The Politics of Inflation and Economic Stagnation Leon Lindberg, Charles S. Maier, 1985-06-01 The inflation of the 1970s represented the greatest peacetime disruption of the Western economies since the Depression Even as inflation receded the recession in its wake brought more joblessness than at any time since the 1930s The governments of industrialized nations found that the economic policies they had developed since World War II no longer assured price stability or high employment What are the lessons of over a decade of economic difficulty In this conference volume which focuses on aspects of the crisis that economists often presuppose to be beyond control the authors analyze the political and social underpinning of inflation and recession Part 1 places the economic problems of the 1970s in the historical context of postwar development and then compares economic and political science analyses of inflation Part 2 examines how rivalries between social groups affect inflationary processes One chapter draws on the history of Latin American inflation to suggest the conflicts in play Two others weigh the role of labor and industry in the formation of economic policy And another shows how rivalry between countries like rivalry between classes at home permitted inflation to rise The chapters in part 3 contest the claim that big government or big labor causes inflation Two studies emphasize that a high degree of public expenditure does not itself lead to inflation Further contributions explore the role of central banks and subject such concepts as the political business cycle to critical analysis Part 4 comprises case studies about macroeconomic policymaking in four nations Italy Germany Japan and Sweden The studies reveal what institutional attributes rendered those countries resistant to

inflation or vulnerable to economic setback In the last part the editors pull together the findings and lay out the contemporary political feasibility of alternative approaches to macroeconomic management **Plastic Capitalism** Sean H. Vanatta,2024-05-21 How bankers created the modern consumer credit economy and destroyed financial stability in the process American households are awash in expensive credit card debt But where did all this debt come from In this history of the rise of postwar American finance Sean H Vanatta shows how bankers created our credit card economy and with it the indebted nation we know today America s consumer debt machine was not inevitable In the years after World War II state and federal regulations ensured that many Americans enjoyed safe banks and inexpensive credit Bankers though grew restless amid restrictive rules that made profits scarce They experimented with new services and new technologies They settled on credit cards and in the 1960s mailed out reams of high interest plastic to build a debt industry from scratch In the 1960s and 70s consumers fought back using federal and state policy to make credit cards safer and more affordable But bankers found ways to work around local rules Beginning in 1980 Citibank and its peers relocated their card plans to South Dakota and Delaware states with the weakest consumer regulations creating on shore financial havens and drawing consumers into an exploitative credit economy over which they had little control We live in the world these bankers made
