook is an essential resource for economists scholars and practitioners working in environmental and resource economics

**Fifty Years at the US Environmental Protection Agency** A. James Barnes, John D. Graham, David M. Konisky, 2021-02-15 In conjunction with the 50th anniversary of the creation of the Environmental Protection Agency this book brings together leading scholars and EPA veterans to provide a comprehensive assessment of the agency s key decisions and actions in the various areas of its responsibility Themes across all chapters include the role of rulemaking negotiation compromise partisan polarization judicial impacts relations with the White House and Congress public opinion interest group pressures environmental enforcement environmental justice risk assessment and interagency conflict As no other book on the market currently discusses EPA with this focus or scope the authors have set out to provide a comprehensive analysis of the agency s rich 50 year history for academics students professional and the environmental community

**Reality Check** Richard D. Morgenstern, William A. Pizer, 2010-09-30 Since the early 1990s voluntary programs have played an increasingly prominent role in environmental management in the U S and other industrialized countries Programs have attempted to address problems ranging from climate change and energy efficiency to more localized air and water pollution problems But do they work Despite a growing theoretical literature there is limited empirical evidence on their success or the situations most conducive to the approaches Even less is known about their cost effectiveness Getting credible answers is important Research to date has been largely limited to individual programs This innovative book seeks to clarify what is known by looking at a range of program types including different approaches adopted in different nations The focus is on assessing actual performance via seven case studies including the U S Climate Wise program the U S EPA s 33 50 program on toxic chemicals the U K Climate Change Agreements and the Keidanren Voluntary Action Plan in Japan The central goals of Reality Check are understanding outcomes and more specifically the relationship between outcomes and design By including in depth analyses by experts from the U S Europe and Japan the book advances scholarship and provides practical information for the future design of voluntary programs to stakeholders and policymakers on all sides of the Atlantic and Pacific

**Water Resource Economics and Policy** W. D. A Good Life on a Finite Earth Daniel J. Fiorino,2017-12-01 The potential conflict among economic and ecological goals has formed the central fault line of environmental politics in the United States and most other countries since the 1970s The accepted view is that efforts to protect the environment will detract from economic growth jobs and global competitiveness Conversely much advocacy on behalf of the environment focuses on the need to control growth and avoid its more damaging effects This offers a stark choice between prosperity and growth on the one hand and ecological degradation on the other Stopping or reversing growth in most countries is unrealistic economically risky politically difficult and is likely to harm the very groups that should be protected At the same time a strategy of unguided growth above all would cause ecological catastrophe Over the last decade the concept of green growth the idea that the right mix of policies investments and technologies will lead to beneficial growth within ecological limits has become central to global and national debates and policy due to the financial crisis and climate change As Daniel J Fiorino argues in order for green growth to occur ecological goals must be incorporated into the structure of the economic and political systems In this book he looks at green growth a vast topic that has heretofore not been systematically covered in the literature on environmental policy and politics Fiorino looks at its role in global national and local policy making its relationship to sustainable development controversies surrounding it both from the left and right its potential role in ameliorating inequality and the policy strategies that are linked with it The book also examines the political feasibility of green growth as a policy framework While he focuses on the United States Fiorino will draw comparisons to green growth policy in other countries including Germany China and Brazil

*Science for Environmental Protection* National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Committee on Science for EPA's Future,2012-12-21 In anticipation of future environmental science and engineering challenges and technologic advances EPA

asked the National Research Council NRC to assess the overall capabilities of the agency to develop obtain and use the best available scientific and technologic information and tools to meet persistent emerging and future mission challenges and opportunities Although the committee cannot predict with certainty what new environmental problems EPA will face in the next 10 years or more it worked to identify some of the common drivers and common characteristics of problems that are likely to occur Tensions inherent to the structure of EPA s work contribute to the current and persistent challenges faced by the agency and meeting those challenges will require development of leading edge scientific methods tools and technologies and a more deliberate approach to systems thinking and interdisciplinary science Science for Environmental Protection The Road Ahead outlines a framework for building science for environmental protection in the 21st century and identified key areas where enhanced leadership and capacity can strengthen the agency s abilities to address current and emerging environmental challenges as well as take advantage of new tools and technologies to address them The foundation of EPA science is strong but the agency needs to continue to address numerous present and future challenges if it is to maintain its science leadership and meet its expanding mandates Pollution Control in United States J. Clarence Davies,2014-04-04 Pollution control a key component of U S environmental policy has made important progress in recent decades Yet important problems remain and there is need for improvement in the pollution control regulatory system This book is the most extensive evaluation of that system ever produced It reveals many strengths and accomplishments but also illustrates serious shortcomings and the need for reform The volume emerges from three years of research on a fragmented system of institutions statutes and procedures that is often inefficient and ineffective hobbled by misplaced priorities Part I provides an in depth description of this system centered on the federal Environmental Protection Agency and the labyrinthine laws it must implement The authors evaluate the federal legislation administrative decisionmaking and the state federal division of labor that defines the system Davies and Mazurek assess the effectiveness and efficiency of U S pollution control They discuss the performance of U S laws and regulations in comparison with those of other nations assess the ability of the U S pollution control system to meet future problems and consider proposals for reform and repair Within this far reaching analysis they include criteria that are often overlooked by policymakers and analysts including social values equity nonintrusiveness and public participation Choosing Environmental Policy Winston Harrington,Richard D. Morgenstern,Thomas Sterner,2010-09-30 The two distinct approaches to environmental policy include direct regulation sometimes called command and control policies and regulation by economic or market based incentives This book is the first to compare the costs and outcomes of these approaches by examining realworld applications In a unique format paired case studies from the United States and Europe contrast direct regulation on one side of the Atlantic with an incentivebased policy on the other For example Germany s direct regulation of SO<sub>2</sub> emissions is compared with an incentive approach in the U S Direct regulation of water pollution via the U S Clean Water Act is contrasted with Hollands incentive based fee system

