## **Economic Fictions:**

**The Fictions of American Capitalism** Jacques-Henri Coste, Vincent Dussol, 2020-02-26 The Fictions of American Capitalism Working Fictions and the Economic Novel introduces a new way of thinking about fiction in connection with capitalism especially American capitalism These essays demonstrate how fiction fulfills a major function of the American capitalist engine presenting various formulations of American capitalism from the perspective of economists social scientists and literary critics Focusing on three narratives fictitious capital working fictions and the economic novel the volume questions whether these three types of fiction can be linked under the sign of capitalism This collection seeks to illustrate the American economy's dependence on fictitiousness America's ideological fictions and the nation's creative literary fiction In relation to what the credit and banking crisis of 2007-2008 exposed about the unreal base of the economy the volume concludes with a call to recognize the economic humanities arguing that American fiction and American literary studies can provide a useful mirror for economists

*Fiction and Economy* S. Bruce, V. Wagner, 2007-06-15 This volume brings together essays on the relations between fiction and the economy all established or emergent scholars from different fields of expertise The essays range widely in their respective foci extending beyond purely literary studies to encompass history the history of language studies in the visual arts and philosophy

The Routledge Companion to Literature and Economics Matt Seybold, Michelle Chihara, 2018-09-17 The study of literature and economics is by no means a new one but since the financial crash of 2008 the field has grown considerably with a broad range of both fiction and criticism The Routledge Companion to Literature and Economics is the first authoritative guide tying together the seemingly disparate areas of literature and economics Drawing together 38 critics the Companion offers both an introduction and a springboard to this sometimes complex but highly relevant field With sections on Critical traditions Histories Principles and Contemporary culture the book looks at examples from Medieval and Renaissance literature through to poetry of the Great Depression and novels depicting the 2008 financial crisis Covering topics from Austen to austerity Marxism to modernism the collated essays offer indispensable analysis of the relationship between literary studies and the economy Representing a wide spectrum of approaches this book introduces the basics of economics while engaging with essential theory and debate As the reality of economic hardship and disparity is widely acknowledged and spreads across disciplines this Companion offers students and scholars a chance to enter this crucially important interdisciplinary area

**Finance Fictions** Arne De Boever, 2018-03-06 Finance Fictions takes the measure of what it means to live in a world ruled by high finance by examining the tension between psychosis and realism that plays out in the contemporary finance novel When the things traded at the center of the economy cease to be things at all but highly abstracted speculations how do we come to see the real What sorts of narrative can accurately approach the actual workings of a neoliberal economy marked by accelerating cycles of market crashes economic and political crisis and austerity Revisiting such twentieth century classics of the genre as Tom Wolfe's Bonfire of

the Vanities and Bret Easton Ellis's *American Psycho* De Boever argues that the twenty first century is witnessing the birth of a new kind of realistic novel that can make sense of complex financial instruments like collateralized debt obligations credit default swaps and digital algorithms operating at speeds faster than what human beings or computers can record If in 1989 Wolfe could still urge novelists to work harder to tame the billion footed beast of reality today's economic reality confronts us with a difference that is qualitative rather than quantitative a new financial ontology requiring new modes of thinking and writing Mobilizing the philosophical thought of Quentin Meillassoux in the close reading of finance novels by Robert Harris Michel Houellebecq Ben Lerner and less well known works of conceptual writing such as Mathew Timmons *Credit Finance Fictions* argues that realism is in for a speculative update if it wants to take on the contemporary economy and if whose implications turn out to be deeply political Part literary study and part philosophical inquiry *Finance Fictions* seeks to contribute to a new mindset for creative and critical work on finance in the twenty first century *Economic Science Fictions* William Davies, 2019-02-19 An innovative new anthology exploring how science fiction can motivate new approaches to economics From the libertarian economics of Ayn Rand to Aldous Huxley's consumerist dystopias economics and science fiction have often orbited each other In *Economic Science Fictions* editor William Davies has deliberately merged the two worlds asking how we might harness the power of the utopian imagination to revitalize economic thinking Rooted in the sense that our current economic reality is no longer credible or viable this collection treats our economy as a series of fictions and science fiction as a means of anticipating different economic futures It asks how science fiction can motivate new approaches to economics and provides surprising new syntheses merging social science with fiction design with politics scholarship with experimental forms With an opening chapter from Ha Joon Chang as well as theory short stories and reflections on design this book from Goldsmiths Press challenges and changes the notion that economics and science fiction are worlds apart The result is a wealth of fresh and unusual perspectives for anyone who believes the economy is too important to be left solely to economists Contributors AUDINT Khairani Barokka Carina Brand Ha Joon Chang Miriam Cherry William Davies Mark Fisher Dan Gavshon Brady and James Pockson Owen Hatherley Laura Horn Tim Jackson Mark Johnson Bastien Kerspern Nora O Murch Tobias Revell et al Judy Thorne Sherryl Vint Joseph Walton Brian Willems *American Literature and the Free Market, 1945-2000* Michael W. Clune, 2010 This book considers the fascination with the free market and the economic world evident within postwar literature **Speculative Fictions** Elizabeth Hewitt, 2020 *Speculative Fictions* places Alexander Hamilton at the center of American literary history to consider the important intersections between economics and literature By studying Hamilton as an economic and imaginative writer it argues that we can recast the conflict with the Jeffersonians as a literary debate about the best way to explain and describe modern capitalism and explores how various other literary forms allow us to comprehend the complexities of a modern global economy in entirely new ways *Speculative Fictions* identifies two overlooked literary genres of the late eighteenth century as exemplary of this narrative

