Reconstruction of Economic Theory Philip Mirowski,2007-06-30 The mandate given to the editor of the present volume was succinct and to the point gather together some of the most recent attempts to remake economic theory at its most fundamental levels and avoid the two debased brands of academic revolutions Now anyone would have realized that this would be a devilishly difficult task more likely than not to backfire but in retrospect the editor still marvels at the complacency with which he embarked on the enterprise It was quite easy to identify the critics of conventional economics who had little more than criticism to offer it was much more difficult to feel certain that he had actually stumbled upon a substantive divergence from the orthodoxy that appeared to promise further fruitful developments Forewarned and forearmed the prospective reader should then be equipped to judge for him or herself whether truth in advertising has been further abused or if something a little more interesting and entertaining is afoot Pages 1 2 Industrial Economics and Management Principles Dr. Rajan Mishra,2008 Rationality and Irrationality in Economics Maurice Godelier,2014-08-26 This book is the result of a research project begun by the author in 1958 with the aim of answering two questions First what is the rationality of the economic systems that appear and disappear throughout history in other words what is their hidden logic and the underlying necessity for them to exist or to have existed Second what are the conditions for a rational

understanding of these systems in other words for a fully developed comparative economic science The field of investigation opened up by these two questions is vast touching on the foundations of social reality and on how to understand them The author being a Marxist sought the answers as he writes not in philosophy or by philosophical means but in and through examining the knowledge accumulated by the sciences The stages of his journey from philosophy to economics and then to anthropology are indicated by the divisions of his book Godelier rejects at the outset any attempt to tackle the question of rationality or irrationality of economic science and of economic realities from the angle of an a priori idea a speculative definition of what is rational Such an approach can yield only he feels an ideological result Rather he treats the appearance and disappearance of social and economic systems in history as being governed by a necessity wholly internal to the concrete structures of social life

**The Principle of Trading Economics** Zhenying Wang,2019-11-23 This book is devoted to establishing a completely new concept within economics referred to as trading economics which is a reconstructed economic system in theory that seeks perfect harmony between micro and macro elements in a structured way hence making the economic theory a rigorous system supported by internal logical continuity Representing a revolution of the existing theoretical framework trading economics has changed the logic of mainstream economics Specifically it deduces the macro whole from the micro individuals and it introduces a systematic and comprehensive analysis approach It stresses that within an interconnected world the interaction between trading agents is the fundamental driving force behind the operation development and evolution of the economic system *Economic History and the Social Sciences* Elias H. Tuma,1971 *From Political Economy to Economics* Dimitris Milonakis,Ben Fine,2009 Shows how economics was once rich diverse multidimensional and pluralistic Details how political

economy became economics through the desocialisation and dehistoricisation of the dismal science      **History, Policy, and Economic Theory** W. W. Rostow, 2019-03-04 This collection of professional essays traces the sequence of the great issues of public policy that marked a half century It includes information on the problems of method issues of historical analysis elaboration of a dynamic theory issues of current policy and evolution of economic doctrine      Institutions, Behaviour and Economic Theory Heinrich Bortis, 1997 This book is about the conceptual foundations of an intermediate way between liberalism and socialism From a standpoint of economic theory this middle way is conceived of as a synthesis of classical Ricardian and Keynesian political economy While the former deals with proportions between individuals or collectives and society in tackling the problems of distribution and value on the basis of the surplus principle the latter is concerned with the scale of economic activity as explained by the principle of effective demand Political economy pictures the economic aspects of the functioning of the institutional system within which the behaviour of individuals is embedded The economy considered is primarily neither a market nor a planned economy but rather a monetary production economy To establish an alternative to liberalism and socialism requires setting up a system of the social sciences In this work suggestions are made for linking political economy with other social sciences i e sociology law and politics in the traditional sense thus establishing the unity of the social sciences In a Keynesian vein the social sciences are conceived of as moral sciences a view which gives rise to a specific philosophy of history To complete the picture issues of method associated with the theory of knowledge in the social sciences and the problem of linking theory with historical reality are also covered      The Environmental Endgame Robert Nadeau, 2006 Makes an original effort to articulate the concerns of scientists in such a way that they become the real life tangible concerns of people around the world This book changes the way we think about our economy our government and the environment It is suitable for those who care about the abuse of planet Earth and what can be done about it
