

sustained without inheriting even more serious trouble than it has generated to date. On this point, it may be worthwhile to recall debates in Britain's parliament about apartheid. In those days, parliamentarians were arguing about the boycott of South Africa in ways that today would be embarrassing to recall. Yet some were prescient. For example, Viscount Samuel said,

The white Nationalists ... think they should be admired because they are vigorous and have been successful in preserving their white empire. Money is flowing in, and white settlers are being attracted to South Africa from Kenya, from Rhodesia, from the United Kingdom, even from the Continent. Every man who goes strengthens the white hold on South Africa, and in my opinion, this is wrong.

Before such a situation we stand helpless. We are watching a Greek tragedy, the descent of a pigheaded people down to disaster. Let us not fool ourselves; it is too late today for peaceful change in South Africa. There is no white political party that can unseat the Nationalist Government. There is no alternative white government for South Africa. Even if the Nationalists were convinced

that they must liberalise their régime, the whole country would boil over at once. South Africa is a fine country, but it has gone beyond the point of no return. Its future will be massacre and destruction.¹⁴

The future of South Africa was not massacre and destruction. But neither was its happier future achieved by international support for policies that the apartheid régime believed essential to white society's welfare and survival. Hindsight confirms that it was the universal rejection of forced racial separation, and not attempts to defuse black resistance to separation, that achieved a stable peace in South Africa. If different principles apply in Palestine, then these must be swiftly identified and tested and not merely assumed from polemical assertions by one side or the other. The brief exploration of the similarities broached here between the Homelands and the emerging parameters of a Palestinian state indicate that this comparison, at least, can no longer be delayed or discredited by polemical denunciations of the comparison as inapplicable. The international stakes involved in a project to create an enclave state for Palestinians in parts of Mandate Palestine are clearly too high.

¹⁴ United Nations Security Council Resolution 1397 (2002) affirmed in its chapeau [preliminary statement] "a vision of a region where two States, Israel and Palestine, live side by side within secure and recognized borders." As it is not clear what legal weight a UN "vision" carries, UNSC Resolution 1515 (2003) reaffirmed this vision and added an operative paragraph: "2. Calls on the parties to fulfil their obligations under the Roadmap in cooperation with the Quartet and to achieve the vision of two States living side by side in peace and security".

¹⁵ In 2004, Dov Weissglass, formerly chief of staff to Prime Minister Ariel Sharon, famously commented to *Ha'arets* that the withdrawal from Gaza "supplies the amount of formaldehyde that is necessary so there will not be a political process with the Palestinians;" see *Ha'arets*, weekend magazine, October 8 2004.

Tajikistan Foreign Policy and Government Guide Volume 1 Strategic Information and Developments IBP USA, 2013-08 2011 Updated Reprint Updated Annually Tajikistan Foreign Policy and Government Guide The Broadview Anthology of Social and Political Thought - Volume 2: The Twentieth Century and Beyond Andrew Bailey, Samantha Brennan, Will Kymlicka, Jacob T. Levy, Alex Sager, Clark Wolf, 2008-09-12 The second volume of this comprehensive anthology covers the twentieth and early twenty-first centuries. The anthology is broad-ranging both in its selection of material by figures traditionally acknowledged as being of central importance and in the material it presents by a range of other figures. The material in this volume is presented in three sections. The first, Power and the State, includes selections by such figures as Goldman, Lenin, Weber, Schmitt and Hayek. Among those included in the Race, Gender and Colonialism section are de Beauvoir, Gandhi, Fanon and Young. The third and by far the longest section, Rights Based Liberalism and its Critics, focuses on the many interrelated directions that social and political philosophy has taken since the publication of John Rawls's ground-breaking *A Theory of Justice* in 1971. In order to better meet the needs of today's students, the editors have made every effort to include accurate and accessible translations of the readings. Additionally, every selection has been painstakingly annotated and each figure is given a substantial introduction highlighting her or his major contributions within the tradition. For figures of central importance, the editors have included extended introductions that place the figure in the context of intellectual history as well as of political thought. In order to ensure the highest standards of accuracy and accessibility, the editors have consulted dozens of leading academics during the course of the volume's development, many of whom have contributed introductory material as well as advice. The result is an anthology with unparalleled pedagogical benefits. The Broadview Anthology of Social and Political Thought sets the new standard for social and political philosophy instruction. **Supreme Decisions, Volume 1** Melvin I. Policy Responses to the Interwar Economic Crisis Adnan Türeğün,2022-04-01 This book is about national economic policy responses to the Great Depression of the interwar period Taking off from a generally liberal starting point in the 1920s states diverged greatly in their responses Some were daring while others remained conservative The two groups further differed among themselves in both degree and kind The book gives a certain shape to this messy reality by identifying broad policy patterns paradigms and offers an explanation of it which emphasizes the ideational disposition of policy actors while recognizing the context that limits what they can do More specifically it argues that the ideas held by rulers and the strategies they consequently developed regarding three major groups of interest business labour and most critically agrarians largely determined economic policy variation across nations

