Rawski, Lillian M. Li, 2024-06-04 This volume marks a turning point in the study of Chinese economic history It arose from a realization that the economic history of China as opposed to the history of the Chinese economy had yet to be written Most histories of the Chinese economy whether by Western or Chinese scholars tend to view the economy in institutional or social terms In contrast the studies in this volume break new ground by systematically applying economic theory and methods to the study of China While demonstrating to historians the advantages of an economic perspective the contributors comprising both historians and economists offer important new insights concerning issues of long standing interest to both disciplines Part One on price behavior presents for the first time preliminary analyses of the incomparably rich and important grain price data from the imperial archives in Beijing and Taipei during the Qing Dynasty 1644 1911 These studies reveal long term trends in the Chinese economy since the seventeenth century and contain surprising discoveries about market integration the agricultural economy and demographic behavior in different regions of China The essays in Part Two on market response deal with different aspects of the economy of Republican China 1912 49 showing that markets for land labor and capital sometimes functioned as predicted by models of economic rationality but at other times behaved in ways that can be explained only by combining economic analysis with knowledge of political regional class and gender differences Based on new types of data they suggest novel interpretations of the Chinese economic experience The resulting collection is interdisciplinary scholarship of a high order which weaves together the analytic framework provided by economic theory and the rich texture of social phenomena gathered by accomplished historians This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1992

Asplund,2013-11-22 The past few decades have seen a revolutionary increase in interest in the economic role of education and training at the societal business and individual levels This is mainly due to the strong post war growth in industrialized economies which has been driven by rapid technological progress and far reaching structural change and in the end has resulted in increasingly skill intensive production and growing demandfor more educated labour Today it is frequently argued that with the increasing importance of the role of know how the workforce has become the most important single input in the production process Simultaneously the dramatic increase in the availability of large micro level databases has opened enormous possibilities to study the economic role of human capital creation also empirically The economic perspective of human capital accumulation is however of utmost importance also in times of deep economic recession Periods of economic slowdown and rapidly increasing unemployment tend to in crease the demandfor advanced education and training in particular This brings up in turn questions regarding overeducation and satisfying both private and social returns on investments in human capital      *Africa and Asia in Comparative Economic Perspective* P. Lawrence,C. Thirtle,2001-05-14 This invaluable collection compares the relatively unsuccessful economic development of Subsaharan Africa with that of the successful Asian economies especially the Asian tigers It covers three main areas of comparison the lessons for Africa from the Asian experience secondly the comparisons of various aspects of economic development in Africa and Asia and finally convergence how far the laggard economies are catching up with or diverging away from each other      *Freedom from poverty as a human right: economic perspectives* Andreassen, Bard A.,Marks, Stephen P.,Sengupta, Arjun,2010-06-04

*Economic Perspectives* Wankel, Charles,2011-11-30 Continued growth of the global market necessitates research that establishes norms and practices and ensures the appropriate level of ethical concern for those who contribute to the process

