Century Or Multi-polar Century? David Dollar, 2007 The rise of Asia is something of a myth During 1990 2005 China accounted for 28 percent of global growth measured at purchasing power parity PPP India accounted for 9 percent The rest of developing Asia with nearly a billion people accounted for only 7 percent the same as Latin America Hence there is no general success of Asian developing economies China has grown better than its developing neighbors because it started its reform with a better base of human capital has been more open to foreign trade and investment and created good investment climates in coastal cities China's success changes the equation going forward its wages are now two to three times higher than in the populous Asian countries Bangladesh India Indonesia Pakistan and Vietnam and China will become an ever larger importer of natural resource and labor intensive products Developing countries need to become more open and improve their investment climates to benefit from these opportunities China itself faces new challenges that could hamper its further development unsustainable trade imbalance with the United States energy and water scarcity and unsustainable use of natural resources and growing inequality and social tension To address the first two of these challenges good cooperation between China and the United States is essential The author concludes that we are more likely to be facing a multi polar century than an Asian century

under the BJP led NDA government the Congress Party underwent a process of introspection and reiteration Then it realized that the policies of socialism and social justice which were anathema for it during the economic reforms under the Rao regime have the potentiality to mobilize the alienated social groups and thereby reinvent its space in Indian politics **The**