While progress has not always been smooth and has not come without dislocation for some, the economic policy challenge has been and is to enable the realization of the large potential benefits of globalization while simultaneously reducing the negative side effects and providing safety nets for those whose lives are disrupted in the process. This volume focuses on the successes of globalization and some of the main economic policy challenges and solutions that arise to enhance the benefits and lower the costs. It covers different aspects of globalization: sovereign debt restructuring, development of the financial sector and financial crises in Asia, Turkey, Brazil, etc. The final part of the book covers multilateral international organizations, namely the World Trade Organization, the IMF, and the World Bank.

Peace, Literature, and Art - Volume I Ada Aharoni, 2009-08-30 Peace Literature and Art is the component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty-one Encyclopedias. Culture is the essence of individual and national identity. What children and people read and watch and the kind of Culture Literature and Media they are exposed to through home education and society provide them with basic values, attitudes, and norms which affect and motivate them throughout their lives. It is of crucial importance therefore that those stories we are exposed to at the socio-cultural and educational levels which we watch on television, in films, and on the Internet, and which we read, should be peaceful ones which open our eyes to a humane world that can prosper from peace and harmony. This Theme on Peace Literature and Art deals in two volumes and covers several topics related to Peace Education: Definition, Approaches, and Future Directions; Importance of a Literature and a Culture of Peace. These two volumes are aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel, and Policy Analysts, Managers, and Decision Makers, NGOs, and GOs.

Paradoxes of Peace in Nineteenth Century Europe Thomas Hippler, Miloš Vec, 2015 Peace is often simplistically assumed to be war's opposite and as such is not examined closely or critically idealized in the literature of peace studies. Its crucial role in the justification of war is often overlooked. Starting from a critical view that the value of restoring peace or keeping peace is and has been regularly used as a pretext for military intervention, this book traces the conceptual history of peace in nineteenth-century legal and political practice. It explores the role of the value of peace in shaping the public rhetoric and legitimizing action in general international relations, international law, international

trade colonialism and armed conflict Departing from the assumption that there is no peace as such nor can there be it examines the contradictory visions of peace that arise from conflict These conflicting and antagonistic visions of peace are each linked to a set of motivations and interests as well as to a certain vision of legitimacy within the international realm Each of them inevitably conveys the image of a specific enemy that has to be crushed in order to peace being installed This book highlights the contradictions and paradoxes in nineteenth century discourses and practices of peace particularly in Europe

