## **Economic Law In Globalizing Markets Studies In Transnational Economic Law:**

**Economic Law in Globalizing Markets** Karl Matthias Meessen, 2004-01-01 Many product markets have gone global already Others are following The globalization of markets is well understood by business It has also come to dominate the economic policy agenda of nation states and supranational organizations They all compete for inward investment to create and preserve employment opportunities Economic law is one of several parameters in the global competition of systems This study takes note of that new and additional function of economic law Part I sets out to examine the making of economic law by states by business and by international and supranational organizations Part II discusses some of the main rules of substantive economic law divided into chapters on market law transactions law and property rights law and Part III addresses key issues of enforcement by the executive branch on the one hand and by the judiciary and arbitral tribunals on the other Each of the 32 chapters contains an essay on a current cross border related problem of economic law often as reflected in recent case law Nearly 300 cases are discussed or at least referred to in that way They were selected from international case law and from cases decided by EC US and German courts and courts of ten more countries as well as by ICC ICSID and other arbitral tribunals The introductory notes to and summaries of the various parts and chapters integrate economic and political theory and provide the common thread The overall conclusion is to advocate a transnational approach problem oriented and cutting right across all layers of sources of law international supranational national and transnational law It distinguishes neatly between public and private law aspects of economic law but decidedly treats them together The book is of interest to academia and practitioners both for references to current problems and for a vue d ensemble Advanced students might use the book to understand the logic of today s economic law In addition to decades of research in international economic law the author capitalizes on his exposure to a wide array of practical issues as well as on six years of English language teaching in Geneva

**STUDIES IN TRANSNATIONAL ECONOMIC LAW 20** Research Handbook in International Economic Law Andrew T. Guzmán, A. O. **The Right to Development and International Economic Law** Isabella D Bunn, 2012-03-01 The United Nations is commemorating the 25th anniversary of the 1986 Declaration on the Right to Development which proclaimed the right to be an inalienable human right by virtue of which every human person and all peoples are entitled to participate in contribute to and enjoy economic social cultural and political development in which all human rights and fundamental freedoms can be realized The UN now aims to mainstream the right into its policies and operational activities and is reviewing prospects for an internationally binding legal instrument The evolution of the right to development however has been dominated by debates about its conceptual validity and practical

ramifications It has been hailed as the cornerstone of the entire human rights system and criticized as a distracting ideological initiative Questions also persist about the role of the right in reforming the international economic order This book examines the legal and moral foundations of the right to development addressing the major issues It then considers the right to development in the global economy noting the challenges of globalization and identifying key principles such as differential treatment of developing countries participation and accountability It relates the right to broad objectives such as the Millennium Development Goals the human rights based approach to development and environmental sustainability Implications for international economic law and policy in the areas of trade development finance and corporate responsibility are assessed The conclusion looks to the legal and ethical contributions and limitations of the right to development in this new context With an academic and professional background in international law human rights and moral theology the author brings a unique interdisciplinary focus to this timely project
