in Pacific Asia Chris Dixon,David W. Smith,2002-09-26 There can be no doubt that Japan remains unchallenged as the economic giant of the Pacific However the economies of East and South East Asia are increasingly becoming integrated into a broad Pacific Asia region which contains most of the world s fastest growing economies In *Economic and Social Development in Pacific Asia* a group of world authorities set the area in its global context and examine the economic emergence of the region In so doing they illustrate that despite superficial similarities there have been many more differences and it is not possible to offer a model of Asian development The authors also challenge the perceived wisdom that this dynamic growth is the result of laissez faire market led economies They argue that on the contrary there has been a great deal of government intervention and this growth is actually a result of a policy of guiding the market Trade, Investment and Economic Development in Asia Debashis Chakraborty,Jaydeep Mukherjee,2016-05-26 In an era of globalization trade in goods and cross border services and capital flows play a key role in determining the economic growth path of countries Over the last two decades countries have embarked on several alternate tracks to liberalize and deepen their linkage with the world economy The growing trade investment nexus and the emerging developments lead to deeper international production networks rise in cross border trade in services and in regional trade agreements and so on The debate of whether it is possible to empirically validate the potential benefits of this deepening trade investment linkage is

ongoing The evidence in literature is however ambiguous This book contributes to the literature by looking at Asian economies and at the EU Maghreb countries and Pacific Island economics It examines the issues under four broad areas namely 1 trade theoretical and policy issues 2 factor flows impact on trade and welfare 3 impact of trade and factor flows on environment and 4 institutions international trade and policy issues

Social Development in Asia Kwong-leung Tang,2012-12-06 Most Asian countries have shown a strong commitment to rapid economic development

Economists have argued that the fruits from economic development will be spread equitably throughout the population. In the absence of a strong tradition of social rights, social development in Asia has long been taken for granted. This collection documents social development in the Asian countries of China, Hong Kong, Taiwan, South Korea, Thailand, and India, and concludes that social development has lagged behind economic development. This has given rise to distorted development in many countries. Serious development problems of poverty and inequalities have lingered even in these economically advanced countries of Hong Kong, Taiwan, and Singapore. These problems have been exacerbated in the wake of the Asian economic crisis. In order to harmonize social development with economic growth, Asian states ought to be more proactive in their development agendas. As a text on social development in Asia, this book is primarily intended for practitioners and students of social work, social administration, and social policy. It is also relevant for students and practitioners of sociology, economics, and public policy.

The Economic Development of South-East Asia C. D. Cowan, 2012. First published in 1964. The Economic Development of South East Asia Studies in economic history and political economy contains eight papers originally written for a study group at the School of Oriental and African Studies in London. The papers, edited by Professor C. D. Cowan, are written against a background of economic underdevelopment in large parts of Asia. Economic problems increasingly plagued the governments of Asia after the Second World War, and while Western governments were willing to help foster economic development, relations with Asian governments were somewhat hindered by the heritage of their colonial past. Problems also related to the growth of traditional trading ports and export crops, and to the importation of colonial regimes, western funds, and skills in the nineteenth century. Such developments come under the loosely generalised concept of imperialism, with its strongly emotional overtones, whose use impedes the objective assessment and analysis of facts. While we understand a good deal about conditions of economic growth in the West, much of what has fostered or retarded growth in other parts of the world remains less clear.

Asian Transformations Deepak Nayyar, 2019-08-29. Gunnar Myrdal published his magnum opus *Asian Drama: An Inquiry into the Poverty of Nations* in 1968. He was deeply pessimistic about development prospects in Asia. The fifty years since then have witnessed a remarkable social and economic transformation in Asia, even if it has been uneven across countries and unequal between people that would have been difficult to imagine let alone predict at the time. *Asian Transformations: An Inquiry into the Development of Nations* analyses the fascinating story of economic development in Asia, spanning half a century. *Asian Transformations* sets the stage by discussing the contribution of Gunnar Myrdal to the debate on development then and now, and providing a long-term historical perspective on Asia in the world. It then uses cross-country thematic studies on governments, economic openness, agricultural transformation, industrialization, macroeconomics, poverty and inequality, education and health, employment and unemployment, institutions, and nationalisms to analyse processes of change while recognizing the diversity in paths and outcomes. Specific country studies on China, India, Indonesia, and Vietnam, and sub-region studies on East Asia, Southeast Asia, and South Asia, further

highlight turning points in economic performance and demonstrate factors underlying success or failure Including in depth studies by eminent economists and social scientists Asian Transformations comprehensively examines the phenomenal changes that are transforming economies in Asia and shifting the balance of economic power in the world and reflects on the future prospects for this continent over the next twenty five years It is a cohesive and multi disciplinary study of a rapidly changing economic landscape and makes an important contribution to understanding the complexities and processes of development from different perspectives Economic Development in Pacific Asia Hafiz Akhand,Kanhaya Gupta,2005-11-18 During the period 1965 to 1990 East Asia was the world s fastest growing region Economic Development in Pacific Asia provides illuminating non technical perspectives on key facets of the region s economies The text focuses on the eight countries which accounted for the majority of the economic growth Japan Hong Kong Taiwan Republic of Korea Indonesia Malaysia Singapore and Thailand Empirical evidence is used to provide a revealing multi dimensional statistical profile of the countries as well as the region as a whole Rather than present a statistical history of each country the text highlights the relative performance in terms of the variables which are studied within each chapter Akhand and Gupta examine a range of popular topics including the relative role of factors accumulation versus technology change factor price distribution and employment growth poverty and income distribution the Asian Crisis and corruption In addition the book examines topics rarely covered in the current economics literature such as urbanization the gender gap and the digital divide It provides an accessible and wide ranging assessment of the existing evidence and current arguments on East Asian economic development and is a valuable addition to economists policy makers and those interested in Asian economic affairs