The Economic Thought of Friedrich List Harald Hagemann, Stephan Seiter, Eugen Wendler, 2018-11-08 As the world grapples with increased globalization and technological change Friedrich List's work appears more relevant than ever before His theory of productive powers and his argument for protecting infant industries give us a valuable way of looking at innovation systems winners and losers in international trade and the current shift towards economic and political nationalism Comprising fifteen specially commissioned chapters from a range of international scholars this book explores many aspects of List's economic thought including industrial development political economy the economics of education infrastructure and catching up processes in Asian economies This volume will be illuminating reading for advanced students and researchers in the history of economic thought economic history economic policy and international trade

A History of European Economic Thought Antonio Magliulo, 2022-05-11 A History of European Economic Thought grafts the history of economic thought onto Global History by showing how significant economic ideas have influenced the process of Europe's formation from the very beginning to the present day This work combines two classical stories that until today have followed parallel paths On the one hand there is the political history of Europe which is often limited to a few fleeting references to the ideas of the great economists of the past On the other hand there is the history of economic thought which examines Europe as a whole as a distinct supranational community only with reference to the institutions created after World War II The volume sheds light on the constitutive values of Europe which also stem from a particular economic culture and provides essential reading for students and scholars of the history of economic thought

Counterfactual Thought Experiments in World Politics Philip E. Tetlock, Aaron Belkin, 2020-06-30 Political scientists often ask themselves what might have been if history had unfolded differently if Stalin had been ousted as General Party Secretary or if the United States had not dropped the bomb on Japan Although scholars sometimes scoff at applying hypothetical reasoning to world politics the contributors to this volume including James Fearon Richard Lebow Margaret Levi Bruce Russett and Barry Weingast find such counterfactual conjectures not only useful but necessary for drawing causal inferences from historical data Given the importance of counterfactuals it is perhaps surprising that we lack standards for evaluating them To fill this gap Philip Tetlock and Aaron Belkin propose a set of criteria for distinguishing plausible from implausible counterfactual conjectures across a wide range of applications The contributors to this volume make use of these and other criteria to evaluate counterfactuals that emerge in diverse methodological contexts including comparative case studies game theory and statistical analysis Taken together

these essays go a long way toward establishing a more nuanced and rigorous framework for assessing counterfactual arguments about world politics in particular and about the social sciences more broadly **Peace, Literature, and Art - Volume II** Ada Aharoni, 2009-08-30 Peace Literature and Art is the component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Culture is the essence of individual and national identity What children and people read and watch and the kind of Culture Literature and Media they are exposed to through home education and society provide them with basic values attitudes and norms which affect and motivate them throughout their lives It is of crucial importance therefore that those stories we are exposed to at the socio cultural and educational levels which we watch on television in films and on the Internet and which we read should be peaceful ones which open our eyes to a humane world that can prosper from peace and harmony This Theme on Peace Literature and Art deals in two volumes and cover several topics related to Peace Education Definition Approaches and Future Directions Importance of a Literature and a Culture of Peace These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs **Emma Goldman, Vol. 2** Emma Goldman, 2008-07-16 Emma Goldman A Documentary History of the American Years reconstructs the life of Emma Goldman through significant texts and documents These volumes collect personal letters lecture notes newspaper articles court transcripts government surveillance reports and numerous other documents many of which appear here in English for the first time Supplemented with thorough annotations multiple appendixes and detailed chronologies the texts bring to life the memory of this singular pivotal figure in American and European radical history Volume 2 Making Speech Free 1902 1909 extends many of the themes introduced in the previous volume including Goldman s evolving attitudes toward political violence and social reform intensified now by documentary accounts of the fomenting revolution in Russia and the legal opposition toward anarchism and labor organizing in the United States Always an impassioned defender of free expression Goldman s launch of her magazine Mother Earth in 1906 signaled a desire to bring radical thought into wider circulation and its pages brought together modern literary and cultural ideas with a radical social agenda quickly becoming a platform for her feminist critique among her many other challenges to the status quo With abundant examples from her writings and speeches this volume details Goldman s emergence as one of American history s most fiercely outspoken opponents of hypocrisy and pretension in politics and public life **Thoughts of Gandhi and Vinoba** K.