Additional studies contrast solutions for eliminating leaded gasoline and reducing nitrogen oxide emissions CFCs and chlorinated solvents The cases presented in *Choosing Environmental Policy* were selected to allow the sharpest most direct comparisons of direct regulation and incentive based strategies In practice environmental policy is often a mix of both types of instruments This innovative investigation will interest scholars students and policymakers who want more precise information as to what kind of blend will yield the most effective policy Are incentive instruments more efficient than regulatory ones Do regulatory policies necessarily have higher administrative costs Are incentive policies more difficult to monitor Are firms more likely to oppose market based instruments or traditional regulation These are some of the important questions the authors address often with surprising results *The Salton Sea Centennial Symposium* Stuart H. Hurlbert, 2009-01-29 This volume deals with many aspects of the physical and chemical limnology of the Salton Sea California's largest lake and a lake that may soon to be the object of a multi billion dollar restoration project Formed in 1905 by an accidental breaching of outtake structures on the Colorado River and maintained since then by large and steady inflows of agricultural wastewaters it has long served as an important habitat for fish and waterbirds and as a major recreational area for people Highly eutrophic and with a salinity that is steadily rising and now nearly 50 g L it is a lake in great trouble Most fish species have disappeared and large fish and bird dieoffs have been common in recent decades Many of the papers in this volume represent studies undertaken with the aim of informing the re engineering of this ecosystem so that its value to wildlife and man can be restored or enhanced **Interim Report on the Administrative Law, Process and Procedure Project for the 21st Century** United States. Congress. House. Committee on the Judiciary. Subcommittee on Commercial and Administrative Law, 2007 *Environmental Policy* Norman J. Vig, Michael E. Kraft, Barry G. Rabe, 2021-01-08 Authoritative and trusted *Environmental Policy* once again brings together top scholars to evaluate the changes and continuities in American environmental policy since the late 1960s and their implications for the twenty first century Students will learn to decipher the underlying trends institutional constraints and policy dilemmas that shape today's environmental politics The Eleventh Edition examines how policy has changed within federal institutions and state and local governments as well as how environmental governance affects private sector policies and practices There are five new chapters in this edition that examine the public's opinion on the environment courts energy policy natural resource agencies and policies and the political economy of green growth The book has been updated to reflect the Trump administration's four years of policy changes and students will walk away with a measured yet hopeful evaluation of the future challenges that policymakers will confront as the American environmental movement continues to affect the political process *The Promise and Peril of Environmental Justice* Christopher H. Foreman, 2011-02-01 Are we environmentally victimizing perhaps even poisoning our minority and low income citizens Proponents of environmental justice assert that environmental decisionmaking pays insufficient heed to the interests of those citizens disproportionately burdens their neighborhoods with

hazardous toxins and perpetuates an insidious environmental racism In the first book length critique of environmental justice advocacy Christopher Foreman argues that it has cleared significant political hurdles but displays substantial limitations and drawbacks Activism has yielded a presidential executive order management reforms at the Environmental Protection Agency and numerous local political victories Yet the environmental justice movement is structurally and ideologically unable to generate a focused policy agenda The movement refuses to confront the need for environmental priorities and trade offs politically inconvenient facts about environmental health risks and the limits of an environmental approach to social justice Ironically environmental justice advocacy may also threaten the very constituencies it aspires to serve distracting attention from the many significant health hazards challenging minority and disadvantaged populations Foreman recommends specific institutional reforms intended to recast the national dialogue about the stakes of these populations in environmental protection

Information for States on Developing Affordability Criteria for Drinking Water ,1998      Strategic Environmental Assessment for Policies Kulsum Ahmed,Ernesto Sanchez-Triana,2008-04-30 Environmentally and socially sustainable policies are essential for good governance Strategic Environmental Assessment SEA is the key tool for integrating environmental considerations into policies programs and plans This book focuses on SEA applied to policies Through lessons learned from previous use of SEA on policies it draws lessons on the strengths and weaknesses of current SEA methodology It then goes on to analyze how policies are formulated and implemented and proposes a new conceptual framework for conducting SEA of policies thatpotentially could be more useful in influencing decision makers to integrate environmental sustainability considerations into policy formulation and implementation

**Handbook of Environmental Economics** Karl-Goran Maler,Jeffrey R. Vincent,2003-05-20 The Handbook of Environmental Economics focuses on the economics of environmental externalities and environmental public goods Volume I examines environmental degradation and policy responses from a microeconomic institutional standpoint Its perspective is dynamic including a consideration of the dynamics of natural systems and global with attention paid to issues in both rich and poor nations In addition to chapters on well established topics such as the theory and practice of pollution regulation it includes chapters on new areas of environmental economics research related to common property management regimes population and poverty mechanism design political economy of regulation experimental evaluations of policy instruments and technological change
