Economics 101 And Other Thoughts:

Economics 101 and Other Thoughts Tom Donelson, 2002-11 It is easy to see that Tom Donelson loves to learn. His chief interests are political science and economics. But he also delves into biography, boxing, and rock n roll. Sometimes he mixes what he gleans from different disciplines to support certain central ideas. Freedom is good. Free markets are good. People can prosper if government stays out of their way. So here it is as Donelson says a synopsis of his thoughts, some of which have been offered in publications ranging from an alternative paper in Kansas City to daily newspapers including The Gazette of Cedar Rapids and Iowa City for which I work on the opinion page to the National Review. As he observes, it is self-evident that he is a conservative. But he provides plenty of evidence to back taking that point of view. Kurt Rogahn, Cedar Rapids Gazette.

The Individual and the Other in Economic Thought Ragip Ege, Herrade Igersheim, 2018-07-27. The Philosophy of Economics primarily considers the economic agent as a moral subject. Economics, however, has long overlooked the agent's moral dimension to focus instead on the strictly rational. This volume seeks to address this neglected topic through exploring the Individual and the Other. The economic agent refers to himself/herself in terms of his desire and passions yet also refers to others besides himself. For the rational economic agent, what is the nature of this relationship with the Other? Should it not be understood as undergoing a transformation once we come to consider the economic agent as a reasonable being? Through what process does the Other pass from being an instrument at the disposal of a rational agent to being an end in itself for a moral subject? In other words, how does another become an Other? These questions are behind the re-examination of certain fundamental notions which takes place in this book: an examination which involves a re-reading of certain great authors. With contributions from authors around the world, this work is divided into three main parts. The first deals with individuals from the history of economic thought such as Adam Smith, Karl Marx, and Hannah Arendt. This is then followed by a thematic section in which the concepts of recognition and subjectivity are questioned in a market context. Finally, the third part offers an analysis of the issue of the Individual and the Other in different fields of the recent economic analysis including game theory, decision theory, or social choice. The Individual and the Other in Economic Thought aims to help the reader better understand how the relationship between the Individual and the Other has been conceived, conceptualized, and framed in economic analysis. It will be of great use to graduate students, scholars, and any reader interested in this crucial issue.

Comparisons in Economic Thought Stavros A. Drakopoulos, 2016-05-26. The idea of comparing rewards with others has a long and persistent presence in the social sciences and can be found in many psychological, social, and managerial theories. In economics, this idea can be traced back through the works of a substantial number of eminent thinkers from Genovesi and Hume to Smith, Ricardo, Marx, and Mill, through to Veblen, Pigou, and Keynes. In the last two decades, the notion of social comparisons has started to appear more frequently in economic literature, especially in the subfield of happiness research. There are also signs that the notion has resurfaced in some strands of literature such as

positional concerns social identity models and social capital theory Comparisons in Economic Thought offers a uniquely comprehensive account of how social comparisons have featured in the history of economic thought This book provides an assessment as to why social comparisons have been dismissed by mainstream economists and considers their current and future usefulness This volume is suitable for those who are interested and study history of economic thought economic methodology and History of Consumer Theory as well as Rational Choice Theory

Economic Thought in Modern China Margherita Zanasi,2020-05-07 In this major new study Margherita Zanasi argues that basic notions of a free market economy emerged in China a century and half earlier than in Europe In response to the commercial revolutions of the late 1500s Chinese intellectuals and officials called for the end of state intervention in the market recognizing its power to self regulate They also noted the elasticity of domestic demand and production arguing in favour of ending long standing rules against luxury consumption an idea that emerged in Europe in the late seventeenth and early nineteenth centuries Zanasi challenges Eurocentric theories of economic modernization as well as the assumption that European Enlightenment thought was unique in its ability to produce innovative economic ideas She instead establishes a direct connection between observations of local economic conditions and the formulation of new theories revealing the unexpected flexibility of the Confucian tradition and its accommodation of seemingly unorthodox ideas

Divine Providence in Early Modern Economic Thought Joost Hengstmengel,2019-05-21 In this important volume Joost Hengstmengel examines the doctrine of divine providence and how it served as explanation and justification in economic debates in the sixteenth seventeenth and eighteenth centuries throughout Western Europe The author discusses five different areas in which God was associated with the economy international trade division of labour value and price self interest and poverty and inequality Ultimately it is shown that

