Economic Adjustment And Reform In Lowincome Countries:

Economic Adjustment and Reform in Low-Income Countries (ESAF Review Background Papers) Hugh Bredenkamp, Susan Schadler, 1999-06-30 The Enhanced Structural Adjustment Facility ESAF is the centerpiece of the International Monetary Fund's strategy to provide assistance on concessional terms to low income member countries that are undertaking important macroeconomic adjustment and structural reforms By February 1999 a total of SDR 7 billion about US 9 billion had been distributed under 79 ESAF arrangements to 51 developing countries Edited by Hugh Bredenkamp and Susan Schadler this volume features internal IMF staff assessments of the ESAF and provides an historical account of policies implemented and outcomes achieved under ESAF supported programs

The ESAF at Ten Years International Monetary Fund, 1998-02-12 For over 10 years the IMF has supported adjustment and reform programs in many of its low income members through two facilities established specifically for that purpose the Enhanced Structural Adjustment Facility ESAF and its precursor the Structural Adjustment Facility SAF By the end of 1994 36 countries had availed themselves of these facilities in support of 68 multi year programs This study summarizes the findings of a review of the experience under these programs and of economic developments in the countries that undertook them

Debt Relief for the Poorest Countries Yiagadeesen Samy, 2018-02-06 The debt problems of poor countries are receiving unprecedented attention Both federal and non governmental organizations alike have been campaigning for debt forgiveness for poor countries The governments of creditor nations responded to that challenge at a meeting sponsored by the G 7 International Monetary Fund and World Bank all of which upgraded debt relief as a policy priority Their initiatives provided for generous interpretations of these nations abilities to sustain debt gave them opportunities to qualify for debt relief more rapidly and linked debt relief to broader

policies of poverty reduction Despite this the crisis has only deepened in the first years of the new millennium This brilliant group of contributions assesses why this has occurred In plain language it considers why debt relief has been so long in coming for poor countries It evaluates the cost of a persistent overhang in debt for those countries It also examines head on whether enhanced debt relief initiatives offer a permanent exit from over indebtedness or are merely a short term respite Above all this volume for the first time addresses the issues on the ground that is the views and opinions about debt relief on the part of leaders in advanced nations and the probability of further support for the most impoverished lands In this approach the editors and contributors have made an explicit and successful attempt to be inclusive and relevant at all stages of the analysis This volume covers the full range of the poorest countries with contributions by John Serieux Lykke Anderson and Osvaldo Nina Befekadu Degefe Ligia Maria Castro Monge and Peter B Mijumbi Collectively they offer a sobering scenario unless measures are put in place now in anticipation of further crises the future of the very poorest nations will remain bleak and troublesome

The Nordic Banking Crisis Mr.Burkhard Drees,Ceyla Pazarbasioglu,1998-04-20 This study examines the banking crises in Finland Norway and Sweden which took place in the early 1990s and draws some policy conclusions from their experiences One key conclusion is that factors in addition to business cycle effects explain the Nordic countries financial problems Although the timing of the deregulation in all three countries coincided with a strongly expansionary macroeconomic momentum the main reasons for the banking crises were the delayed policy responses the structural characteristics of the financial systems and the banks inadequate internal risk management controls

Anticipating Balance of Payments Crises--The Role of Early Warning Systems Mr.Eduardo Borensztein,Mr.Gian Milesi-Ferretti,Ms.Catherine A. Pattillo,Mr.Andrew Berg,2000-01-24 Recent years have witnessed an increase in the frequency of currency and balance of payments crises in developing countries More important the crises have become more virulent have caused widespread disruption to other developing countries and have even had repercussions on advanced economies To predict crises their causes must be clearly understood Two competing strands of theories are reviewed in this paper The first focuses on the consequences of such policies as excessive credit growth in provoking depletion of foreign exchange reserves and making a devaluation inevitable The second emphasizes the trade offs between internal and external balance that the policymaker faces in defending a peg Compliance with IMF

Program Indicators and Growth in Transition Economies Ms.Valerie Mercer-Blackman,Ms.Anna Unigovskaya,2000-03-01 This

paper makes use of the IMF's Database for Monitoring Fund Arrangements MONA to investigate whether transition countries that more successfully implement the conditionality of IMF programs tend to show a better performance on recovery and growth. It is not possible to determine a clear cut relationship between the index that determines the level of compliance with structural benchmarks in IMF programs and growth. However, the paper finds a definite positive relationship between the index of compliance with performance criteria and growth even after controlling for the extent of stabilization of the transition countries.

Hedge Funds and Financial Market Dynamics Mrs. Anne Jansen, Mr. Bankim Chadha, Ms. Laura E. Kodres, Mr. Donald J. Mathieson, Mr. Sunil Sharma, Mr. Barry J. Eichengreen, 1998-05-15 Hedge funds are collective investment vehicles often organized as private partnerships and resident offshore for tax and regulatory purposes. Their legal status places few restrictions on their portfolios and transactions, leaving their managers free to use short sales, derivative securities, and leverage to raise returns and cushion risk. This paper considers the role of hedge funds in financial market dynamics with particular reference to the Asian crisis.

IMF-Supported Programs in Indonesia, Korea and Thailand Mr. Atish R. Ghosh, Mr. A. Javier Hamann, Mr. Timothy D. Lane, Mr. Steven Phillips, Mrs. Marianne Schulze-Gattas, Mr. Tsidi M. The review takes into account developments as of October 1998 and was the basis for a discussion of the programs by the IMF's Executive Board in December 1998.

The Politics of Poverty Reduction Paul Mosley, 2012-03-29 Globally, there is a commitment to eliminate poverty, and yet the politics that have caused anti-poverty policies to succeed in some countries and to fail in others have been little studied. The Politics of Poverty Reduction focuses on these political processes. Analysis is based partly on global comparisons and partly on case studies of nine countries that span the developing world. Where governments are politically weak, they need to make alliances with other groups to stay in power, and where these have been with low income groups, the result may be a lasting and effective pro-poor strategy. Often, pro-poor policies have been brought in not with progressive intentions but out of fear that the state will fall apart unless pro-poor elements are incorporated into government, and the most effective regimes in reducing poverty have seldom been the kindest and most benevolent. The ability to provide the poor with access to key markets, and in particular labour and capital, is crucial, and this in turn requires fiscal strength. Two crucial elements in the story are the ability to frame labour-intensive policies, given that labour is often the only thing that poor people are able to sell, and the design of effective tax and expenditure policies. Aid donors can make a key contribution partly through reinforcing recipients' fiscal capacity but much more through providing technical support of the right kind.