of globalization and are being affected by globalization Ethical Models and Applications of Globalization Cultural Socio Political and Economic Perspectives presents the work of researchers who seek to advance the understanding of both the ethical impact of globalization and the influence of globalization on ethical practices from various cultural socio political economic and religious perspectives The aim of this reference work is to put forward empirically grounded methods for understanding both the effect that the process of globalization has on ethical practices in organizations and how this research can shape the course of economic globalization *The Economic Approach to Human Behavior* Gary S. Becker, 2013-02-06 Since his pioneering application of economic analysis to racial discrimination Gary S Becker has shown that an economic approach can provide a unified framework for understanding all human behavior In a highly readable selection of essays Becker applies this approach to various aspects of human activity including social interactions crime and punishment marriage fertility and the family and irrational behavior Becker s highly regarded work in economics is most notable in the imaginative application of the economic approach to a surprising breadth of human activity Becker s essays over the years have inevitably inspired a surge of research activity in testimony to the richness of his insights into human activities lying outside the traditionally conceived economic markets Perhaps no economist in our time has contributed more to expanding the area of interest to economists than Becker and a number of these thought provoking essays are collected in this book Choice Gary Becker was awarded the Nobel Prize in Economic Science in 1992 **The Economic Point of View** Israel M. Kirzner, 1960 **Regional Economic Outlook, October 2015** International Monetary Fund, 2015-10-27 Growth in sub Saharan Africa has weakened after more than a decade of solid growth although this overall outlook masks considerable variation across the region Some countries have been negatively affected by falling prices of their main commodity exports Oil exporting countries including Nigeria and Angola have been hit hard by falling revenues and the resulting fiscal adjustments while middle income countries such as Ghana South Africa and Zambia are also facing unfavorable conditions This October 2015 report discusses the fiscal and monetary policy adjustments necessary for these countries to adapt to the new environment Chapter 2 looks at competitiveness in the region analyzing the substantial trade integration that accompanied the recent period of high growth and policy actions to nurture new sources of growth Chapter 3 looks at the implications for the region of persistently high income and gender inequality and ways to reduce them New Perspectives for Environmental Policies Through Behavioral Economics Frank Beckenbach, Walter Kahlenborn, 2015-09-25 This book presents essential insights on environmental policy derived from behavioral economics The authors demonstrate the potential of behavioral economics to drive environmental protection and to generate concrete proposals for the efficient design of policy instruments Moreover detailed recommendations on how to use nudges and related instruments to move industry and society toward a sustainable course are presented This book addresses the needs of environmental economists behavioral economists and environmental policymakers as well as all readers interested in the intersection between

behavioral economics and environmental policy      World Economic Outlook, April 2019 International Monetary Fund. Research Dept.,2019-04-09 After strong growth in 2017 and early 2018 global economic activity slowed notably in the second half of last year reflecting a confluence of factors affecting major economies China's growth declined following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards investment dropped in Italy as sovereign spreads widened and external demand especially from emerging Asia softened Elsewhere natural disasters hurt activity in Japan Trade tensions increasingly took a toll on business confidence and so financial market sentiment worsened with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year weighing on global demand Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US China trade deal but they remain slightly more restrictive than in the fall      Regional Economic Outlook, April 2018, Western Hemisphere Department International Monetary Fund. Western Hemisphere Dept.,2018-05-11 The world economy and global trade are experiencing a broad based cyclical upswing Since October 2017 global growth outcomes and the outlook for 2018 19 have improved across all regions reinforced by the expected positive near term spillovers from tax policy changes in the United States Accommodative global financial conditions despite some tightening and market volatility in early February 2018 have been providing support to economic recovery Higher commodity prices are contributing to an improved outlook for commodity exporters The US and Canadian economies posted solid gains in 2017 and are expected to grow above potential in the near term Despite the improved near term outlook however medium term prospects are tilted downwards Growth prospects for advanced economies are subdued and many emerging market and developing economies are projected to grow in per capita terms more slowly than advanced economies raising concerns about income convergence While risks appear broadly balanced in the near term they skew to the downside over the medium term including a possible sharp tightening of financial conditions waning popular support for global economic integration growing trade tensions and risks of a shift toward protectionist policies and geopolitical strains      OECD Economic Outlook, Volume 1998 Issue 2 OECD,1998-12-18 The OECD Economic Outlook analyses the major trends in the OECD area that will mark the next two years This issue's special features cover today's downside risks for the world economy the crisis in the emerging markets recent stock market developments and helping the long term poor      **Economic Outlook for Southeast Asia, China and India 2016 Enhancing Regional Ties** OECD,2016-01-22 The annual Economic Outlook for Southeast Asia China and India examines Asia's regional economic growth development and regional integration process      **World Economic Outlook, October 2015** International Monetary Fund. Research Dept.,2015-10-06 This issue discusses a number of factors affecting global growth as well as

growth prospects across the world's main countries and regions. It assesses the ongoing recovery from the global financial crisis in advanced and emerging market economies and evaluates risks both upside and downside including those associated with commodity prices, currency fluctuations and financial market volatility. A special feature examines in detail causes and implications of the recent commodity price downturn. Analytical chapters look at the effects of commodity windfalls on potential output and of exchange rate movements on trade.
