## **Economics Of Empire Britain Africa And The New Imperialism 1870 1895:**

**The Economics of Empire** William G. Hynes, 1979      **An Economic History of Imperial Madagascar, 1750-1895**

Gwyn Campbell, 2005-03-14 The first comprehensive economic history of pre colonial Madagascar this study examines the island's role from 1750 to 1895 in the context of a burgeoning international economy and the rise of modern European imperialism This study reveals that the Merina of the Central Highlands attempted to found an island empire and through the exploitation of its human and natural resources build the economic and military might to challenge British and French pretensions in the region Ultimately the Merina failed due to imperial forced labour policies and natural disasters the nefarious consequences of which disease depopulation ethnic enmity have in traditional histories been imputed external capitalist and French colonial policies      *Business, Race, and Politics in British India, c.1850-1960* Maria Misra, 1999-04-29

This is a study of the political and economic activities of an important group of British businessmen in India between 1850 and 1960 Though denounced by Indian nationalists as the economic arm of the British Raj the firms of these Managing Agents seemed unassailable before the First World War However during the inter war period they rapidly lost their commanding position to both Indian and other foreign competitors Dr Misra argues that the failure of these firms was in part the consequence of their particular and ultimately self defeating attitudes towards business politics and race She casts new light on British colonial society in India and makes an important contribution to current debates on the nature of the British Empire and the causes of Britain's relative economic decline      Gentlemanly Capitalism, Imperialism and Global History S.

Akita, 2002-10-31 British imperial history can now be seen as a bridge to global history This study tries to renew the debate on British imperialism by combining Western and Asian historiography and constructing a new global history as an aid to the understanding of globalization in the late twentieth and twenty first centuries Part One takes a predominantly metropolitan view of the globalizing forces unleashed by British imperialism Part Two focuses on the international order of East Asia and its connection with gentlemanly capitalism      **Money, Finance, and Empire, 1790-1960** R.F. Holland, A.N.

Porter, 2012-11-12 Scholars have recently begun to pay renewed attention to the economics of empire focusing in particular on the requirements of metropolitan Britain's economy and on the activities of imperial businesses Within this broad field financial questions not least the subject of investment overseas or the export of capital have long had a prominent place and have been equally affected by the development of new approaches The consensus as to the volume and direction of Britain's overseas investments is being vigorously challenged Technological advances have encouraged on a greatly enlarged scale the compilation and analysis of information about British investments and shareholdings abroad The gradual easing of restrictions on business records has increased facilities for the study especially of imperial and colonial banking Work on the financial policies of central governments is revealing much of interest to students of twentieth century colonial rule and decolonization This collection of essays brings together a selection of the latest research on these and other themes and for

comparative purposes includes examples of recent continental work      *The British Imperial Century, 1815-1914* Timothy H. Parsons, 1999-04-15 Ideal for adoption in introductory and upper level classes in European and world history this book provides a concise narrative account of the rise and fall of British imperialism Focusing on the transition from informal to formal empire which broadened and intensified Britain's relations with Asia and Africa Timothy Parsons describes the establishment of extensive colonies and protectorates in Egypt India China and the Ottoman Empire Parsons explores the cultural political economic and social implications of British authority in these areas and he describes the various ways in which subject peoples contested and adapted to the expansion of the British Crown This book is an excellent introduction to the subject of imperialism and will be extremely useful for those studying this history of Britain Africa the Middle East India and the Far East      European Imperialism, 1860-1914 Andrew Porter, 2016-01-11 This study surveys the growth of European intervention outside Europe between 1860 and 1914 It treats its subject imperialism as a process of increasing contact influence and control rather than as the nature and consequences of colonial rule The problems of defining imperialism are considered alongside various analytical approaches to the term In examining the controversial historiographical literature surrounding this subject the book criticises particular explanations and introduces readers to some of the new directions in research and inquiry currently being explored by historians      **Britain, Europe and the World 1850-1986** Bernard Porter, 2023-07-14 First published in 1983 Britain Europe and the World 1850 1986 examines the history of Britain's international situation and foreign policy in relation to her domestic circumstances from the middle of the nineteenth century to the late twentieth century to provide answers to the following questions among others What did it mean for Britain to be a great power in the nineteenth century Why is she no longer one Could anything have been done to prevent her decline It is an unusual interpretation undermining many of the most pervasive present day myths about Britain's past Some of its conclusions will be unexpected The reissue contains a new preface in which the author brings the reader up to date with the changes Britain has gone through since the book was first published It has been written for students of British history and diplomacy at all levels and for anyone interested in finding out why the British have come to be where they find themselves now      *Economics and Empire, 1830-1914* David Kenneth Fieldhouse, 1984      *The Economics of Empire* William G. Hynes, 1979
