Why Aren't They There? Didier Ruedin,2014-01-01 Why Aren't They There is a comprehensive study of political representation in a cross-national format, making a cross-country comparison of the representation of women, ethnic groups and policy positions. It includes an analysis of the representation of women over time and presents a critical view of the effectiveness of quotas. Using new data on ethnic groups in legislatures, it makes a significant step forward in the analysis of political representation. The representation of issue positions is examined in eight policy domains, and the book's systematic approach allows a groundbreaking examination of how different forms of representation, women, ethnic groups, issue positions are interlinked. Didier Ruedin examines aspects unattainable in studies focusing only on a single form of representation. The result is a comprehensive understanding of political representation and important and policy-relevant insights for electoral engineering. **Economics of Natural & Environmental Resources (Routledge Revivals)** Vernon Smith,2013-08-15

First written in 1977, *Economics of Natural and Environmental Resources* presents a collection of articles written in exploration of the economic, social and ecological problems peculiar to natural and environmental resources. Whilst focusing on the economic theory of natural resources, the contributions also consider geological, technological and institutional features of particular resources. Policy implications and considerations are central to the text, and although the book was published over thirty years ago, the issues discussed remain relevant to today's society.
