Handbook of Agricultural Economics Bruce L. Gardner, Gordon C. Rausser, 2001. Annotation: The subject matter of agricultural economics has both broadened and deepened in recent years, and the chapters of this Handbook present the most exciting and innovative work being done today. Following Volume 1, Volume 2 consists of three parts: Agriculture, Natural Resources, and the Environment; Agriculture in the Macroeconomy; and Agriculture and Food Policy. Although agricultural economists have always paid attention to these topics, research devoted to them has increased substantially in scope as well as depth in recent years. *Environmental and Natural Resources Economics* Xiangzheng Deng, Malin Song, Zhihui Li, Fan Zhang, Yuexian Liu, 2024-03-19. This book aims to integrate multiple disciplinary such as management economics and geography from the perspective of resource science and also to strengthen research on resource management to promote sustainability in natural resources. It established clear definition of natural resources and in depth exploration of main fields such as water resources, land resources, and agricultural resources. Classic methods of economics are applied to solve the problems of resource consumption, environmental pollution, and climate change in modern society. On the basis of classical economics, the disciplinary system of environmental and natural resources is further developed. It is a helpful reference for readers to further study natural resources and environmental economics. **The Economics of American Agriculture**

Steven C. Blank, 2014-12-18. This book answers the questions: What is happening to American agriculture and why? Steven C. Blank uses portfolio theory to analyze both macro and microeconomic data that paints a clear picture of the trends in agriculture and explains why these trends are consistent with market evolution and global economic development. He clarifies agriculture's specific role in economic development with a focus on the current and future globalizing commodity markets. The book features empirical research that demonstrates the link between farm level investment decisions and regional and national economic trends. It shows how the dynamic environment of industrialization and globalization of agriculture is part of a continuing development that is driven by technological innovation. This all points to a future with a very different agricultural production sector and some extremely important policy choices that will face the entire country.
