Nabli,Jeffrey B. Nugent,2022-09-16 This book identifies the differences in growth and development and the various factors lying behind them across both Middle East and North African MENA and East Asian countries over the 1960 2020 period It considers a very wide range of factors compares initial situations institutions and government policies the dynamic responses to changing circumstances and discusses the inability of the governments of the MENA region to achieve not only political reform but also the kinds of economic reform that would allow their citizens to prosper in an increasingly globalized world The book focuses on Tunisia Since its independence in 1956 until 2010 Tunisia had considerable success relative to many other MENA countries but was somewhat less successful relative to East Asian countries Since 2010 however while transitioning away from autocracy to democracy it has been in rather serious economic decline The book highlights how both the factors

identified as enabling Tunisia's initial success and those leading to its subsequent decline can provide many useful insights for improving the management of economic development across the whole MENA region and perhaps also to developing countries throughout the world

States of Discipline Cemal Burak Tansel, 2017-02-08

Despite the severity of the global economic crisis and the widespread aversion towards austerity policies neoliberalism remains the dominant mode of economic governance in the world What makes neoliberalism such a resilient mode of economic and political governance How does neoliberalism effectively reproduce itself in the face of popular opposition States of Discipline offers an answer to these questions by highlighting the ways in which today's neoliberalism reinforces and relies upon coercive practices that marginalize discipline and control social groups Such practices range from the development of market oriented policies through legal and administrative reforms at the local and national level to the coercive apparatuses of the state that repress the social forces that oppose various aspects of neoliberalization The book

argues that these practices are built on the pre existing infrastructure of neoliberal governance which strive towards limiting the spaces of popular resistance through a set of administrative legal and coercive mechanisms Exploring a range of case studies from across the world the book uses authoritarian neoliberalism as a conceptual prism to shed light on the institutionalization and employment of state practices that invalidate public input and silence popular resistance

The State and Global Change Hassan Hakimian,Ziba Moshaver,2020-08-11 Economic liberalisation and reform are widely considered as the favourite remedies for the declining economic fortunes of the Middle Eastern and North African states in the past two decades International economic institutions have been among the main advocates of transition to market led economies in the region and a force contributing to its realisation This has placed the state at the centre of the proposed transformations acting both as an instrument of and an obstacle to change With attempts at liberalisation worldwide spanning over twenty years the time is ripe for a re evaluation of its premises and outcome The essays in this volume debate the political economy of transition and reforms in the Middle East and North Africa drawing on interdisciplinary approaches and outlooks involving international regional and national levels of analysis The three central themes of the book are the rationale and strategies for reform the processes and outcomes and the nature of the state in the changing global setting
