*Economic Growth in Latin America and the Caribbean* Norman Loayza, Pablo Fajnzylber, César Calderón, 2005-01-01  
Several countries in Latin America and the Caribbean are suffering severe economic downturns and the success of market oriented reforms is being called into question This report seeks to contribute to the debate by examining the nature of economic growth in the region The aim is threefold to describe the basic characteristics of growth explain differences across countries and to forecast changes over the next decade *Globalization and Development* José Antonio Ocampo, Juan Martín, United Nations. Economic Commission for Latin America and the Caribbean, 2003 Globalization and Development draws upon the experiences of the Latin American and Caribbean region to provide a multidimensional assessment of the globalization process from the perspective of developing countries Based on a study by the United Nations Economic Commission for Latin America and the Caribbean ECLAC this book gives a historical overview of economic development in the region and presents both an economic and noneconomic agenda that addresses disparity respects diversity and fosters complementarity among regional national and international institutions For orders originating outside of North America please visit the World Bank website for a list of distributors and geographic discounts at <http://publications.worldbank.org/howtoorder> or e mail [pubdistributors@worldbank.org](mailto:pubdistributors@worldbank.org) *Globalization and Development* Jose Antonio Ocampo, Juan Martín, 2003-09-29 Award winning title Globalization and Development was selected as a 2003 Notable Government Document by the American Librarian Association ALA and GODORT Government Documents Round Table In this book the UNECLAC United Nations Economic Commission for Latin America and the Caribbean draws upon the Latin American and Caribbean region s experience in order to formulate a historical and multidimensional assessment of the globalization process from the perspectives of developing countries *Economic Growth in Latin America and the Caribbean* Mario A. Gutiérrez, 2007 This study helps to provide a statistical framework for analyzing the growth story of Latin America It helps to demonstrate that some growth episodes are not well captured by standard growth theories and econometric work developed and based on different economic context and time periods The study confirms some general conclusions reached in the literature but provides evidence that raises doubt about others *After the Boom-Commodity Prices and Economic Growth in Latin America and the Caribbean* Bertrand Gruss, 2014-08-15 After skyrocketing over the past decade commodity prices have remained stable or eased somewhat since mid 2011 and most projections suggest they are not likely to resume the upward trend observed in the last decade This paper analyzes what this turn in the commodity price cycle may imply for output growth in Latin America and the Caribbean The analysis suggests that growth in the years ahead for the average commodity exporter in the region could be significantly lower than during the commodity boom even if commodity prices were to remain stable at their current still high levels Slower than expected growth in China represents a key downside risk The results caution against trying to offset the current economic slowdown with demand side stimulus and underscore the

need for ambitious structural reforms to secure strong growth over the medium term      **Honoring the Past, Building the Future** Ricardo Ávila, 2009-01-01 Although science has unlocked the secrets of the human genome the causes of social and economic development remain stubbornly enigmatic Why do some countries adopt new technologies more readily than others Why does income inequality persist in some regions even in the face of rapid economic growth Why do some societies welcome the challenges of globalization while others attempt to turn back the tide Honoring the Past Building the Future examines these and many related questions through the experience of Latin America and the Caribbean In an accessible journalistic style author Ricardo Ávila explores a tumultuous half century in which the region went from backwater to breadbasket from dictatorship to democracy and from economic basket case to emerging power      **Economic Growth in Latin America in the Late 20th Century** Andrés Solimano, Raimundo Soto, United Nations. Economic Commission for Latin America and the Caribbean, 2005 The purpose of this paper is to advance our understanding of the growth patterns of the Latin American economy in the final decades of the 20th century The paper focuses on the analysis of medium to long run growth as opposed to the standard discussion of the determinants of high frequency fluctuations business cycles and disentangles the contribution of factor accumulation and total factor productivity It also aims to understand the spells of prosperity and stagnation in several important economies of the region as well as identify stories of growth decline and divergence in recent decades      **Long Run Economic Development in Latin America in a Comparative Perspective** André A. Hofman, United Nations. Economic Commission for Latin America and the Caribbean. Economic Development Division, 2001 This paper describes trends in economic growth and its causes in several Latin American countries in the 20th century This paper stresses that the proximate causes of economic growth are not independent of the ultimate causes of growth Proximate causes of economic growth are those areas of causality where models and quantification is possible Ultimate causes of economic growth are much more difficult to quantify The paper concludes with a description of some of the most important characteristics of economic development in the region      *Economic Survey of Latin America and the Caribbean*, 1972      *The Long March* Shahid Javed Burki, Guillermo Perry, 1997-01-01 Detailed discussion of reforms necessary to accelerate economic growth and reduce poverty in the region Reforms include equity market development civil service reform in health and education investment labor market liberalization and greater trade openness Handbook of Latin American Studies v 57      **Economic Growth in Latin America** Mario A. Gutiérrez, United Nations. Economic Commission for Latin America and the Caribbean. Economic Development Division, 2005      *Towards Sustained Development in Latin America and the Caribbean* United Nations. Economic Commission for Latin America and the Caribbean, 1989

*¿Integración comercial como un camino al desarrollo?* World Bank, 2019-10-10 After a period of rapid economic growth associated with high commodity prices the Latin America and Caribbean region has again entered a phase of lackluster performance Overall this slowdown seems more self inflicted than imported and the outlook for the region is not encouraging

either A tepid export response constrains the prospect of growing through external demand whereas limited fiscal space leaves little room to stimulate domestic demand The outlook could deteriorate further if the international environment became less conducive This report explores whether inward looking development strategies could be one of the reasons for slow growth in Latin America and the Caribbean Trade barriers are higher than in other developing regions and while numerous preferential trade agreements have been signed many of them are intra regional The report shows that South North agreements are associated with increases in economic complexity and faster economic growth than South South agreements It illustrates the point by assessing the economic social spatial and environmental impacts of two major South North agreements signed over the last year

the center of the trade network has substantial macroeconomic benefits Second we do not find a statistically significant or economically sizable direct impact of trade on overall income inequality      Firm Innovation and Productivity in Latin America and the Caribbean Inter-American Development Bank, Matteo Grazzi, Carlo Pietrobelli, 2016-07-01 This volume uses the study of firm dynamics to investigate the factors preventing faster productivity growth in Latin America and the Caribbean pushing past the limits of traditional macroeconomic analyses Each chapter is dedicated to an examination of a different factor affecting firm productivity innovation ICT usage on the job training firm age access to credit and international linkages highlighting the differences in firm characteristics behaviors and strategies By showcasing this remarkable heterogeneity this collection challenges regional policymakers to look beyond one size fits all solutions and create balanced policy mixes tailored to distinct firm needs This book is open access under a CC BY NC ND 3 0 IGO license