theological ideas continued to influence economic thought beyond the Medieval period and that the science of economics as we know it today has theological origins Interdisciplinary in nature this book will be of interest to advanced students and researchers in the history of economic thought the history of theology philosophy and intellectual history **Routledge Library Editions: Landmarks in the History of Economic Thought** Various Authors,2021-07-14 Re issuing 15 seminal volumes in the history of economics originally published between 1906 and 1983 but which still have enduring validity the volumes in this set by Edwin Cannan Michal Kalecki Simon Kuznets Erik Lindahl A C Pigou Joan Robinson Friedrich List Knut Wicksell Tibor Scitovsky and Jacob Viner discuss and examine general problems of economics and in particular the theories of production value distribution employment interest money currency credit and international trade key principles of economics in historical terms Swedish monetary theory major variables significant for the analysis of economic development business cycles origins of social organizations the development of Robinson Crusoe economies and the conception of property or rightful ownership **Economics and Other Branches - In the Shade of the Oak Tree** François Allisson,Roberto Baranzini,2015-10-06 Pascal Bridel held the Chair of Economics at the University of Lausanne and is founder of the Centre Walras Pareto This major essay collection reflects his wide range of interests and his seminal contributions to economic theory It is the work of more than thirty of the most senior scholars of economics working today **Franciscan Poverty and Franciscan Economic Thought (1209-1348)** Ryan Thornton,2023-04-24 When Francis of Assisi started to use his family's resources for religious purposes his father took him to court It was there that Francis dispossessed himself of everything and began a new life that soon inspired others to follow Within a century members of this Order of Friars Minor were among the first to dedicate complete treatises to discussions of buying selling and the whole of human exchange that is known as economics The natural question to ask and the one proposed here is whether there might be a connection between the two between Franciscan poverty and Franciscan economic thought **The Origin of Economic Ideas** Guy Routh,1989-09-01 An updated version of the classic economics textbook revised to include current developments in the field It traces the development of modern economics and assesses the work of many famous theorists A chronology of the principal works of all economists mentioned in the text is included **A Short History of Economic Thought** Bo Sandelin,Hans-Michael Trautwein,2014-08-08 This book now in its third edition provides an elementary introduction to the history of economic thought A chapter is devoted to each of the major developments in the history of the discipline before a concluding chapter in which the authors draw together some of the key strands and comment on some major works and textbooks in the history of economic ideas They also reflect on the changes in economic thinking within the general context of the philosophy of science This new edition continues to offer the clear and concise coverage of the main schools of thought and paradigm shifts in the field that has become the volume's trademark The book has been thoroughly updated throughout in order to reflect changes in the landscape of the field Details on key thinkers and aspects of the story such as the evolution of scholarship on growth

and development have been added or expanded whilst not compromising on the book's concise approach. Key updates include Biographical and bibliographical information is brought up to date throughout the text. North American economists John Kenneth Galbraith and Kenneth Ewart Boulding make their first appearance in this edition. Information on developments in institutional economics addressing in particular the works of 2009 Nobel prize winner Elinor Ostrom. This book has become well known for its innovative coverage of the economic thinking of mainland Europe whilst also addressing Anglo American trends. It provides a short and highly readable overview of the evolution of economic thought usable in courses where the history of economic thought constitutes only a small part or required background reading. It continues to be an extremely useful much needed text for all introductory economics courses in the field.

Economic Thought Of The Twentieth Century And Other Essays P. R Dubhashi, 1995 **An Outline of the History of Economic Thought** Ernesto Screpanti, Stefano Zamagni, 2005 This book provides a comprehensive and analytical overview of the development of economic theory from its beginnings at the end of the Middle Ages up to contemporary contributions. Traditional theories are presented as living matter and modern theories are presented as part of a historical process and not as established truths. In this way the book avoids the dangerous dichotomy between pure historians of thought who dedicate themselves exclusively to studying facts and pure theorists who are interested in the evolution of the logical structure of theories. The second edition contains several changes and additions. The authors give due consideration to the civil economy perspective developed during Humanism and the Renaissance. The section on Adam Smith has been considerably extended and improved. The treatment of the post keynesian approach has been separated from new keynesian macroeconomics. Finally a new chapter has been added to review the most recent developments in the economic discourse in the light of globalization and the new technological trajectory.

A History of Greek Economic Thought Albert Augustus Trever, 1916 *Performing Economic Thought* Bradley Ryner, 2013-12-17 This study examines the structural similarities between English mercantile treatises and drama c1600-1642. Bradley D Ryner analyses the representational conventions of plays and mercantile treatises written between the chartering of the English East India Company in 1600 and the closing of the public playhouses at the outset of the English Civil War in 1642. He shows that playwrights' manipulation of specific elements of theatrical representation such as metaphor, props, dramatic character, stage space, audience interaction and genre exacerbated the tension between the aspects of the world taken into account by a particular representation and those aspects that it neglects.

A History of Greek Economic Thought Albert Augustus Trever, 2022-09-16 In *A History of Greek Economic Thought* Albert Augustus Trever meticulously analyzes the evolution of economic ideas in ancient Greece foregrounding the philosophical underpinnings that shaped early economic theory. Employing a clear scholarly style, Trever illuminates the interconnectedness of economics with ethics, politics and social philosophy, tracing the contributions of pivotal

figures such as Xenophon Aristotle and Plato The author situates these texts within a rich literary context elucidating how the vibrant intellectual climate of ancient Greece fostered groundbreaking economic discourse that continues to resonate today Albert Augustus Trever a renowned scholar in classical studies and economics draws from extensive research and a profound understanding of Hellenistic thought His academic journey enriched by explorations into both ancient philosophy and economic systems provides him with unique insights into the historical backdrop of Greek economic ideas Trever s passion for unveiling the complexities of past economic thought stems from his commitment to illustrating its relevance in contemporary discussions This book is an essential read for students of economics history and philosophy alike Trever s rigorous scholarship and engaging prose invite readers to reconsider the origins of economic thought urging them to recognize the value of ancient perspectives in addressing modern challenges Whether a devotee of classical literature or a curious newcomer readers will find profound insights within these pages *Pre-Classical Economic Thought* S. Todd Lowry, 2012-12-06 The scholars invited to contribute the primary essays for this collection were given three mandates The first was to survey the contemporary research in their assigned fields and to provide a bibliography that would give any interested scholar an entree into the literature The second was to develop their own interpretive perspective on the economic literature of their assigned period The third and perhaps the most difficult was to be very brief and concise In a project of this type it would be difficult to extrapolate themes or evolutionary sequences that run through the literature over the two thousand years spanned by this survey To some degree the invited commentators provide a fund of suggestions that will stimulate interested readers to pursue this line of synthesis for themselves The editor of this collection did not even entertain the idea of trying to coordinate the presentations and commentaries of this intellectually erudite and diverse group of scholars into agreed upon lines of interpretation There is enough material however to provide a reference base for the interested scholar who desires to follow particular ideas from period to period
