The Taxation of Petroleum and Minerals Philip Daniel, Michael Keen, Charles

McPherson,2010-04-15 There are few areas of economic policy making in which the returns to good decisions are so high and the punishment of bad decisions so cruel as in the management of natural resource wealth Rich endowments of oil gas and minerals have set some countries on courses of sustained and robust prosperity but they have left others riddled with corruption and persistent poverty with little of lasting value to show for squandered wealth And amongst the most important of these decisions are those relating to the tax treatment of oil gas and minerals This book will be of interest to Economics postgraduates and researchers working on resource issues as well as professionals working on taxation of oil gas and minerals mining **Land Use Change** Richard J. Kerry Turner,2004-01-01 The

purpose of this report is to produce a review on water resource valuation issues and techniques specifically for the appraisal and negotiation of raw as opposed to bulk or retail water resource allocation for agricultural development projects The review considers raw water in naturally occurring watercourses lakes wetlands soil and aquifers taking an ecosystem function perspective at a catchment scale and takes account of the demands from irrigated and rainfed agriculture It is hoped that the review will have particular application to developing countries where agreed methods for reconciling competing uses are often absent but nevertheless takes account of valuation approaches that have been made in post industrial economies **Hubris: The Troubling Science, Economics, and Politics of Climate Change** Michael

Hart, 2015-09-29 The book explores problems and issues that have emerged in national and international discussion of policies to address climate change. It concludes that every solution put forward by the UN and activists poses more problems than might ever emerge from the marginal human impact on natural climate change. Rather than mitigation, governments should focus on adaptation. As climate change discussions have become captive of a utopian agenda that is using climate change as a stalking horse to drive alarm in the hope that it will convince governments to act.
