Ruling the World Lloyd Gruber,2000-03-20 The last few decades have witnessed an extraordinary transfer of policy making prerogatives from individual nation states to supranational institutions If you think this is cause for celebration you are not alone Within the academic community and not only among students of international cooperation the notion that political institutions are mutually beneficial that they would never come into existence much less grow in size and assertiveness were they not Pareto improving is today s conventional wisdom But is it true In this richly detailed and strikingly original study Lloyd Gruber suggests that this emphasis on cooperation s positive sum consequences may be leading scholars of international relations down the wrong theoretical path The fact that membership in a cooperative arrangement is voluntary Gruber argues does not mean that it works to everyone s advantage To the contrary some cooperators may incur substantial losses relative to the original non cooperative status quo So what then keeps these participants from withdrawing Gruber s answer in a word is power specifically the go it alone power exercised by the regime s beneficiaries many of whom would continue to benefit even if their partners the losers were to opt out To lend support to this thesis Gruber takes a fresh look at the political origins and structures of European Monetary Unification and NAFTA But the theoretical arguments elaborated in *Ruling the World* extend well beyond money and trade touching upon issues of long standing interest to students of security cooperation environmental politics nation building even political philosophy Bold and compelling this book will appeal to anyone interested in understanding how power politics really operates and why for better or worse it is fueling much of the supranational activity we see today

Developing Nations and the Politics of Global Integration Stephan Haggard, 1995-04-01 Developing countries are becoming important players in the world economy Although they were slow to liberalize trade they are now joining the more economically advanced nations in implementing trade reforms and in taking steps to deepen global integration The lowering of trade barriers and the growth of foreign investment have benefited the developing countries but have also created

vulnerabilities including risks of dependence and political interference Is deeper integration in the best interest of developing countries In this book part of the Integrating National Economies series Stephen Haggard examines the position of the developing countries in the international trade regime Focusing on the nations of East and Southeast Asia and Latin American Haggard explores the cause of economic liberalization policies in the developing nations He argues that various international constraints such as economic shocks and political pressures from the economically advanced nations pushed developing countries to open up to international competition and to pursue economic relations with advanced industrial states Haggard addresses such central questions as Will developing countries benefit from the deep integration agenda Will they instead join closed regional blocs that fragment the international economy Will the developing nations orient themselves toward the multilateral institutions particularly the World Trade Organization or will they gravitate toward regional arrangements Haggard argues that the advanced developing countries have become strong supporters of the multilateral system and that the extent of regionalism has been over stated He contends that a more serious threat is the lure of bilateralism and the effort of the advanced industrial states to impose standards on developing countries that are inappropriate or politically counterproductive A volume of Brookings Integrating National Economies Series *Trade Policy Reforms in Latin America* M. Lengyel,V. Ventura-Dias,2003-12-19 This volume examines the interaction between private and public institutions in the trade policy making process of eight Latin American countries and trade bargaining in sub regional hemispheric and multilateral fora Faced with expanding trade agendas diversifying negotiation fora and an uncertain global economy each country has found its own niche in regional integration and global insertion providing a wealth of idiosyncratic and convergent policies