mode It asks that we read periodical essays and Black Atlantic captivity narratives with an eye not towards bourgeois subject formation but as descriptive analyses of economic systems In doing so we discover how these two literary genres offer very different portraits of a global economy than that rendered by the novel the imaginative genre we are most likely to associate with modern capitalism Developing an aesthetic appreciation for the speculative digressive and unsystematic plotlines of these earlier narratives has the capacity to generate new imaginative projects with which to make sense of our increasingly difficult economic world

*Uncertainty in Economics* Julia Köhn, 2017-07-04 In this book the author develops a new approach to uncertainty in economics which calls for a fundamental change in the methodology of economics It provides a comprehensive overview and critical appraisal of the economic theory of uncertainty and shows that uncertainty was originally conceptualized both as an epistemic and an ontological problem As a result of the economic professions attempt to become acknowledged as a science the more problematic aspect of ontological uncertainty has been neglected and the subjective probability approach to uncertainty became dominant in economic theory A careful analysis of ontological theories of uncertainty explains the blindness of modern economics to economic phenomena such as instability slumps or excessive booms Based on these findings the author develops a new approach that legitimizes a New Uncertainty Paradigm in economics

range of his critics relate to the philosopher's contribution to legal and democratic theory in his recently published *Between Facts and Norms*. Drawing upon his discourse theory, Habermas has elaborated a novel and powerful account of law that purports to bridge the gap between democracy and rights by conceiving law to be at once self-imposed and binding. In the first essay, Habermas himself succinctly presents the centerpiece of his theory: his proceduralist paradigm of law. The following essays comprise elaborations, criticisms, and further explorations by others of the most salient issues addressed in his

**Spectacular Speculation** Urs Stäheli, 2013-02-20 *Spectacular Speculation* is a history and sociological analysis of the semantics of speculation from 1870 to 1930 when speculation began to assume enormous importance in popular culture. Informed by the work of Luhmann, Foucault, Simmel, and Deleuze, it looks at how speculation was translated into popular knowledge and charts the discursive struggles of making speculation a legitimate economic practice. Noting that the vocabulary available to discuss the concept was not properly economic, the book reveals the underside of putting it into words. Speculation's success depended upon non-economic language and morally questionable thrills: a proximity to the wasteful practice of gambling or other degenerate behaviors; the experience of financial markets as seductive or out of control. American discourses of speculation take center stage, and the book covers an unusual range of material, including stock exchange guidebooks, ticker tape, moral treatises, plays, advertisements, and newspapers.

**Political Economy, Literature & the Formation of Knowledge, 1720-1850** Richard Adelman, Catherine Packham, 2018-03-09 This edited collection *Political Economy Literature* represents in and of political economy, abstraction, and political economy, fictional mediations, and interrogations of political economy and political economy and its others, including political economy and affect, and political economy and the aesthetic. Essays presented in this text are at once historical and conceptual in focus and manifest literary, critical, disciplinary expertise whilst being of genuinely broad and interdisciplinary interest. Amongst the writers whose work is addressed are Charles Dickens, Elizabeth Gaskell, David Hume, Thomas Malthus, Jane Marcet, J. S. Mill, David Ricardo, and Adam Smith. The introduction by the editors sets up the conceptual, theoretical, and analytical framework explored by each of the essays. The final essay and response bring the concerns of the volume up to date by engaging with current economic and financial realities by respectively showing how an informed and critical history of political economy could transform current economic practices and by exploring the abundance of recent conceptual art addressing representation and the unrepresentable in economic practice.
